3 days free trial version is available. You need to contact a PokerEnergy representative via any convenient communication channel indicated in the "Contacts" section of our portal.

FulPot Converter is designed to solve this problem and give you an edge over a field that does not have an array of useful data generated by statistics collection programs. The converter automatically converts the hand history of FulPot Poker into an easily recognizable Poker Tracker 4\Holdem Manager 2. Thus, you will always be one step ahead of blind opponents.

More detailed information about the program can be found on the official website . Download - in the same place.

FulPot Converter is a poker

program that allows you to maximize your expectation at the FulPot Poker tables using statistical indicators and your Poker Tracker 4 and Holdem Manager 2 HUD. But format of

the hand history saved by the client of the FulPot poker room is not readable by the tracking software.

FulPot Poker

Why do I need a converter if Poker Tracker 4 or Holdem Manager 2 in other networks or rooms work without them?

The need for a separate

converter is caused by a special hand history format, in which the FulPot poker room keeps hands. This format is different from Pokerstars\888 and other networks where trackers work without additional tools. If you do not use FulPot, then the statistics and HUD Poker Tracker 4\Holdem Manager 2 will not be displayed at the tables.

Does the

converter have a trial period?

Yes, 3 days trial version available. You need to contact a PokerEnergy representative via any convenient communication channel indicated in the "Contacts" section of our portal.

How to install FulPot Converter correctly?

Download

the program from the developer's site;

Run the downloaded file and follow the instructions of the installation wizard;

When the installation is completed, the FulPot Converter shortcut appears on your desktop.

How to get a license and register FulPot Converter?

After the first launch of the converter, you will open a small window containing two fields: "Hardware ID" and "Key". Copy the information from the "Hardware ID" and send it to us along with your email (to create an account). After payment you will be sent a password that you need to enter in the "Key" field and click "Confirm".

What needs to be configured in the Converter for correct operation?

FulPot

Converter contains several options that must be configured:

Hand history folder (the path to where the hands are saved in the unreadable format of the FulPot Poker);

Export

to (this is the folder where your hands are already stored in the format readable by trackers);

HUD type;

Prefix converter (helps to avoid a situation where all distributions will be marked as played against the "Playername" and will normally denote their nicknames);

Currency conversion rules (translates national currencies into more understandable and familiar USD/EUR).

Important elements of the converter setup process

You can configure FulPot Converter automatically and manually. When you click the "Scan for installed poker clients" button, the program will search for the installed poker clients and the desired path.

The conversion is configured

automatically when you first start, but you can change the values at any time through the menu "Program-Currency converting options".

You manually select a folder for import

yourself. You can select it by clicking on "..." in the Converter itself. Please note

that this folder should be located in the folder where the poker room itself is installed.

You will also need to establish a link between the poker room and the converter. You will be required to sit at the poker table in the client and follow the path in the FulPot Converter menu "Program-Hand history database connection options". The active room will appear in the list, click "Connect to database" and wait for the status "Connected".

Folders where primary hands are saved and transformed hands should not be the same or one to enter the other.
PT4\HM2 settings for FulPot Converter to work correctly

Holdem Manager 2: launch HM2, click the "Home" tab, then "Site setup".

From the list of poker rooms, select Pokerstars, click on the green plus just below the window with the addresses of folders and specify the folder where the converter imports already converted hands.

Poker Tracker 4: launch PT4, click consistently on the "Play poker" - "Pokerstars" - "Configure" (all are on the same tab, on the left side). In the newly opened window, select "Site Configuration", again select "Pokerstars" and specify the path where the converter imports the already converted hands.

Settings of the client room for FulPot Converter to work correctly

Do not forget to put a tick in the client settings opposite to "Save hand history". Run the client as administrator.

Does

the Converter support other disciplines and types of poker?

You can talk about

incomplete support. It recognizes hands, but due to insufficient information in the hand history files, it fills in the spaces with random values. This causes difficulties when playing in MTT/SnG or Omaha and it is worth using this information very carefully.

How can I pay FulPot Converter?

You can buy an annual license for FulPot

Converter for WebMoney, Skrill, Neteller, PayPal, other payment systems, try FulPot Converter for free and get a discount on your next purchase.
