Find the right team in the right game and the returns can be huge.

Why Corner Bets?

Why should you place corner bets as opposed to Goals in a football match? Now, we are not opposed to goal-based bets but often corners tend to be a more stable market. Most games in most leagues, have reasonably good corner counts where you'll regularly see games end in double figures of 12-15 or even as high as 20 on occasion.

When you consider that most bookies tend to set their corner lines around the 10 mark where corner betting odds are close to evens, there is plenty of value to be had. Once you start isolating the leagues and teams that regularly produce you give yourself a huge advantage when pitting yourself against the bookmaker.

Another thing to consider is to find more value in the more obscure leagues as bookies tend to spend less time pricing up corner lines in these than the big popular European ones. We've often found they cover leagues with a blanket corner figure rather than look at the individual teams' abilities and price it accordingly. This is where you can take advantage.

Pre-Match vs In-Play Corner Betting

Which should you go for? That's a personal choice entirely but the main factor is; Do you have time to sit there and watch games live to wait for the moment to pounce? If the answer is no, then it really is an easy choice.

Both Pre-Match and In-play can be profitable, so we will run through techniques we use ourselves and you can then decide if any fit into your corner betting strategy.

Pre-Match Corner Betting Markets

Advantages: You can place bets and leave them to run with minimal time used allowing you to do other things.

Disadvantages: By placing a corner match bet before the game starts you are solely relying on previous statistics and trends. You can't react to match events.

Trebles or Accas using "Lower" Corner Lines - A simple Corner Betting Strategy

A consistently good corner betting strategy to make medium profits – In an ideal scenario, you

select 3 or more games and go a corner line below what the stats suggest.

If the stats point to Over 9 Corners being statistically strong you select the over 8 Corner line to build a slight safety margin (this is important as you are combining multiple games together).

If you can get yourself odds of 2.25 to 3.00 odds for a treble then this is pretty much optimal. With smaller stakes and more games, the odds can creep up way higher for potentially big wins

The #BettingEngine is the perfect tool to use to create these kinds of bets as it takes all the time and hassles out of the research side of things. In a matter of minutes and you are armed with enough information to confidently place these types of bets. The #BettingEngine allows you to filter from 'Over 6' to 'Over 12' giving you a huge range to work with.

Pre Match Asian Corner Match Bet (or Half Time Asians)

If you find a game where the probable corner line (suggested by statistics) is close to the Asian Line that the bookmakers are offering this can be great for a Single Bet (or even a low stakes multiple).

For the sake of an example, imagine it's Saturday and Chelsea are playing Watford in the Premier League. The #BettingEngine says that the Over 9 Corner line is a strong selection.

You backed it up by looking at the head to head between the two teams and all the stats also suggest this is a very strong game for corners over the last 5 league matches.

Bet365 are offering a corner line of 'Over 10 Asian Corners' and priced it up at 1.975. This is the perfect game to place a confident stake of 1-2% of your betting bank on.

* For those unfamiliar with Asian Lines, if the number is a whole figure this is the refund (or push) line. In this example, if the game finished on 0-9 corners the bet would lose. If it finished on exactly 10 your stake would just be refunded. Over 11+ corners would mean the bet wins.

You can use the exact same process outlined previously for Half Time Asian corners. The typical line that Bet365 offer is 'Over 4.5 Half Time Asian Corners' meaning you need 5 corner kicks before the halfway mark for the bet to win (although this range can vary between 4 and 5.5 depending on league and teams)

SkyBet also offer unique corner markets that other bookmakers don't seem to carry, and depending on odds these can be great for Pre-Match Singles or Accas (these lines are not available in-play):

Corners Taken Each Half (starting from 3+)

Corners Taken Each Team (starting from 3+)

Each Team Corners Taken in Each Half (starting from 1+)

1st Half Over (or Under) Corners Taken (starting at 4+)

2nd Half Over (or Under) Corners Taken (starting at 4+)

If you want to learn even more about Asian betting, including corner handicap, we have a full blog post here <https://playtheperspective.com/blog/asian-betting-explained>

In-Play Corner Betting

In-play corner betting involves placing a number of corners bet after a football match has kicked off, this could be on total corners in the match or other corner betting markets. Generally, after the game has kicked off it is much easier to judge the flow of the game and react to other events such as goals or sending offs.

Advantages: Potentially much better odds than placing pre-match. You can react to how a match is being played out. Goals can change the corner game massively.

Disadvantages: Time – you need to be able to sit there and watch the match in-play so you can pounce when the time is right.

The Ultimate Corner Betting Stats!

So now we have given you some ideas on how to approach corner betting you will need something to help provide you with the winning stats! That's where our heavyweight of a corner bets tool comes in... Corner King.

