## About This Game

The game consists of 4 parts:

- basic skills:**1: For the stand-alone game, you can play tournament games and heads-up games against professional-level AI opponents. The current price is R\$50. In the next version, the nash solver real-time calculation and decision-making function will be integrated in the decision assistant of the game. The price will be raised to R\$100, just to let you experience the value of GTO technology in real-time games.
- Advanced Features:**2: A complete set of Texas Hold'em calculation tools.
- Simulator function:** It can be used as an online Texas Hold'em game auxiliary tool for real-time calculation of various data and decision-making assistant tools, as well as a post-match review tool, or use the simulator as a hand training device.
- Hand trainer:** In the game, you can freely set your hole cards or a custom range, or set a certain type of player range, so as to train. These tool functions will be removed in one version and placed in another Poker Solver product. The entire new Solver tool product will be priced at R\$100/year, and the assistant inside will be R\$99/month, R\$799/year. The simulator, which integrates the computing power of the new version of Poker Solver, has been making steady money in real money games. The whole set of tools is better for live games than <https://rangeconverter/>. The Poker Assistant assistant version costs R\$5,000. The core functions of the new version of Poker Solver:

- Solver tool set,** with Pio Solver's Nash solver computing ability to solve the Headsup two-person game, and also has the core computing ability of 2-9-person table optimizer
- multi-player Nash Solver,** and cooperates with the poker simulator to complete the real-time Ability to calculate and review.
- Poker complete set of mathematical calculation tools (Poker Tools).**
- Simulator and Assistant (Assistant),** to meet the real-time calculation of the game and decision-making ability, as well as the resumption calculation ability.
- The existing game function will become a customized practice function (Quiz),** and 500 WSOP best hands are customized, and you can only play these specific hands. The version you buy now does not integrate these Solver product functions. This version only meets the AI battle function and specific card and range training functions of the same professional player level. At the same time, other Poker Solver tools do not have the game battle function in the Single player stand-alone game. Different products solve different problems. However, the AI in the Single Player stand-alone game will integrate the Nash Solver computing power when the upgraded version is released, allowing you to experience the effects and functions of the Solver. Although the current version does not have Nash computing, it can basically guarantee 70% of the decisions are correct.

up. The new version of Poker Solver will be released in March 2024, and this Single player stand-alone game will be updated at the same time. This means that until March 2024, buyers can still experience the advanced features in Single player stand-alone games. The removal of these advanced features does not mean that the product is devalued. In the new version of the game, there are 4 advanced strategies for you to configure freely. In the game interface, you can still see the data analysis capabilities displayed by various upgraded advanced tools. The data displayed by these real-time calculations is valuable knowledge. The 4 strategies include:

- Pio Preflop Chart**
- Push/Fold**
- Nash Equilibrium Solver**
- 10 Groups Range**

The table below shows the functional price comparison between the computing tools in the game and other Texas-related computing products on the market. In this game, you can freely organize the table, freely set the blind level, freely set the hand range of each opponent, freely set the opponent's AI type, and freely set your own hand range, so that every time you deal You're dealt cards in this range, and you're free to set one of the 20 good cards for a definite workout. In the game, the complete real-time calculation of each player's various winning rate data on each street, listening to the winning rate, and EV data saves you from the trouble of manual calculation, and will also give you AI decision-making suggestions from professional textbooks. These ensure you can complete on-demand training. and judging whether it makes sense to you. The complete display of these information in the game is also to help you analyze the game, so that you can know the logic of your own winning and losing, where you win and where you lose. There will no longer be any free version on the mobile phone, nor will there be any advertisements, and there will be no

advertisements on all versions of the entire platform. New products and new features will be continuously released and updated. In the past two years, I have been researching and practicing the ability of Poker Solver, and will complete the release of new products next year. Extremely powerful solver ability. Regarding the price of the game, it will only become more and more expensive, because I am making more and more money in the game, so why should something of value be cheap. This is the long-term value compounding of self-development. Be careful and make valuable products, which is the original intention and purpose.

manual core function: 1: Click the function board card to set the community card, and click the hole card icon to set the hole card. 2: Different player types can be set, and each player has a different range of actions. These ranges also determine different action logics. 3: Equity calculator, draw equity calculator, EV calculator, real-time poker simulator tool. 4: Real-time poker simulator tool, this is the most important for online professional players, which greatly simplifies the time consumption of thinking and performing calculations. 5: Advisor (advisor) provides you with a standard play, the basic guarantee is not to lose money. 6: Before the action decision, provide the EV value of different actions and bet size. 7: Practice the advisor and action EV in the battle mode.

