3 days free trial version is available. You need to contact a PokerEnergy representative via any convenient communication channel indicated in the "Contacts" section of our portal.

FulPot Converter is designed to solve this problem and give you an edge over a field that does not have an array of useful data generated by statistics collection programs. The converter automatically converts the hand history of FulPot Poker into an easily recognizable Poker Tracker 4\Holdem Manager 2. Thus, you will always be one step ahead of blind opponents.

More detailed information about the program can be found on the official website . Download - in the same place.

FulPot Converter is a poker program that allows you to maximize your expectation at the FulPot Poker tables using statistical indicators and your Poker Tracker 4 and Holdem Manager 2 HUD. But format of the hand history saved by the client of the FulPot poker room is not readable by the tracking software.

FulPot Poker

Why do I need a converter if Poker Tracker 4 or Holdem Manager 2 in other networks or rooms work without them?

The need for a separate converter is caused by a special hand history format, in which the FulPot poker room keeps hands. This format is different from Pokerstars\888 and other networks where trackers work without additional tools. If you do not use FulPot, then the statistics and HUD Poker Tracker 4\Holdem Manager 2 will not be displayed at the tables.

Does the converter have a trial period?

Yes, 3 days trial version available. You need to contact a PokerEnergy representative via any convenient communication channel indicated in the

"Contacts" section of our portal.

How to install FulPot Converter correctly?

Download
the program from the developer's site;

Run the downloaded file and follow the
instructions of the installation wizard;

When the installation is completed, the FulPot
Converter shortcut appears on your desktop.

How to get a license and register FulPot
Converter?

After the first launch of the converter, you will open a small window
containing two fields: "Hardware ID" and "Key". Copy the information from the "Hardware
ID" and send it to us along with your email (to create an account). After payment you
will be sent a password that you need to enter in the "Key" field and click
"Confirm".

What needs to be configured in the Converter for correct operation?

FulPot
 Converter contains several options that must be configured:

Hand history folder (the
path to where the hands are saved in the unreadable format of the FulPot Poker);

Export
to (this is the folder where your hands are already stored in the format readable by
trackers);

HUD type;

Prefix converter (helps to avoid a situation where all
distributions will be marked as played against the "Playername" and will normally
denote their nicknames);

Currency conversion rules (translates national currencies into
more understandable and familiar USD/EUR).

Important elements of the converter setup
process

You can configure FulPot Converter automatically and manually. When you click
the "Scan for installed poker clients" button, the program will search for the
installed poker clients and the desired path.

The conversion is configured
automatically when you first start, but you can change the values at any time through
the menu "Program-Currency converting options".

You manually select a folder for import
yourself. You can select it by clicking on "..." in the Converter itself. Please note
that this folder should be located in the folder where the poker room itself is
installed.

You will also need to establish a link between the poker room and the
converter. You will be required to sit at the poker table in the client and follow the
path in the FulPot Converter menu "Program-Hand history database connection options".
The active room will appear in the list, click "Connect to database" and wait for the
status "Connected".

Folders where primary hands are saved and transformed hands should
not be the same or one to enter the other.

PT4\HM2 settings for FulPot Converter to
work correctly

Holdem Manager 2: launch HM2, click the "Home" tab, then "Site setup".

From the list of poker rooms, select Pokerstars, click on the green plus just below the
window with the addresses of folders and specify the folder where the converter imports

already converted hands.
Poker Tracker 4: launch PT4, click consistently on the "Play
poker" - "Pokerstars" - "Configure" (all are on the same tab, on the left side). In the
newly opened window, select "Site Configuration", again select "Pokerstars" and specify
 the path where the converter imports the already converted hands.
Settings of the
client room for FulPot Converter to work correctly
Do not forget to put a tick in the
client settings opposite to "Save hand history". Run the client as administrator.
Does
 the Converter support other disciplines and types of poker?
You can talk about
incomplete support. It recognizes hands, but due to insufficient information in the
hand history files, it fills in the spaces with random values. This causes difficulties
when playing in MTT/SnG or Omaha and it is worth using this information very
carefully.
How can I pay FulPot Converter?
You can buy an annual license for FulPot
Converter for WebMoney, Skrill, Neteller, PayPal, other payment systems, try FulPot
Converter for free and get a discount on your next purchase.

John Mitchell lidera a Inglaterra a una victoria abrumadora en el Women's Six Nations

E ngland's head coach, John Mitchell, antes del torneo Women's Six Nations de este año, no pudo ser más claro sobre las ambiciones de su equipo. "El potencial de este lado es enorme", dijo a The Guardian. "Hemos sido un gran equipo, pero queremos ser un equipo excepcional". El objetivo no era solo ganar partidos, sino superar cualquier cosa que hubieran logrado antes.

A la luz de este último éxito contundente en Burdeos, está claro que la misión está en marcha. Un sexto título consecutivo del Six Nations y un tercer gran slam seguido pueden parecer, a primera vista, una historia aburrida de lo esperado, pero este título destaca por varias razones. En primer lugar, fue su primer título bajo la dirección de Mitchell, cuyo sello distintivo de kiwi sin tonterías ya está dando resultados. En segundo lugar, fue conquistado en suelo francés contra una oposición digna que siguió llegando y planteó persistentes problemas.

Lo que realmente sobresale, sin embargo, es el abanico de opciones de que dispone Inglaterra. Los mejores del mundo poseen un juego a todo terreno que se puede ajustar a todas las ocasiones. Las Rosas Rojas pueden lastimar a corta distancia y destrozar a los oponentes en los extremos. Pueden sobresalir en el lineout y golpear con fuerza en el centro de la cancha, también. La única verdadera pregunta era sobre su gestión de juego bajo presión y aquí hubo pruebas oportunas del progreso también en esa área vital.

Recuerde la última Copa del Mundo, cuando fueron sorprendidos en la final por los Black Ferns en el épico partido de Auckland. Inglaterra había puesto todos los huevos en la misma cesta de avanzada y, una vez reducidos a 14 jugadoras, permitieron que Nueva Zelanda se colara y deshiciera sus sueños. Once de ese equipo del día 23 estuvo involucrado aquí, pero hay un estado de ánimo diferente en lo que están buscando hacer.

También hay un sentimiento más compuesto a mitad de cancha, donde Mo Hunt añade experiencia y energía, y un mejor equilibrio en general. Esta vez Inglaterra no tuvo tantas oportunidades de emplear a su veloc...