We developed the tool WE wanted to use for our corner betting strategies, after seeing the competition fall well short. Jam-packed with all the info you could ever want or use, and includes:

Corners By Half (1st & 2nd half and Total)

Corners by Team (Won and conceded)

10min Corners

Late FH Corners (37-HT)

Late SH Corners (80-FT)

Corner Races

Order of Corners Taken

15min Corners (0-15, 16-30, 31-HT, 46-60, 61-75, 76-FT)

And Various Bet Lines with % Win Occurrence

You can fully customise the tool to show only the markets you want and hide the ones you don't, using the quick launch icons from the homepage fixtures.

If you want to bet on Corners, bet like a King!

Aspectos destacados de las {img}grafías de Jack Lueders-Booth en su nueva obra "Mujeres reclusas: Polaroids"

Lo que más resalta en las 32 {img}grafías que componen el nuevo libro de Jack Lueders-Booth, "Mujeres reclusas: Polaroids", es la intimidad que ocupa cada cuadro. Las reclusas visten su propia ropa y posan en celdas adornadas con efectos personales, mucho como en cualquier dormitorio de colegio universitario normal; una mujer abraza una biografía de Mick Jagger, otras son retratadas con los brazos enlazados alrededor de amigas. Una sensibilidad cálida, típicamente ajena a los retratos de la encarcelación, es notable a lo largo de todo el trabajo.

"Miriam Van Waters, la primera superintendente en Massachusetts Correctional Institute Framingham (en 1932), insistía en que no utilizaran este período desafortunado de sus vidas para formar su identidad", dijo el fotógrafo en una entrevista en video, relatando los primeros objetivos de la prisión de Massachusetts. "Para fomentarlo, trató de hacer que se viera como en casa. Por esa razón, (cuando yo estuve allí) las reclusas vestían ropa doméstica y los guardias penitenciarios también carecían de uniforme. Muchos de ellos tenían la misma edad que las prisioneras, y muchos de ellos estudiaban justicia criminal en la Northeastern University, una universidad cooperativa".

Establecida en 1878 como una reformatorio que encerraba a mujeres por el delito de tener hijos fuera del matrimonio, para la década de 1970, gran parte de la población de la prisión estaba encarcelada por delitos como el hurto y la prostitución, o como cómplices de crímenes de

compañeros masculinos. Como parte de las intenciones previas de Van Waters, el establecimiento era en ese momento el sitio de muchos experimentos en la readaptación, un esfuerzo destinado a reducir el impacto psicológico de la encarcelación.

Lueders-Booth llegó en 1977, inicialmente para pasar solo un año impartiendo un curso de {img}grafía como parte de su tesis de maestría en la Graduate School of Education de Harvard (aunque ya daba clases en la universidad, no tenía un título de enseñanza). "Tenía ideas específicas sobre lo que quería hacer", recordó. "Enseñar {img}grafía a las personas en instituciones de confinamiento, como una forma de aumentar la moral y enseñarles una habilidad". La invitación a MCI-Framingham fue oportuna: otro profesor de Harvard dirigía un proyecto de artes penitenciarias y buscaba a alguien para iniciar un curso de {img}grafía.

Acompañado por su hija de 18 años, Laura - "ella me dio un nivel de credibilidad, de que este viejo tipo sabía algo sobre la juventud" - Lueders-Booth recibió un pasillo de celdas viejas para dirigir su programa, el cual él y su hija transformaron en estudios y laboratorios oscuros. Con grupos de aproximadamente 10 mujeres a la vez, los grupos comenzaron creando {img}gramas (impresiones {img}gráficas hechas colocando objetos sobre papel {img}gráfico antes de exponerlo a la luz), eventualmente moviéndose a la retratística. "Estaba nervioso por ellas y ellas por mí. No sabía nada (acerca del sistema penitenciario) excepto por lo que había visto en los medios", recordó las sesiones iniciales del fotógrafo. "Pero llegamos a confiarnos el uno en el otro en cuestión de meses. Ellas tenían confianza en mí de que estaba allí para ayudarlas".

Las {img}grafías de Polaroid, las cuales el fotógrafo tomó junto con una serie en blanco y negro más amplia, no fueron intencionales, sugirió. Sin embargo, en 1980, habiendo sido galardonado con dos becas consecutivas de la empresa de cámaras instantáneas, Lueders-Booth tuvo acceso a película ilimitada y comenzó a crear, "probablemente el proyecto más importante que hice en mi vida. Fue reconfortante y maravilloso, la comodidad y la confianza con las que las mujeres participaron en la experiencia de ser {img}grafiadas".

Terminó por quedarse en Framingham durante siete años, solo concluyendo sus talleres a mediados de la década de 1980, en
