Complete guide to install and configure the converter and HUD for PPPoker

Over the past

few years, mobile poker apps from 4 Asia have become a breath of fresh air for professional players. Very lucrative pools and weak opponents have become a 4 powerful argument for the poker migration. And the constantly deteriorating playing conditions

in the leading poker rooms stimulate even the 4 most conservative players to seek alternatives.

One of the most popular mobile applications is PPPoker. In terms of traffic volume, PPPoker 4 significantly surpasses most similar places for the game. The mobile poker room regularly holds various promotions to attract new players, 4 signs contracts with professional players, and even conducts large offline series. Everything seems to be good, but what's the catch?

The 4 catch lies on the surface: PPPoker is a mobile poker application, which means that neither PokerTracker 4, Holdem Manager 3, 4 Hand2Note, nor DriveHUD can directly import hand histories from there. Hence, no HUD and no statistics while playing. Are we 4 putting an end to the plans to develop new PPPoker waters? No matter how it is! There is a solution 4 and it is called "PP Poker HUD Catcher".

What is PPPoker HUD Catcher?

PP Poker HUD Catcher is a poker program that works in 4 conjunction with Holdem Manager 3, PokerTracker 4, Hand2Note, DriveHUD and allows you to display HUD and import hand history while 4 playing in the PPPoker application. Unlike most other Asian poker applications, PPPoker has recently had a significant advantage - an 4 official client for Windows. In practice, the availability of PPPoker on PC also saves you from a headache of setting 4 up Android emulators. HUD Catcher works both at cash tables and in tournaments.

The poker room does not prohibit

the use 4 of poker trackers (although there is no separate list with allowed programs on PPPoker). In practice, no one had any 4 problems with the HUD.

How to install PPPoker HUD Catcher?

Installing PPPoker HUD Catcher is very simple:

1. Go to the official website 4 of the developer and click "Download free trial today";
2. Select the folder where the program will be installed and click 4 "Install". The installation file weighs 22 megabytes;
3. Within a minute Card Catcher will be installed on your computer. Click "Launch".

How 4 to activate PPPoker HUD Catcher free trial?

Before purchasing a license

for PPPoker HUD Catcher, we strongly recommend that you try 4 the free trial first. It is provided on the developer's website. The trial version will work without restrictions on functionality 4 within 7 days from the date of activation. The procedure for obtaining a trial is also very simple:

1. Start Card 4 Catcher;
2. In the first window after the start, you will be offered a choice between trial version, purchase or registration. 4 Click on "Trial";
3. You will be prompted to enter your email to activate the trial version. Enter your e-mail and 4 click OK;
4. Congratulations - the trial version of PPPoker HUD Catcher is activated.

4 PPPoker Card Catcher for the first time, you will be prompted to select your database.

PP Poker Card Catcher supports:

DriveHUD;
Holdem Manager 2;
Holdem 4 Manager
3;
PokerTracker 4;
Hand2Note.

Hands are also imported into Holdem Manager and Poker Tracker 3, however the HUD will not work in 4 old versions of trackers. Card Catcher will automatically configure your import folders. However, we recommend that you double-check to make 4 sure the database is being imported from the correct folder. We will tell you how to do this separately for 4 each tracker below.

How to set up PPPoker

2. Start the PPPoker client and log into your account.

4. Finally, 4 in Poker Tracker 4, click "Play Poker" and "Get Hands While Playing".

In the table search pop-up

window, select 4 one of the tables you are playing at, and then right-click and hold down the cross in the lower left 4 corner of the screen and drag it to the corresponding table name. Make sure to match the table you selected 4 first to the table you are now dragging the cross to.

Finally, he will ask you if you want to add 4 a HUD to this table. Make sure the table name is correct and click OK. Repeat the steps for each 4 table you play at.

Despegues y aterrizajes en el aeropuerto internacional de Incheon, en Corea del Sur, se ven afectados por globos norcoreanos llenos de basura

Los despegues y aterrizajes en el Aeropuerto Internacional de Incheon, en Corea del Sur, se han visto interrumpidos durante aproximadamente tres horas debido a globos lanzados por Corea del Norte llenos de basura, según un portavoz del aeropuerto.

Un globo aterrizó en la pista cerca del terminal de pasajeros dos y las tres pistas del aeropuerto de Incheon se cerraron temporalmente el miércoles, según el portavoz.

Corea del Norte ha lanzado globos con basura a Corea del Sur desde finales de mayo, con cientos que han aterrizado en Corea del Sur.

Se avistaron varios globos en y alrededor de los límites del aeropuerto, según el portavoz, quien agregó que no es la primera vez que las operaciones en el aeropuerto – que está a unos 40 km de la frontera norcoreana – se ven interrumpidas por globos cercanos.

La interrupción de los vuelos nacionales e internacionales ocurrió entre las 1.46 am y las 4.44 am del miércoles, y las pistas han vuelto a abrirse desde entonces, dijo la Corporación del Aeropuerto Internacional de Incheon.

El volumen de vuelos a esa hora del día suele ser bajo. FlightRadar24 mostró que ocho vuelos de carga y pasajeros que llegaban fueron desviados a los aeropuertos de Cheongju o Jeju en Corea del Sur durante ese tiempo, y un carguero chino de Shanghai fue desviado a Yantai, China. Varios vuelos más tuvieron retrasos en la llegada y las salidas se retrasaron varias horas.

Corea del Norte ha dicho que los globos son una represalia por una campaña de propaganda de disidentes norcoreanos y activistas en el Sur que regularmente envían globos con comida, medicinas, dinero y folletos que critican a los líderes del Norte.

Entre los artículos transportados por los globos norcoreanos hay artículos impresos con personajes de Hello Kitty, ropa usada, y suelo que contiene rastros de heces humanas y parásitos, ha dicho Corea del Sur.

El ejército surcoreano dijo el miércoles que alrededor de 100 globos habían caído al suelo entre el martes y el miércoles, la mayoría en la capital, Seúl, y la provincia circundante de Gyeonggi. La mayoría llevaba solo recortes de papel.
