At first, My

Little Pony online was just a toy line with cute little colorful ponies, but starting from 2024 until 2024, the toy line went from the markets to the TV screens of little girls around the world, and it has brought a lot of color, magic, and love for ponies for girls all ages until they become teenagers. The franchise moved from just making toys to making TV series, movies, and even full cartoons with exciting adventures, magic, and helping the girls grow up and learn how to deal with failure, happiness, and criticism when it's due, and so the kids that watch this show can get educated and start to form their own personalities that might be like the ones of their favorite characters.

The cute My Little Pony game's story

The first toy that was made from this

now worldwide franchise was named My Pretty Pony and it started in 1981 when the factory made a very small pony made from plastic with a few hairs that had different colors based on the character that the kids wanted to play with. It was a revolutionary toy for that time because you could have to wiggle its ears, move its tail, and wink with one of the toy's eyes. There were made even baby pony figurines of the Beautiful Baby and the My Pretty Pony series that continued with two new colors which are pink and yellow.

In 1982, the first toy was made, and there were six ponies that looked different, that had each a different color, and a cute little symbol on the back hip of the pony, which is a trademark of the series, and each and every one of the ponies or the families will have a sign, and they can be from apples, rainbows, sparkles or candy to lightning or clouds, and that will help you distinguish the pony families and your favorite characters from the rest.

The story of the pink, red, yellow, or green ponies started to become even more popular in 1998, when there was the very first My Little Pony game: Friendship Gardens game was released, in which there were four ponies that needed help to grow and take care of a full-on garden. You have to plant near the house a lot of plants - vegetables or fruit - that will help the ponies to eat when they are hungry, so the game is important to keep the pony that you love to survive day after day. Using the mouse, you would have clicked on a patch of land, and you started to plow it, making the land perfect to plant seeds, water them, give them sun, take care of them if they have pests, and be sure that you will manage to harvest them when they are ready, and so all the cute ponies will have healthy fresh food to eat.

Between 2003

and 2009, the main story the started to be even more popular, and even though most of you had at least one toy or puppet with the cute ponies, they are already the third generation that came out of the factory, and they started to be more popular than ever because it's a new series of toys in which Twilight Sparkle, Rainbow Dash, Applejack, Pinkie Pie, Fluttershy, Rarity, Princess Luna, Princess Celestia or Apple Bloom are going to be even cuter than before, and so the TV show started to hit the world, and the girls loved the show, and so they started to follow the ponies in their magical adventure in the world behind the rainbows.