Core value points: 1: Poker simulator tool: When playing poker online, professional players can display the complete mathematical data immediately after entering the opponent's range in real time according to the situation of the game table, saving users calculation time and energy, and providing standardized behavior suggestions. These real-time and accurate calculation data and standardized action suggestions help players make quick decisions. Value point: It saves the player's energy consumption in mathematical calculations in the game, and allows the player to invest more energy to focus on the accurate determination of the player's playing range and the use of real-time data to make decisions based on experience. Real-time display of all poker game data, which is not available in other tools. I combined the various data calculation functions scattered in multiple Texas poker calculation software into the real game. The player only needs to determine the opponent's range. In the simulator, Preflop and postflop are also purchased professional range action data, which can be set in the simulator: stacks deep, bet size, and player position to see the real-time advisor. Now this advisor is conservative. range data comes from rangeconverter/solution\_formats/eight\_max-MTT-Complete-Postflop-Addon-NEWOnlineViewer-yearly

The core of the simulator is that you need to have the ability to judge the opponent's range of action. This is also one of the most basic and most important abilities of playing cards. If you don't have the ability to display the range of Texas Hold'em at all, then you can use this tool to repeatedly play poker to familiarize yourself with the range. In the battle mode I provide the ability to display the range in real time. Let you clearly see how different people in different ranges play, and those actions are standard textbook play styles for professional players. Real-time display of complete data: The data standard provided comes from the result of 10,000 times Equity calculated by Monte Carlo method. In the battle mode with AI, you need to turn on the observer mode switch (observer) Data in the avatar frame: 1): EV: 0.70BB, indicating the EV data after the current operation. BB stands for the big blind value. 2): equity data for each street: 2r: 4; 12.93%. Format: 2r (to river equity, calculated to river street Equity): rank (in the current surviving players, own 2r Equity ranked); equity (own real-time 2r Equity, 2r Equity calculated from your own perspective). Indicates that the Equity data to River Street is calculated based on the player's own hole cards against other players' range or hole cards. nd: 1; 72.67%. Format: nd (next street equity, your own Equity on the next street): rank (ranked your own nd Equity among the current surviving players); equity (your own real-time nd Equity, nd Equity calculated from your own perspective). Indicates that the nd Equity data to the next street is calculated according to the player's own hole cards against other players' range or hole cards. cp: 1; 88.23%. cp (current street pure equity, the pure Equity of one's current street): rank (ranked of one's own cp Equity among the current surviving players); equity (your own real-time cp Equity, cp Equity calculated from your own perspective). Represents the calculated cp Equity data on the current street based on the player's own hole cards against other players' range or hole cards. Outs: 30, which indicates the number of draws made by players on that street. At this time, you can open the hands card strength information table, and you can see the probability of the current hole cards

