In this rather unique combination of arcade and puzzle there are lots of little things you can do to outsmart the competition and best every single one of your opponents. Here's a basic list of effective moves and helpful tips.

Since the main mechanic is physics-based it is important to adjust your movement when trying to consume an object. Let's say you want to eat some traffic lights: sometimes sliding under a vertical pole makes it fall in an unwanted direction and ultimately drop flat on the floor horizontally, thus preventing you from being able to eat it. To prevent that from happening you might want to slow down just a bit or move slightly backwards once the pole start moving in an unwanted direction.

It is possible to get larger objects and buildings fall in even if your hole is not big enough: simply place yourself under one of the edges of the object for it to start leaning into the singularity and then move slowly towards its other end gradually consuming the rest.

It may be more important to swallow more smaller stuff than fewer big structures. It is common to feel inclined to try and consume huge buildings once the hole gets big enough, however it is a bit of a risk because it's possible to underestimate the size of an object. If it won't fit inside, you will end up wasting your time. Instead spend some time adjusting to your new size by going for smaller prey.

If you have been having trouble making it to the top of the score board and besting other players, these tips will hopefully help you overcome some of the major difficulties. Ultimately, we tend to produce best results after entering that focused meditative flow state of mind, but you need to become really comfortable and familiar with the game in order to achieve it. Good luck becoming the best at Hole.io!
