The bet sizes available in Masters of Valhalla range from 10p to £12.50.

Betting in this game is fixed at 1,024 paylines.

### Wild God Re-spins Feature

Whenever a Wild appears in Masters of Valhalla it is animated to a chest. This gives you the opportunity to activate the Wild Gold Re-spins feature.

This game features four separate Wild symbols, with different colours: Green, Orange, Blue and Purple. Each of these Wilds will randomly activate their individual linked Wild God Re-spin. Only one Wild symbol can be shown on any spin in this game.

The Wild symbol that activated the bonus will be stuck to the reels, and between one and 19 additional Wilds of a matching type are added to the reels at random.

A single re-spin is awarded, and the reels will be stacked with the God that corresponds to the colour of the Wild that triggered the feature. All of the other high-value symbols will be removed from the reels.

Every Wild has the same value, irrespective of its colour.

The Wild symbols can substitute for all other symbols on the reels, excluding the Valhalla Bonus symbol.

**Green Wild** - This activates the Wild Freya Re-spin, and between one and 19 additional Green Wilds added to the reels. Freya symbols will stack the reels.

This activates the Wild Freya Re-spin, and between one and 19 additional Green Wilds added to the reels. Freya symbols will stack the reels. **Orange Wild** - This activates the Wild Odin Re-spin is triggered, and between one and 19 additional Orange Wilds added to the reels. Odin symbols will stack the reels.

This activates the Wild Odin Re-spin is triggered, and between one and 19 additional Orange Wilds added to the reels. Odin symbols will stack the reels. **Blue Wild** - This activates the Wild Thor Re-spin, and between one and 19 additional Blue Wilds added to the reels. Thor symbols will stack the reels.

This activates the Wild Thor Re-spin, and between one and 19 additional Blue Wilds added to the reels. Thor symbols will stack the reels. **Purple Wild** - This activates the Wild Hel Re-spin, and between one and 19 additional Purple Wilds added to the reels. Hel symbols will stack the reels.

## Valhalla Bonus and Valhalla Bonus - Berserk Features

When three scattered Valhalla Bonus symbols hit reels 1, 3, or 5, the Valhalla Bonus is unlocked if you failed to complete the Berserk Booster Collection feature. You start with three free spins. If you completed the Berserk Booster Collection feature and three scattered Valhalla Bonus symbols land anywhere on reels 1, 3, or 5, the Valhalla Bonus - Berserk is initiated, and you begin with four free spins.

The triggering symbols will have three shield symbols with values between 1-50x drawn in their positions on the reels.

The number of free spins you have left will reset to its starting allocation when a new Shield or God symbol hits.

Shields - Valued from 1x to 50x. Shields are wooden if their values are less than 10x, and anything above that will turn them golden.

Valued from 1x to 50x. Shields are wooden if their values are less than 10x, and anything above that will turn them golden. God symbols - These symbols interact with either the multipliers that were displayed on the reels before or during the spin, or symbols that appeared on the reels during and after the spin.

On your free spins, all values in the symbols are indicated and paid out as multipliers of your triggering bet size.

A maximum of three Hot Spots will randomly be placed on the reels as they stop spinning. You are more likely to produce a God symbol on a Hot Spot than you are on a standard position on the reels.

### God Symbols

Every God symbol in Masters of Valhalla has its own value.

Freya - The Freya symbol's value multiplies all of the symbols that land during or after the spin that the Freya symbol appears on until the end of the bonus.

The Freya symbol's value multiplies all of the symbols that land during or after the spin that the Freya symbol appears on until the end of the bonus. Thor - This activates the Thor Reel Expansion feature. When the Thor symbol has landed the reels will increase in size to a potential 5x6.

This activates the Thor Reel Expansion feature. When the Thor symbol has landed the reels will increase in size to a potential 5x6. Hugin and Munin - The value this symbol was displayed with will be added to all of the symbols that were shown on the reels prior to and during the spin.

The value this symbol was displayed with will be added to all of the symbols that were shown on the reels prior to and during the spin. Odin - This symbol adds the value it appeared with to all symbols that were shown on the reels prior to and during the spin that it was produced on. This applies until the end of the bonus.

This symbol adds the value it appeared with to all symbols that were shown on the reels prior to and during the spin that it was produced on. This applies until the end of the bonus. Garmr - The sum of all the other symbols on the reels will be collected, and this sum is added to the Garmr symbol when it lands.

The sum of all the other symbols on the reels will be collected, and this sum is added to the Garmr symbol when it lands. Hel - This symbol accumulates the values of all of the other active symbols, and this is added to the Hel symbol until the end of the bonus.

If a Freya symbol was displayed before the spin or on the spin, it will initially multiply all symbol values that appeared on this spin. The God symbols will then be activated starting in the top left, and this takes place in individual rows.

The bonus ends when no new symbols were produced on the final free spin, or if all of the spaces on the reels have been filled.

If you have revealed all of the extra rows, and if every position is filled on the reels, the bonus will conclude. You will then be awarded a fixed prize of 500x your bet, and this is paid on top of your overall win.

Every indicated value on the symbols will be added together at the end of the bonus, and this will be paid as your overall win from the feature.

If you achieve the maximum win in this game, which is 20,000x your bet, then all other wins are ignored and the game concludes.

Your free spins will be played with the same bet size that was active on the triggering spin.

When you are taken back to the base game, the Berserk Booster collection value resets to its original value.

#### Berserk Booster Feature Rules

Land a Bonus symbol on reels 1 or 3, or trigger the Valhalla Bonus by landing the Gate symbol on reels 1,3 and 5, and you will boost the the Berserk Booster meter by a single step. The Berserk Booster mode is activated if the meter reaches a total of 10 steps.

The next time that the bonus is initiated with the same triggering rules applied for the Valhalla Bonus, you will get to play the Valhalla Bonus - Berserk. If the Berserk Booster is completed on a spin that also triggers the bonus, then you will unlock the Valhalla Bonus - Berserk.

The Berserk Booster is collected and stored on every bet you place, and when you change your wager the collection will restart. An information dialog is shown when you change your bet for the first time in Masters of Valhalla, which details how the Berserk Booster is collected and stored per bet.

When you are redirected to the base game from the Valhalla Bonus - Berserk, the Berserk Booster collection value will be reset.

Return to Player

Return To Player (RTP): 96.00%

The expected return is the amount we pay out to players relative to the amount of wagering on the game.

For example, if we take £100 of wagers we will, on average, pay out £96.00.