and board cards developing to various draws on each street.1: In preflop and river street, showing 2r is enough.2: On flop, turn street: displays the complete 2r, nd, cp data, and on flop, turn street, you can see the outs data of the player in that street at the same time. These real-time Equities and draw data assist in determining the hole cards against other players' hole cards or ranges, their own hands card strength and winning ability, and help them make action decisions on various streets. The betsize window at the top of the interface shows the human player (self) under the current action menu, the EV value ranking of each action in the action menu, the leftmost is the best, and it decreases from left to right (if there is only the leftmost data, then it is According to EV evaluation, this action is the most appropriate, and other actions do not need to be considered). This is based on the action logic shown by the EV. This is also the EV data of each action calculated by the player himself before the action. (The EV data in the avatar range is the EV data after the action, and the meaning of the two is different). This 4-speed EV table of betsize is the data display for making decisions based on EV when displaying the street. In fact, EV has no absolute correct meaning in action guidance before and after the flop (preflop and postflop), and it is not correct to make decisions based on the positive and negative EV. Advisor (Advisor): Shows the decision in this street, comprehensively assessing the following content: player's hole cards, opponents' range or hole cards, current own 2r, nd, cp Equity data and Equity ranked, and the player's own position Table position, player's current stacks deep, current number of people remaining at the table, EV data of each action in the current menu, and bankroll management. The current advisors tend to be conservative, and the goal is to try not to lose money. Advisor also implements a standardized pre-flop strategy in preflop. Advisor also implemented the post-flop strategy suggested by rangeconverter in postflop. In the battle against AI mode, you need to turn on the advisor mode switch (observer). Click on the user's avatar to open the user's scope, view or set the scope. Click on the hole cards, you can open to view or set the hole cards. Click on the board card, you can open to view or set the board card. In the simulator, click the D icon to switch the position of the dealer. Click the gray D icon to reset the position of the dealer. Regarding range setting or selection:1: Provides the standard range for various filling actions in the preflop stage.2: Provide 24 kinds of action ranges commonly used by professional players. Each professional player divides all hole card combinations into 10 action groups. You can see the action ranges of tag, lag, rock, maniac, and nit players.3: Provides a view of the opponent's mathematical action range based on the opponent's vpip and pfr. Vpip and pfr can view these two values of opponents from third-party statistical software licensed online, such as holdem manager 2. The graphical Equity calculator provides a complete and correct Equity calculation function. I provide complete toflop, toturn, toriver's montecarlo and Enum calculation methods. It has the same effect as Power-Equilab, and its own data is guaranteed to be correct. When Power-Equilab calculates toflop and toturn, the data is often incorrect (why it is not, you will know by playing with his montecarlo and Enum methods, the longer the calculation, the greater the deviation of the two data, which is wrong), But the calculation result of to river is correct. It sells for R\$40/year. It does not have a real-time calculation method in the game. It is not suitable for actual combat, but only for review calculations, lacking actual combat significance. The provided Equity calculator, draw calculator, and EV calculator are all to ensure that you know the correctness of the data calculation results and allow you to trust the correctness and stability of the function. The AI in the battle mode comes from the range of 24 professional players. You can conduct targeted range confrontation strategy training.1): Various AIs and advisors use the same standard professional gameplay action logic. The difference from yours is only the hole cards and the action range.2): 14 types of chip depths (10BB~100BB, 200BB) are provided (different medals will open different new chip depths, and different chip depths will have different playing methods). Because of the different chip depths, the card game will be played The strategy is completely different.3): AI adopts the textbook style of professional players. You can understand the AI's action logic in thousands of matches, you can learn this action logic, and you can also find the corresponding exploiting AI logic. Repeated training can help you quickly identify the opponent's ability and the opponent's range. If it is in Steam, there is no sound.0: under \Steam\steamapps\common\Solo King-Single Player Texas Holdem Poker\Windows\_Release, rename Windows\_Release to

Windows\_Release11: Adjust your computer sound controller.2: You can download the game from D:\Steam\steamapps\common\Solo King-Single Player Texas Holdem Poker\Windows\_ReleaseMove another folder, and then click TexasHoldEmSingle.exe to have sound.

E F

2 de agosto foi a noite aberta para Sheepfolds Stables, um local 4m entretenimento na margem norte do Wear que substitui os sucata e terra abandonada antigamente situada entre o Estádio da Luz com bares. As pessoas falava cartola betfair uma agradável tarde ao vivo música à luz solar ou bebendo sob sol...

Uma passarela está sendo construída para ligar Sheepfolds e o estádio com a Keel Square, que fica algumas centenas de metros rio acima do centro tradicional da cidade. Há um esforço consciente cartola betfair reorientar Sunderland no eixo funcionando desde os 2.000-capacidades Empire Theatre e seus espaços de artes associadas através do desenvolvimento escritório no local da antiga Cervejaria Vaux para o estádio. Após anos cartola betfair estagnação, há finalmente uma sensação...

O clima era de satisfação, otimismo e alívio cartola betfair um projeto regenerativo trazido à fruição - rapidamente se tornou desespero. Menos da meia milha dos Sheepfolds ; manifestantes entraram com a polícia na Praça Keel Um carro foi derrubados para incendiar uma delegacia que estava pegando fogo enfermeira filipino no caminho do hospital real foram atacado por policiais alvejados contra mesquita!

Além da violência imediata, do terrível sentimento de choque e medo há repercussões econômicas. Na quarta-feira o Império cancelou um desempenho dos

O Mágico de Oz

enquanto a universidade fechou todos os edifícios do campus às 17h cartola betfair resposta à ameaça de mais violência. A organização Sunderland Business Improvement District (BID) falou sobre seu medo que as revoltas impediriam pessoas entrar na cidade com consequências óbvia para o negócio, e não é uma Cidade capaz facilmente pagar tais perdas

Na manhã seguinte, enquanto dezenas de pessoas se reuniam no centro do Sunderland para ajudar com a limpeza foi impressionante quantos estavam cartola betfair camisas. Um homem vestindo uma camiseta branca 1996-97 disse à como ele sentiu que os tumulto "representaram mal o clube e da cidade", algo muito revelador na formulação

A limpeza após uma noite de violentas manifestações anti-imigração cartola betfair Sunderland, com alguns voluntários nas camisa do clube.

