Complete guide to install and configure the converter and HUD for PPPoker

Over the past

few years, mobile poker apps from Asia have become a breath of fresh air for professional players. Very lucrative pools and weak opponents have become a powerful argument for the poker migration. And the constantly deteriorating playing conditions in the leading poker rooms stimulate even the most conservative players to seek alternatives.

One of the most popular mobile applications is PPPoker. In terms of traffic volume, PPPoker significantly surpasses most similar places for the game. The mobile poker room regularly holds various promotions to attract new players, signs contracts with professional players, and even conducts large offline series. Everything seems to be good, but what's the catch?

The catch lies on the surface: PPPoker is a mobile poker application, which means that neither PokerTracker 4, Holdem Manager 3, Hand2Note, nor DriveHUD can directly import hand histories from there. Hence, no HUD and no statistics while playing. Are we putting an end to the plans to develop new PPPoker waters? No matter how it is! There is a solution and it is called "PPPoker HUD Catcher".

What is PPPoker HUD Catcher?

PPPoker HUD Catcher is a poker program that works in conjunction with Holdem Manager 3, PokerTracker 4, Hand2Note, DriveHUD and allows you to display HUD and import hand history while playing in the PPPoker application. Unlike most other Asian poker applications, PPPoker has recently had a significant advantage - an official client for Windows. In practice, the availability of PPPoker on PC also saves you from a headache of setting up Android emulators. HUD

Catcher works both at cash tables and in tournaments.  
The poker room does not prohibit  
the use of poker trackers (although there is no separate list with allowed programs on  
PPPoker). In practice, no one had any problems with the HUD.

#### How to install PPPoker HUD

##### Catcher?

Installing PPPoker HUD Catcher is very simple:

1. Go to the official website  
of the developer and click "Download free trial today";
2. Select the folder where the  
program will be installed and click "Install". The installation file weighs 22  
megabytes;
3. Within a minute Card Catcher will be installed on your computer. Click  
"Launch".

#### How to activate PPPoker HUD Catcher free trial?

Before purchasing a license

for PPPoker HUD Catcher, we strongly recommend that you try the free trial first. It is  
provided on the developer's website. The trial version will work without restrictions  
on functionality within 7 days from the date of activation. The procedure for obtaining  
a trial is also very simple:

1. Start Card Catcher;
2. In the first window after the  
start, you will be offered a choice between trial version, purchase or registration.  
Click on "Trial";
3. You will be prompted to enter your email to activate the trial  
version. Enter your e-mail and click OK;
4. Congratulations - the trial version of  
PPPoker HUD Catcher is activated.

#### First launch of PPPoker HUD Catcher

When you start

PPPoker Card Catcher for the first time, you will be prompted to select your  
database.

PPPoker Card Catcher supports:

DriveHUD;  
Holdem Manager 2;  
Holdem Manager  
3;  
PokerTracker 4;  
Hand2Note.

Hands are also imported into Holdem Manager and Poker  
Tracker 3, however the HUD will not work in old versions of trackers. Card Catcher will  
automatically configure your import folders. However, we recommend that you  
double-check to make sure the database is being imported from the correct folder. We  
will tell you how to do this separately for each tracker below.

#### How to set up PPPoker

##### HUD Catcher for PokerTracker 4?

1. In PokerTracker 4, check the import folder setting  
by clicking "Configure" in the top menu options. Then click "Site & Import Options".  
Select iPoker from the list of poker networks on the left. Make sure the checkbox next  
to "Get Hands From Site While Playing" is checked. Make sure the path to the correct  
folder is specified in the "Directories Configuration". If you used the default  
installation directory, it will be: C:\Program Files (x86)\Ace Poker Solutions\PPPoker Card Catcher\HandHistories. If it's not there, click the "Add" button and

add: C:\Program Files (x86)\Ace Poker Solutions\PPPoker Card Catcher\HandHistories. Click OK and close the screen.

2. Start the PPPoker client and log into your account.

3. After import folder is configured properly, make sure PPPoker Card Catcher shows "Stop Catching" message (which means it loads hands while playing and creates hand histories) in the main interface. If for some reason this does not happen, click "Stop Catcher".

4. Finally, in Poker Tracker 4, click "Play Poker" and "Get Hands While Playing".

5. Load multiple tables using the PPPoker app and start playing. The HUD will need a few hands to work properly and then it will appear on the tables.

How

to set up PPPoker HUD Catcher for Holdem Manager 2?

1. In Holdem Manager 2, click on

"Site Setup". On the left side of the preferences window, choose "iPoker". Under Auto Import Folders, make sure the correct (PPPoker Card Catcher) import folder is selected. If you used the default installation directory, it will be: C:\Program Files (x86)\Ace Poker Solutions\PPPoker Card Catcher\HandHistories. If it's not there, click the green plus button and add: C:\Program Files (x86)\Ace Poker Solutions\PPPoker Card Catcher\HandHistories. Click "Close" to complete the settings.

2. Start the

PPPoker client and log into your account.

3. After import folder is configured properly, click "Start Catcher" in PPPoker Card Catcher.

4. That's it, import is set

up. You may need to click on "Stop HUD" and "Start HUD" on the "Active Session" screen of Holdem Manager, but this is not necessary.

If you want to manually attach the HUD,

follow these steps:

In Holdem Manager 2, click the "Active Session" tab. Choose whether you are playing cash games or tournaments and then click "Stop HUD".

Then click "Start

HUD" and wait until you have played at least one hand on the table you are sitting at.

Once you play your hand, click the Table Finder button.

In the table search pop-up

window, select one of the tables you are playing at, and then right-click and hold down the cross in the lower left corner of the screen and drag it to the corresponding table name. Make sure to match the table you selected first to the table you are now dragging the cross to.

Finally, he will ask you if you want to add a HUD to this table. Make sure the table name is correct and click OK. Repeat the steps for each table you play at.

How to set up Card Catcher for Hand2Note?

Important: close Hand2Note before installing PPPoker Card Catcher.

1. Open the menu in Hand2Note (3 bars in the upper left corner of the tracker);

2. From the list that appears, select "Configuration" (the last line);

3. In the "Auto Import Folders" section, check if the PPPoker Card Catcher folder is selected. If you used the default installation location, the folder will look like this: C:\Program Files (x86)\Ace Poker Solutions\PPPoker Card Catcher\

Handhistories. If it is not in the list, click the "Add Folder" button and in the folder add: C:\ Program Files (x86) \ Ace Poker Solutions \ PPPoker Card Catcher \ Handhistories. Click "Save" in the upper right corner and close the settings window.

4.

Start the PPPoker client and log into your account.

5. After import folder is

configured properly, click "Start Catcher" in PPPoker Card Catcher.

How to set up

PPPoker HUD Catcher for DriveHUD?

Once you've selected DriveHUD as your default

database, there is nothing else you need to do or configure. Make sure you download PPPoker Card Catcher first and then your PPPoker client. Wait for at least 1 hand to be played and your HUD will appear after that.
