This article is about the men's football tournament in Portugal. For the women's football tournament in Portugal, see Taça da Liga Feminina

Football tournament

The Taça

da Liga (Portuguese pronunciation: [tas ð li]), known outside Portugal as

Portuguese League Cup, is an annual club football competition organised by the Liga Portuguesa de Futebol Profissional (LPFP) for teams competing in the top two tiers of

Portuguese football – the Primeira Liga and Liga Portugal 2.[1] Unlike Portugal's other domestic cup competition, the Taça de Portugal, the winners of the Taça da Liga do not qualify for European competitions.

The Taça da Liga was established in the 2007–08

season, thus becoming the third official competition for professional clubs in

Portugal,[1] after a proposal by Sporting and Boavista was approved by LPFP members on 28 November 2006. For sponsorship reasons, it is currently known as Allianz Cup (with the English word cup).

Benfica are the most successful team in the competition, having

won seven trophies (four of which consecutively between 2008 and 2012). The current holders are Porto, who defeated Sporting CP in the 2024 final to secure their first

title.

Format [edit]

The Taça da Liga format has suffered changes throughout the

competition's history in order to increase the number of matches and also revenue for both clubs and LPFP. Starting in the 2024–22 season, the format is the following:

First

round – One-legged ties between all Segunda Liga teams (except reserve or B teams), the ten Primeira Liga teams ranked 7th–16th in the previous season, and the two teams promoted from the Segunda Liga, with the winner advancing to the next round.

–

One-legged ties between all Segunda Liga teams (except reserve or B teams), the ten Primeira Liga teams ranked 7th–16th in the previous season, and the two teams promoted from the Segunda Liga, with the winner advancing to the next round. Second round – One-legged ties between the first-round winners and the two Primeira Liga teams ranked 5th and 6th in the previous season. The winners advance to the next round.

– One-legged

ties between the first-round winners and the two Primeira Liga teams ranked 5th and 6th in the previous season. The winners advance to the next round. Third round – Four groups of three teams played in a single round-robin format, each containing two second-round winners and one of the four top-placed Primeira Liga season teams of the previous season. The group winners advance to the next round.

– Four groups of three

teams played in a single round-robin format, each containing two second-round winners and one of the four top-placed Primeira Liga season teams of the previous season. The group winners advance to the next round. Knockout phase – Semi-finals and final played as one-legged fixtures played in a neutral ground.

For 2024–23, due to fixture

congestion surrounding the 2024 FIFA World Cup, all Segunda Liga and Primeira Liga teams (except reserve or B teams) were placed into 8 groups (6 groups of 4 teams and 2 groups of 5 teams), with the group winners advancing to the knockout phase, consisting of quarter-finals, semi-finals and the final. All knockout stage games are one-legged fixtures, with the semi-finals and finals still played in a neutral ground. All group stage games and the quarter-finals were played during the international break surrounding the World Cup.

Resumen: La lucha de Don Schreiber contra la fractura hidráulica en Nuevo México

Don Schreiber, un septuagenario de Nuevo México, se convirtió en un defensor ambiental después de que la fractura hidráulica comenzara en su propiedad rural. Él y su esposa Jane compraron la tierra en 1999 como un lugar tranquilo para jubilarse, pero descubrieron que no poseían los derechos de subsuelo. Cuando la fractura hidráulica llegó a la zona, las compañías de gas comenzaron a perforar pozos, colocar oleoductos y cortar carreteras a través del suelo del desierto frágil. Esto llevó a la erosión y la contaminación del agua, y Schreiber se convirtió en un activista contra la fractura hidráulica y el cambio climático en el área de San Juan.

Los efectos de la fractura hidráulica en Nuevo México

- La fractura hidráulica ha llevado a la erosión y contaminación del agua en el área de San Juan en Nuevo México.
- Hay más de 20,000 pozos de fractura hidráulica en la zona, cada uno de los cuales representa una amenaza a largo plazo para el medio ambiente local.
- La fractura hidráulica ha llevado a un aumento en la contaminación por metano en la zona, un gas de efecto invernadero más potente que el dióxido de carbono.

La lucha de Don Schreiber contra la fractura hidráulica

Don Schreiber, un septuagenario de Nuevo México, se convirtió en un defensor ambiental después de que la fractura hidráulica comenzara en su propiedad rural. Él y su esposa Jane compraron la tierra en 1999 como un lugar tranquilo para jubilarse, pero descubrieron que no poseían los derechos de subsuelo. Cuando la fractura hidráulica llegó a la zona, las compañías de gas comenzaron a perforar pozos, colocar oleoductos y cortar carreteras a través del suelo del desierto frágil. Esto llevó a la erosión y la contaminación del agua, y Schreiber se convirtió en un activista contra la fractura hidráulica y el cambio climático en el área de San Juan.

Schreiber es probablemente el opositor más destacado a la fractura hidráulica en el área de San Juan y uno de los activistas climáticos más visibles de Nuevo México. Con elocuencia y humor, comparte su experiencia personal con las consecuencias de la fractura hidráulica y su

conocimiento de la ciencia, la geografía y las leyes detrás del auge de la fractura hidráulica y los problemas que trae.
