Article Summary

X

Before you get started playing any type of 5-card poker, you'll need to learn the 10 basic ways to win. In order from lowest to highest, they are:

1. High card.
2. Pair of cards, like two 2s.
3. Two pairs of cards, like two 5s and two 9s.
- 4.

Three of a kind, like three 4s.

5. Straight, which is five cards in sequential order.

For example, a player might have a 3, 4, 5, 6, and 7 of any suit.

6. Flush, which is

when a player has five cards of the same suit in any order. For example, a player might have a 2, 7, 10, Jack, and Queen of spades.

7. Full house, which is when a player has a pair and a three of a kind.

8. Four of a kind, like all four Aces.

9. Straight flush,

which is when you have five cards in sequential order of the same suit. For example, a player might have a 5, 6, 7, 8, and 9 of clubs.

10. Royal Flush, which is a straight

flush containing a 10, Jack, Queen, King, and Ace.

If two people have the same hand, the person with the higher cards wins. So for example, if Daniel has a pair of 3s and Maggie has a pair of 10s, Maggie wins because her pair is higher.

To play Texas

Hold'Em, which is the most common type of poker, you'll first need to bet your "ante," which is your "buy in bet" to play the round. The ante is usually a small bet, like R\$1 or R\$5, and it's decided by the table. Once everyone has their ante, the dealer will deal two cards to each player. Keep these cards secret from everyone else. Now, every player will take a look at their cards and choose whether or not to bet. Whenever there's a betting round, you can choose to "fold," which means not playing this round, "check," which means matching their bet, or "raise," which means adding more money to the betting pool. Players that are unwilling to "check" a bet have to fold; and if everyone but one player "folds," that player wins! Once everyone has bet, the dealer will reveal three cards. These cards are known as the "flop." When you see the flop, start planning what hand you want to make, keeping in mind that there are still two more cards to be revealed. For example, you might want to aim for a flush, which is when you have five cards of the same suit. After the flop, everyone has the chance to bet again, before the dealer reveals the next card, which is the "turn." Bet again if you want to, then the dealer will reveal the "river," which is the last card. At this point, you'll see a total of 7 cards: two in your hands, and five on the table. Now, players will bet once last time, then everyone will reveal their hand. Your goal is to create the highest hand possible out of those seven cards, even if it means only using one card from your hand and four cards from the table. The player with the best hand wins!
