21+3

The 21+3 side bet is the most common side bet in blackjack. It is offered in most land-based and online casinos. This side bet is adapted from poker and involves both the player's and the dealer's cards.

There are four major types of 21+3 side bets in Blackjack. The payout for each winning hand was 9:1, resulting in a house edge of 3.24%. The wager results in a win if the player's two cards and the dealers' face-up cards make any of these combinations.

Flush

This bet is placed on the possibility of all the three cards being of the same suit. The odds of winning this bet are 5:1. For example, three spade cards (i.e., 274).

Straight

In this bet, the player wins if the three cards are of consecutive ranks. The odds of winning this bet are 10:1. For example, two, three, and four of different suits (i.e., 234).

Straight Flush

This wager is placed on the possibility that all three cards are of the same suit and have consecutive values. The odds of winning this bet are 40:1. For example, four, five, and six of hearts (i.e., 456).

Three of a Kind

In this wager, the player wins if the three cards are of the same numerical value (meaning tens and figures are considered the same). The odds of winning this bet are 30:1. For example, two kings and a ten (i.e., 10KK).

A suited three-of-a-kind is a side bet in which the cards are of the same numerical denomination and are of the same suit. The payout for this bet is 100:1. For example, three ten-ranked cards of spades (i.e., 10QA).

Texas

Seven-card stud, also known as Seven-Toed Pete or

Down-The-River,[1] is a variant of stud poker. Before the 2000s surge of popularity of Texas hold 'em,[2] seven-card stud was one of the most widely played poker variants in home games across the United States[3] and in casinos in the eastern part of the country. Although seven-card stud is not as common in casinos today, it is still played
