Hand2Note: description and principle of operation

Hand2Note is based on the same principles as other popular poker trackers. The history of 4 the hands you have played is saved on the computer; the software loads this information and displays statistics on you 4 and your opponents. But the developers of H2N went further than the competitors from Holdem Manager 3 and PokerTracker 4 4 and created a tool with the broadest functionality on the market.

Hand2Note is the only tracker from the big three (H2N, 4 HM3, and PT4) that can display positional and dynamic HUDs on tables (keep reading to learn more about this).

HUD or 4 Heads Up Display is a unique tool that allows you to see statistics such as VPIP, PFR, 3bet, AF, etc., 4 next to the villain's nickname in real-time.

The display of advanced statistics is implemented in the form of pop-ups. But, since 4 in Hand2Note, the HUD is positional and dynamic, pop-ups become unnecessary in most cases. You do not make unnecessary "body 4 movements," do not lose concentration, and save time.

Other advantages of the tracker include the use of innovative database compression algorithms, 4 which positively affect the speed of the software. There is also a unique system of notes in a graphical form. 4 You no longer need to manually write any text.

According to professional players, Hand2Note is the best software to use during 4 the game. For deep analysis of statistics and check reports, some grinders prefer to use Holdem Manager or Poker Tracker. 4 However, this is a matter of taste. The H2N functionality is quite enough for solving these problems.

Besides analyzing the main 4 features of the software, this review will tell you how to use Hand2Note.

H2N boasts a wide variety of statistical reports 4 allowing you to identify and fix leaks in the game. There are also unique reports that HM3 or PT4 do not 4 have, such as "Win Rate at tables without weak players," "Win rate depending on fish count," and so on.

Flexible filters 4 allow you to show statistics based on players' actions, positions, board textures, bet sizes, cards, and dozens of other parameters.

Decision 4 Analysis

Decision Analysis is an additional H2N feature available with an EDGE or PRO subscription. It allows you to evaluate the 4 profitability of your calls (action profit) in various gaming situations.

Range Research

Tool for researching playing field trends. For example, how the 4 regs play on average at your

stake: how loose they 3bet preflop, how often they bet on the river, where 4 the betting range is shifted, how they bluff on average, etc.

Range Research is perhaps one of the most potent Hand2Note 4 features.

Displaying vs Hero statistics

In the HUD, ALL statistics are given with vsHero frequencies, which means how your opponents played explicitly 4 against you.

Last showdown indicator

When playing at many tables, it's not always possible to pay attention to what hands the fish 4 showed on the showdown.

The H2N developers solved this problem by creating a tool that allows you to access such information 4 in a few clicks.

Regular vs. Fish situations

Hand2Note has a function to identify amateurs and regulars. When this function is activated, 4 the program will not consider the hands where the reg played against a weak opponent since pros usually play against 4 them differently. This, the statistics will be as "clean" as possible.

Hand2Note HUD

H2N has an innovative approach to Heads up Display. 4 The program supports several types of HUDs:

Static

The same HUD used by all tracking tools. Stats are displayed regardless of your 4 position at the table and the action of players in front of you.

Hand2Note static HUD is allowed in all poker 4 rooms where trackers are permitted.

Positional

The display of statistics on opponents is based on your current position at the table.

For example, 4 in a preflop situation, when you have on BTN, the positional HUD displays only the information we need to decide 4 in this situation; namely, the 3-bet calling frequency in the blinds against a potential open-raise. Or fold to 3bet and 4 call to 3bet against BTN on the players to our right.

Positional HUDs are prohibited on PokerStars.

Dynamic

Displays statistics based on the 4 actions of opponents in hand. For example, it shows the frequency of opening from an early position only if this 4 opponent has made an open raise from UTG.

Dynamic HUD solves the problem of not having enough space in the table 4 to display everything you need. Hundreds of stats in one compact block are now a reality.

The dynamic HUD supports the 4 output of hand matrices directly to the tables based on frequencies. Thanks to this feature, there is no need to 4 use popups in many spots.

The use of dynamic HUDS is prohibited on PokerStars.

Automatic HUD

Independently determines the statistics that will be 4 useful in a particular situation and dynamically displays them at the tables.

The most exciting feature of AutoHUD — it does 4 not require any settings in the editor since the program chooses the necessary stats automatically. It can be used together 4 with the default display as a compliment.

If you wish, you can disable this feature in the settings.

Visualization of frequencies and 4 ranges

The tracker allows configuring Heads up Display and popups so that you can see heat maps of hands and a 4 graphical display of the frequencies of opponents in different scenarios.

This facilitates the process of working with stats in real-time.

Quick Notes 4 in H2N

The quick note system allows creating notes on your opponents with just two clicks. This feature will appeal to 4 multi-tablers. Of course, you can create a template in advance.

H2N also allows adding the entire hand in the notes in 4 a graphical form.

Another essential feature is that you can link notes to specific stats.

For example, suppose you find that your 4 opponent overbets on the river with a particular range. In that case, you can link this note to the "Bet 4 River" stat instead of placing it in the general area. This approach makes it easier to read notes if you have 4 many per player.

Here you can configure HUD profiles and popups, create your own stats, or integrate complex elements such as:

Preflop 4 and postflop charts.

Multilevel tabs.

Badges.

Details about the showdown.

High performance

H2N has the fastest hand import feature among other trackers (up to 10,000 4 hands per second).

Also, the hand database takes up very little hard drive space.

For example, 1 million hands require only 4 about 500 megabytes.

H2N also has a high response rate: popups, charts, notes are displayed instantly after clicking.

And this, although 4 many times more statistical data will be displayed than you are used to.

Hand2Note and PokerStars

PokerStars has introduced restrictions on some 4 H2N features. In all other poker rooms where trackers are allowed, the tool works without restrictions.

Hand2Note automatically activates all restrictions, 4 so there is no need to worry about receiving a warning from the room.

What is prohibited on PokerStars?

Positional and dynamic 4 HUD

Preflop and postflop charts, hand matrices, heat maps (instead, only a list of hands categories will be displayed)

Automatic color labels 4 on players

Noem diz que o Cricket era "a 9 imagem da pura alegria".

"Eu odiava aquele cão", escreve Noem, acrescentando que Cricket tinha se provado 'inadequada' e não era nada 9 inútil como um cachorro de caça".