Como o clipe apareceu no

Notícias cartola betfair um único

, a frase parecia vagamente absurda ou pelo menos deve ter feito com um estranho. Por que ele estava falando sobre o clube e cartola betfair reputação? Qual é esse Clube O quê isso tem haver cartola betfair relação aos tumultos anti-imigrantes além do fato de alguns manifestantes estarem usando camisa Sunderland?"

De outra forma, ainda fazia sentido. Como é que uma cidade como Sunderland se projeta para o mundo hoje cartola betfair dia? Quantas pessoas fora deS Underlândia já pensaram no país do futebol (outro talvez além da cartola betfair capacidade duradoura) ou na fábrica Nissan carro o> A ideia de um clube como representante da cidade é comum, tão familiar agora que talvez escape notar o quão estranho ou recente fenômeno isso seja. Uma vez as cidades teriam expressado orgulho através do seu setor industrial cartola betfair universidade e catedral; Agora particularmente para os pós-industriais no norte das capitais – isto seria futebol americano! Financeiramente, é importante também: o turismo cartola betfair Sunderland subiu 3% no ano passado e os fãs que visitaram a Stadium of Light consideraram um fator principal. Quando caiu

da Premier League e as empresas locais estimaram uma queda de 4% do comércio comercial mesmo na Championship com média de atendimento para 34 mil espectadores durante esta temporada; isso significa muito pé-de-bares ou lojas!

A relação tornou-se bidirecional, como se a cidade fosse agora tanto uma projeção do clube quanto o clube é da cidade. Quando um município está sendo cenário de eventos terríveis há algo estranho cartola betfair que cartola betfair reputação seja prejudicada e ao mesmo tempo as pessoas querem mostrar solidariedade com seu centro urbano; quando elas desejam expressar ou sentirem união numa época difícil: qual seria melhor maneira para fazer isso usando camisetas? skip promoção newsletter passado

após a promoção da newsletter;

O deputado trabalhista do Sunderland Central, Lewis Atkinson usou uma camiseta branca da Umbro no final dos anos 70 enquanto ele ajudava a varrer os destroços e falava de comunidades se unindo para limpar o caos sendo "o verdadeiro país das sombras". Mas também era reveladora como as equipes aceitam ou talvez até mesmo abracem seu papel.

"Quando me vesti naquela manhã", diz Atkinson, "eu só sabia que queria usar essa camiseta; para mim ela resultou de uma determinação cartola betfair não permitir a um minoria dos bandidos possuir o mais precioso nome do Sunderland e mostrar aos nossos companheiros varrer os fragmentos da raiva quem era realmente esse país".

Às 23h19 da noite dos tumultos, eles postaram nas redes sociais: "As cenas vergonhosa de hoje à tarde não representam nossa cultura ou história. Nossa grande cidade é construída sobre união e aceitação; Sunderland será para sempre por todos nós." Somos mais fortes como uma comunidade agora". Então... Sempre"

Teria sido muito fácil não ter dito nada. Isso, na verdade que tem a ver com futebol mesmo se um punhado de manifestantes pudessem ser vistos usando camisetas do esporte e até o treinador Régi'S Le Bri ou algum outro funcionário pudesse murmurar platitudes sobre isso estar tudo triste mas melhor deixado nas mãos das autoridades!

Em vez disso, o clube saiu dentro de algumas horas do problema com uma mensagem anti-racista forte e obviamente tomando partido. Pode ser que tenha sido parcialmente informado pelo fato da equipe ter passado por pouco pelos padrões cartola betfair igualdade síndico na Liga Inglesa mas ainda assim a cartola betfair mensagens era poderosa; Middlesprouh emitiu um comunicado semelhante alguns dias depois quando os clubes esportivos foram chamados para condenar as revoltas no país

As ligações entre a violência do futebol e grupos de extrema direita são inegáveis, razão pela qual tem havido rumores sobre o jogo proibindo ordens para os envolvidos nos tumultos. E por que houve algumas conversas fora dos registros das autoridades oficiais dizendo-nos como as revoltas vão parar quando dias ausentes reiniciarem novamente mas enquanto estereótipo cronistas permanecem no ar hoje cartola betfair dia é muito vasto demais definirmos uma perspectiva contra ela mesmo na década da 1970, fãs desses clubes com sucesso (como Leeds ou Totten).

O futebol agora é quantos lugares expressam cartola betfair existência e identidade, então todos envolvendo que ele está de fato outro teatro do conflito. Alguns usam suas camisetas clube para expressar visões violenta da extrema-direita; a evidência Sunderland no último fimde semana É muito mais usá-los cartola betfair exprimir um orgulho inclusivo na cidade deles!
