Most casino players are also fans of James Bond movies. The character from Ian Fleming's books first made it to the screen in 1962, before being played by the late Sir Sean Connery. No one could have imagined that 60 years later, people are still obsessed with those movies and eagerly awaiting the next release.

However, there was one scene that

caught the attention of poker fans around the world. In Casino Royale, Daniel Craig's James Bond roleplays No-Limit Texas Hold'em so he can get one step closer to solving the mystery behind banker Le Chiffre. The scenes are full of suspense, detail and everything that makes this game appealing to players all over the world. In this article, we take a closer look at this scenario of online casino games.

Scene

Settings

Just a normal poker game at Casino Royale. Or is it? With R\$115 million in the pot, nothing is ordinary. After the top ten, only four players remained in the final stage, including notorious banker Le Chiffre, played by Mads Mikkelsen. Each player has four cards in hand, and everyone has absolute confidence in their combination. The last card has been dealt. On the table, we see the 4 of Spades, the 6 of Spades, the 8 of Spades, the Ace of Hearts and the Ace of Spades. Now players start showing their hands.

The first is Queen and King of Spades – a flush. The second player showed his cards with a smile on his face. Eight of Hearts and Eight of Plums. This, combined with the Eight Spades on the table, gave him a full gourd. Now it's the story's villain's turn. We already know he has Six Hearts and an Ace of Clubs. Another full house, but higher than the second player's. Confident in his victory, Le Chiffre begins to smile, knowing that now he can only be beaten by a straight flush or a four-card flush. But the last player to show was James Bond with the 5 and 7 of spades.

Settings for the

Last Scene

Playing Texas Hold'em is not for everyone, poker players will understand that James Bond is amazing. Everyone who saw the film rejoiced after showing their cards, but a true poker connoisseur was thrilled when he realized the odds.

But it

wasn't just his cards that made him a winner. James Bond used his lore skills to study Le Chiffre in previous poker games while deliberately losing to avoid seeing himself as a threat. Bond begins to notice Le Chiffre's bluffing tactics and the way he touches his eye scars with weak hands. At one point, Le Chiffre noticed Bond's intentions and got a small victory by tricking him.

Not Very Realistic

While we all love the James

Bond movies and the action presented to us, we have to admit that it all seems a little unrealistic to say the least. Like most of his punch fights and car dodges, this poker game is presented in a way that would never happen in real life. First, the stakes will never be that high, and second, the way the cards will be dealt at the end is extremely unlikely, especially since all four players have incredible cards.

So you don't have to

think you have to be that good to play poker. So don't be afraid to try poker the next time you visit your favourite best online casino.

Visita de Putin a Corea del Norte: una alianza en un momento peligroso

La visita de Vladimir Putin a Corea del Norte el miércoles fue relativamente discreta. Sin una larga fila de funcionarios gubernamentales en la pista del aeropuerto y solo una pequeña guardia de honor, el presidente ruso descendió del avión para recibir un apretón de manos y un abrazo de Kim Jong-un, seguido de un ramo de flores de una mujer vestida con el tradicional *hanbok*. Sin embargo, la sencillez de la ocasión era engañosa.

Putin llegó a la capital norcoreana desde Moscú, a través del Lejano Oriente ruso, en la oscuridad, y su comitiva recorrió las "encantadoramente iluminadas" calles hacia la casa de huéspedes estatal Kumsusan en las primeras horas de la mañana del miércoles.

A pesar de – o quizás debido a – la hora inconveniente, los dos hombres supuestamente compartieron sus "pensamientos más profundos y reprimidos", pero el mundo tendría que esperar para ver cómo esas frustraciones se reflejarían en su doble desafío a la "hegemonía y el imperialismo" del oeste.

La inclusión de una cláusula de asistencia mutua en su acuerdo – que requiere que un país ofrezca asistencia si el otro es atacado – fue una señal de lo lejos que han llegado los lazos Rusia-Corea del Norte desde la primera visita de Putin a Pyongyang hace 24 años.

Pero la "asociación estratégica integral" acordada justo antes de que Putin partiera hacia una visita de dos días a Vietnam fue una descripción incompleta de la cumbre. Y por una buena razón: ¿por qué agregar carne a los huesos de acuerdos que, en parte o en su totalidad, probablemente violen las sanciones internacionales contra ambos regímenes?

En una repetición de su reunión anterior en Vladivostok hace nueve meses, no se esperaba que ninguno de los líderes revelara si se habían alcanzado acuerdos sobre armamento para la guerra en Ucrania a cambio de conocimientos tecnológicos o asistencia alimentaria y energética para Corea del Norte.

No había nada crítico, sin embargo, sobre el estado de ánimo detrás del acuerdo: una reunión de mentes construida sobre una necesidad mutua tan urgente que sus némesis en Washington, Seúl y Tokio parecen impotentes para aplicar los frenos.

Cuando Putin estuvo por última vez en Corea del Norte, su anfitrión, Kim Jong-il, aún estaba varios años away de supervisar una prueba nuclear que cambiaría para siempre los cálculos mundiales cuando se trataba del país. Cuando Putin se reunió con los líderes del G8 meses después en una cumbre en Japón, le dijo a Tony Blair, Bill Clinton y a otros que Kim parecía ser un hombre con quien "podían hacer negocios".

Más de tres décadas después, mucho del negocio que se lleva a cabo con Pyongyang es clandestino y se limita a un pequeño grupo de aliados encabezados por China y Rusia. El G8 se convirtió en el G7 después de la anexión rusa de Crimea en 2014. Kim Jong-il murió hace más de una década, y su hijo menor y reportedly más caprichoso ahora está al mando de un estado al borde de convertirse en un poder nuclear.
