Use Our Free Sure Bets Calculator for Sports Arbitrage

The free sure bets calculator is

the best tool that you can use in any form of sports arbitrage. The calculator is as effective as it gets for checking of odds available to create an opportunity for a sure bet arbitrage. It is also an excellent tool for correcting any stakes for any of your outcomes of the sure bet. The sure bet guarantees a specific profit amount whether or not the outcome is what you had in your expectations.

The sure bets calculator is

relatively straightforward with a straightforward interface. Calculating stakes can be done in different ways. You can use it for both 2-way and 3-way bets. This is possible when you have more than two possible outcomes, such as a draw, win, or a loss. It is important to note that the calculator supports the odds in decimals. IT is still possible to use other odd formats, but you may need to use odd converters to change them to the recommended format.

The sure bets calculator also allows you to check if it

is possible to arbitrage some bet offers. You can determine if they are not suitable for arbitrage too. Sizing your bet output gives you an upper hand in optimizing the sure bet. Maximum gain is what you are aiming for, and the sure bet calculator is perfect for this.

How to use our Surebets Calculator

This sure-bet calculator is a

straightforward tool. You only need to input the odd values on the specific sections and click calculate. The results will pop out immediately, and you can gauge your data from that. If you have the first odd as 1.42 on a team to win and a 4.10 on the other team to win or draw, the two teams will have different stakes, such as £100 on the first team and a less amount on the other team such as £20, whichever the outcome, you will still get the profits from both sides. The calculator gives you a direction that you can use for the arbitrage.
