In August 7Games was the 3rd most downloaded free mobile game of the month according to Google Play, reaching 1.3 million downloads. Today we are at 2.75 million downloads and we move millions of rows of content monthly between (tests and training), consuming about 120Mb for {img} resolutions in various PPE and OMEGA systems in constant exchange to, on average around 2.9TB in logs of general storage per month. 7G estimates that it will register 2.5 Billion bets or about 300 thousand players Incoming, twice what happens currently in 6 months".

The redemption may take 48 hours or up to 3 business days sometimes the system comes up with bonuses varying between 20 and 50 reais just to compensate for unforeseen that ough. I explain better: It is better not to pay R\$ 1.30 eating one baked chicken piece per day, since it costs more at the box office, yes they go for one month, but at the merchant that sell more. With 8 million downloads, there could be R\$ 10 million per month without including those who prefer not go to stores, despite knowing costs can be much more expensive... Why continue to spend so much money on these expensive titles for your customers and find there have been no adherence only to us... We've even sent letters explaining this situation so that they can afford or share better rates. However, this reality continues and will continue for a while.

7 Games knows no border! We have clients far Indonesia. The minimum limit of the bet is still not guessed correctly because already generated many scared champions in eSports.

Professionalism for setting limits automatically for the safe champions who constantly win a lot without needing a streak (MMA), because it earns close streak minimum of its category. The limits automatically raised according to their earnings.

If scared to dream big, lower and raise your bet on sure victories of its varieties in traditional and/or esports sports, we get away for longer if we do not increase as they have incentives and products so that their champions are not tempted to sell some time very low, wait for exclusive releases. We will soon receive 14 GINGER players signed for CS GO and LoL etc... Among them, some have main teams, teams of brothers that unleash premiums and sell external, others have exclusive exclusives that sell directly without intermediaries to large betting sites that accept bitcoin and etc.... Do not make it a habit, because sites do fall and raise champions of much, including legendary streamers who sell at highest market price today for not cheating constantly (they accept streams of high premiums such as BNN dicas, Buff.Live Scores PRO). Ahora good players can have exclusivity for up to 8 months in exclusive premises that help even more to leverage by BRL 5 times more in premiums on channels (and people stay in the shadows having a BM out there making promises to everyone and fulfilling zero, not returning, while we have the direct responsibility as mediator). Direct contact means partners increase by leaps and bounds... that's WHY (find us and look at the conditions we offer in a simple search). Sometimes we operate differently depending on previous understandings adapted to objectives, preferences, negotiations, agreements and situations which if there is delay for some reason or error in the distribution model between sellers, this limit can reach its 10th consecutive defeat. Allies we make them believe in a perfect world and professional relationships full of fairness are part of what guarantees 7G reputation, until victories are no longer certain and some very cynical trainer doesn't prioritize by the amount of prize pool "as that Faker here with some other pro...

Unfortunately we have some bumps on the way, they understand quickly that this isn't child's

play; when problems arise (and they last) the winnings become an odyssey they stumble upon more losses but who solves eh, right? We already talk (a lot, even recently if you are addiction had brought you to misinforming our beloved public!) about e-sports bets. I'm just explaining the most different types risks they tend to suffer today which always ends up causing panic and mass closures at best. The same happens among bookmakers. Thus, offering more convenient conditions maintaining strong immersion that may put an end to frauds in in some moment or make it even harder some professional earn in less than a month, for example is a giant leap with due respect for sports books.

## **La Emperatriz Japonesa y la Transformación de la Fuerza Laboral en Japón**

La actual emperatriz de Japón, conocida como Masako Owada cuando se unió a la élite diplomática japonesa en 1987, fue una de las pocas mujeres reclutas en ese año. Trabajó muchas horas y tuvo una carrera en ascenso como negociadora comercial. Sin embargo, permaneció menos de seis años en el cargo antes de renunciar para casarse con el príncipe heredero y actual emperador, Naruhito.

Desde entonces, mucho ha cambiado para el Ministerio de Relaciones Exteriores - y, en algunos aspectos, para las mujeres japonesas en general - en las siguientes tres décadas.

### **Avances en las Relaciones Exteriores**

Desde 2024, las mujeres han constituido casi la mitad de cada clase entrante de diplomáticos y muchas continúan su carrera después del matrimonio. Estos avances, en un país donde las mujeres fueron contratadas predominantemente solo para puestos clericales hasta la década de 1980, muestran cómo la simple fuerza de los números puede, aunque lentamente, comenzar a remodelar las culturas laborales y crear un conducto para el liderazgo.

### **Desafíos persistentes**

Durante años, Japón ha promovido a las mujeres en el lugar de trabajo para mejorar su economía estancada. Los empleadores del sector privado han dado algunos pasos, como alentar a los hombres a hacer más en el hogar o fijar límites a las salidas después del trabajo que pueden complicar la atención infantil. Sin embargo, muchas mujeres tienen dificultades para conciliar su carrera con las obligaciones domésticas.

### **Cambios en el Ministerio de Relaciones Exteriores**

El Ministerio de Relaciones Exteriores, dirigido por una mujer, Yoko Kamikawa, destaca tanto en otras agencias gubernamentales como en famosas empresas japonesas como Mitsubishi, Panasonic y SoftBank en un importante indicador de progreso: el nombramiento de mujeres en

puestos de carrera y profesionales.

## **Impacto en el hogar y la familia**

Con más mujeres en las filas del ministerio, dijo Kotonno Hara, una diplomática, "el modo de trabajo está cambiando drásticamente, con horarios más flexibles y la opción de trabajar remotamente".

Muchas de sus colegas femeninas completan tareas domésticas mientras trabajan. Shiori Kusuda, de 29 años, quien se unió al ministerio hace siete años y renunció este año a un trabajo de consultoría en Tokio, dijo que muchas de sus jefas masculinas en el Ministerio de Relaciones Exteriores regresan a hogares donde sus esposas se encargan de sus comidas y lavandería, mientras que sus colegas femeninas completan las tareas domésticas ustedes mismas.

"Para las mujeres que necesitan hacer su lavandería o cocinar después de regresar a casa, una hora extra de trabajo es muy importante", dijo Kusuda.
