Oasis Poker

Introduction

Oasis

Poker 6 is a variation of Caribbean Stud Poker. The rules of Oasis Poker are the same as Caribbean Stud, except the 6 player is allowed to exchange cards before the raise/fold decision, for a price of course. The game can be found 6 mostly in eastern Europe, northern Africa, and Internet casinos using Galewind Software. Following are the complete rules.

Rules

The player makes an 6 ante wager plus optional side bonus side bet.

Player and the dealer get five cards each. All cards are dealt 6 face down, except one dealer card is exposed. The player may examine his own cards but sharing of information is 6 not allowed. The player has the option to switch one card of his choice for the next card in the 6 deck. There is a fee to do this, equal to the ante wager. This fee is non-refundable. The player may 6 switch one of more cards. The price for switching depends on the number of cards switched, as follows: One card: 6 1x the Ante.

Two cards:

2x the Ante.

Three cards: 3x the Ante.

Four cards: 2x the Ante.

Five cards: 1x the

Ante.

If the 6 player switches all five cards, then he must raise. The player may either fold or raise. If player folds, then 6 he forfeits his cards, ante bet, and side bet (if

made). If player raises, then he must make a raise 6 wager exactly equal to twice the ante. The dealer will turn over his other four cards. The dealer must have 6 an ace/king or higher to qualify. In other words, the lowest qualifying hand would be ace,king,4,3,2. If the dealer does 6 not qualify then the player will win even money on his ante wager and the raise will push. If the 6 dealer qualifies and beats the player both ante and raise will lose. If the dealer qualifies and loses to the 6 player then the ante will pay even money and the raise according to the Raise Pay Table below. Other pay 6 tables have been known to exist. If the player and dealer tie then both the ante and raise will push. 6 The bonus bet win will be entirely based on the poker value of the player's original hand.

Standard Raise Pay Table 6 Hand Pays Royal flush 100 to 1

Straight flush 50 to 1 Four of a kind 20 to 1 Full 6 house 7 to 1 Flush 5 to 1 Straight 4 to 1 Three of a kind 3 to 1 Two 6 pair 2 to 1 All other 1 to 1

Strategy

I have never

quantified a perfect card switching strategy. My program makes 6 a perfect decision every time by analyzing all possible combinations of the replacement card and all four dealer cards. However, 6 from running through some test hands I believe the following strategy is close to optimal.

The player should switch one card 6 with any of the following:

Four

to a straight flush and royal flush, even breaking up a pair Four to a 6 flush with no pair. Four to an outside straight with no pair.

The player will sometimes switch with any of the 6 following:

Four to a flush with a low pair (depends on the pair and dealer's up card). Four to an inside 6 straight with no pair (depends on the inside straight and dealer's up card).

My apologies for not being more specific. In 6 my view there, is not enough demand for the information to warrant doing a more detailed strategy.

Do not

switch with 6 two pair or three of a kind.

If the casino allows switching two or more cards that option should never be 6 taken.

Once the switch decision has been made the player can follow Caribbean Stud Poker strategy when deciding to raise or 6 fold.

Odds

The following return table is based on the pay table above. Other pay tables are known to exist, which would 6 change the odds.

Return Table Event Switch Pays

Combinations	Probability	Return	Player wins with royal flush	No	201	703909080	0.000001
0.000169	6	Player wins with straight flush	No	101	6591048240	0.000008	0.000795

-0.40563	Player loses	No	-3	109793339508384	0.131144	-0.393433	Player wins with royal flush
Yes	200	2650657380	0.000003	6	0.000633	Player wins with straight flush	Yes
100	24129845136	0.000029	0.002882	Player wins with four of a kind	Yes	40	6
0	0	0	0	Player wins with full			

house Yes 14 0 0 0 Player wins with flush Yes 10 3022953154968 6 0.003611 0.036108 Player wins with straight Yes 8 3012064741860 0.003598 0.028782 Player wins with three of a kind Yes 6 6 0 0 0 Player wins with two pair Yes 4 0 0 0 Player wins with pair or less Yes 6 2 5747378958780 0.006865 0.01373 Dealer doesn't qualify Yes 0 14509998995172 0.017332 0 Tie Yes -1 1981751652 0.000002 -0.000002 Player folds 6 Yes -2 37230605388900 0.044471 -0.088941 Player loses Yes -4 6750562960512 0.008063 -0.032253 Total 837195681722400 1 -0.010372

The lower right cell shows 6 a house edge of 1.04%.

After

possibly switching and raising, the average final bet, including the switching fee, will be 2.183772 6 units. The element of risk is thus 0.475%. On average the player will switch 8.4% of the time.

At Internet casinos 6 using Galewind Software there are some rule changes. There the player may switch one to five cards, for the price 6 of one ante per card, and a full house pays 6 instead of 7. Under those rules the house edge 6 is 1.204%, the average final wager is 2.184 units, and the element of risk is 0.55%.

Side

Bet

I indicate the odds 6 of the side bet in my Caribbean Stud Poker section. Some casinos have been known to base the side bet 6 on the hand after switching. This can be a very good rule for the player. However, if you see it, 6 you're on your own.

Belgium

Variant

In Belgium the player is allowed to switch a card, but if he does, he forfeits 6 his option to fold. That version of the rules is addressed in my section on Belgium Variant of Oasis Poker.

Nicaragua 6 Variant

Oasis Poker is very popular in Nicaragua. It seems to have more placements than any other game. However, they call 6 it Caribbean Stud Poker. The pay table is the standard one for the original hand. However, it is depressed if 6 the player switches a card, which still costs the price of the Ante bet.

This variant has never been analyzed, as 6 far as I know.

Nicaragua Variant Pay

Table Hand Original

Hand After

Discard Royal flush 100 50 Straight flush 50 20 Four of 6 a kind 20 10 Full house 7 5 Flush 5 4 Straight 4 3 Three of a kind 3 3 6 Two pair 2 2 All other 1 1

As a variant of the Nicaragua variant, the Palms casino in Managua lets 6 the player buy a sixth card for the price of the Ante, as opposed to discarding. This, too, has not 6 been analyzed (sorry).

Finland Variant

At the Casino Helsinki the following rule changes are followed:

The player may exchange only one card from 6 his hand with cost of 1 x ante.

If the dealer doesn't qualify player may exchange one card from the dealers 6 hand (see Russian Poker above) to make the dealer to qualify.

Jackpot Bonus

side bet available.

Jackpot Bonus payout

Royal Flush: Jackpot (minimum 6 amount

€20,000)

Straight Flush: 20% of the jackpot

Four of a kind: 250 for 1

Full House: 150

for 1

Flush: 100 for 1

Straight: 6 50 for 1
