meses, mais de 15 milhoes de pessoas jogam nossos jogos, seja sozinhas no modo de um Video game of multiple players

"Multiplayer" redirects here. For other multiplayer games, see Game § Multiplayer

A multiplayer video game is a video game in which more than one person can play in the same game environment at the same time, either locally on the same computing system (couch co-op), on different computing systems via a local area network, or via a wide area network, most commonly the Internet (e.g. World of Warcraft, Call of Duty, DayZ). Multiplayer games usually require players to share a single game system or use networking technology to play together over a greater distance; players may compete against one or more human contestants, work cooperatively with a human partner to achieve a common goal, or supervise other players' activity. Due to multiplayer games allowing players to interact with other individuals, they provide an element of social communication absent from single-player games.

History [ edit ]

Some of the earliest video games were two-player games, including early sports games (such as 1958's Tennis For Two and 1972's Pong), early shooter games such as Spacewar! (1962)[1] and early racing video games such as Astro Race (1973).[2] The first examples of multiplayer real-time games were developed on the PLATO system about 1973. Multi-user games developed on this system included 1973's Empire and 1974's Spasim; the latter was an early first-person shooter. Other early video games included turn-based multiplayer modes, popular in tabletop arcade machines. In such games, play is alternated at some point (often after the loss of a life). All players' scores are often displayed onscreen so players can see their relative standing. Danielle Bunten Berry created some of the first multiplayer video games, such as her debut, Wheeler Dealers (1978) and her most notable work, M.U.L.E. (1983).

Gauntlet (1985) and Quartet (1986) introduced co-operative 4-player gaming to the arcades. The games had broader consoles to allow for four sets of controls.

Networked [ edit ]

Ken Wasserman and Tim Stryker identified three factors which make networked computer games appealing:[3]

Multiple humans competing with each other instead of a computer Incomplete information resulting

in suspense and risk-taking Real-time play requiring quick reaction

John G. Kemeny wrote in 1972 that software running on the Dartmouth Time Sharing System (DTSS) had recently gained the ability to support multiple simultaneous users, and that games were the first use of the functionality. DTSS's popular American football game, he said, now supported head-to-head play by two humans.[4]

The first large-scale serial sessions using a single computer[citation needed] were STAR (based on Star Trek), OCEAN (a battle using ships, submarines and helicopters, with players divided between two combating cities) and 1975's CAVE (based on Dungeons & Dragons), created by Christopher Caldwell (with artwork and suggestions by Roger Long and assembly coding by Robert Kenney) on the University of New Hampshire's DECsystem-1090. The university's computer system had hundreds of terminals, connected (via serial lines) through cluster PDP-11s for student, teacher, and staff access. The games had a program running on each terminal (for each player), sharing a segment of shared memory (known as the "high segment" in the OS TOPS-10). The games became popular, and the university often banned them because of their RAM use. STAR was based on 1974's single-user, turn-oriented BASIC program STAR, written by Michael O'Shaughnessy at UNH.

Wasserman and Stryker in 1980 described in BYTE how to network two Commodore PET computers with a cable. Their article includes a type-in, two-player Hangman, and describes the authors' more-sophisticated Flash Attack.[3] Digital Equipment Corporation distributed another multi-user version of Star Trek, Decwar, without real-time screen updating; it was widely distributed to universities with DECsystem-10s. In 1981 Cliff Zimmerman wrote an homage to Star Trek in MACRO-10 for DECsystem-10s and -20s using VT100-series graphics. "VTtrek" pitted four Federation players against four Klingons in a three-dimensional universe.

Flight Simulator II, released in 1986 for the Atari ST and Commodore Amiga, allowed two players to connect via modem or serial cable and fly together in a shared environment.

MIDI Maze, an early first-person shooter released in 1987 for the Atari ST, featured network multiplayer through a MIDI interface before Ethernet and Internet play became common. It is considered[by whom?] the first multiplayer 3D shooter on a mainstream system, and the first network multiplayer action-game (with support for up to 16 players). There followed ports to a number of platforms (including Game Boy and Super NES) in 1991 under the title Faceball 2000, making it one of the first handheld, multi-platform first-person shooters and an early console example of the genre.[5]

Networked multiplayer gaming modes are known as "netplay". The first popular video-game title with a Local Area Network(LAN) version, 1991's Spectre for the Apple Macintosh, featured AppleTalk support for up to eight players. Spectre's popularity was partially attributed[by whom?] to the display of a player's name above their cybertank. There followed 1993's Doom, whose first network version allowed four simultaneous players.[6]

Play-by-email multiplayer games use email to communicate between computers. Other turn-based variations not requiring players to be online simultaneously are Play-by-post gaming and Play-by-Internet. Some online games are "massively multiplayer", with many players participating simultaneously. Two massively multiplayer genres are MMORPG (such as World of Warcraft or EverQuest) and MMORTS.

First-person shooters have become popular multiplayer games; Battlefield 1942 and Counter-Strike have little (or no) single-player gameplay. Developer and gaming site OMGPOP's library included multiplayer Flash games for the casual player until it was shut down in 2013. Some networked multiplayer games, including MUDs and massively multiplayer online games (MMOs) such as RuneScape, omit a single-player mode. The largest MMO in 2008 was World of Warcraft, with over 10 million registered players worldwide. World of Warcraft would hit its peak at 12 million players two years later in 2010, and in 2024 earned the Guinness World Record for best selling MMO video game.[7] This category of games requires multiple machines to connect via the Internet; before the Internet became popular, MUDs were played on time-sharing computer systems and games like Doom were played on a LAN.

Beginning with the Sega NetLink in 1996, Game in 1997 and Dreamcast in 2000, game consoles

support network gaming over LANs and the Internet. Many mobile phones and handheld consoles also offer wireless gaming with Bluetooth (or similar) technology. By the early 2010s online gaming had become a mainstay of console platforms such as Xbox and PlayStation.[citation needed] During the 2010s, as the number of Internet users increased, two new video game genres rapidly gained worldwide popularity – multiplayer online battle arena and battle royale game, both designed exclusively for multiplayer gameplay over the Internet.

Over time the number of people playing video games has increased. In 2024, the majority of households in the United States have an occupant that plays video games, and 65% of gamers play multiplayer games with others either online or in person.[8]

Local multiplayer [ edit ]

A LAN party

For some games, "multiplayer" implies that players are playing on the same gaming system or network. This applies to all arcade games, but also to a number of console, and personal computer games too. Local multiplayer games played on a singular system sometimes use split screen, so each player has an individual view of the action (important in first-person shooters and in racing video games) Nearly all multiplayer modes on beat 'em up games have a single-system option, but racing games have started to abandon split-screen in favor of a multiple-system, multiplayer mode. Turn-based games such as chess also lend themselves to single system single screen and even to a single controller.

Multiple types of games allow players to use local multiplayer. The term "local co-op" or "couch co-op" refers to local multiplayer games played in a cooperative manner on the same system; these may use split-screen or some other display method. Another option is hot-seat games. Hot-seat games are typically turn-based games with only one controller or input set – such as a single keyboard/mouse on the system. Players rotate using the input device to perform their turn such that each is taking a turn on the "hot-seat".

Not all local multiplayer games are played on the same console or personal computer. Some local multiplayer games are played over a LAN. This involves multiple devices using one local network to play together. Networked multiplayer games on LAN eliminate common problems faced when playing online such as lag and anonymity. Games played on a LAN network are the focus of LAN parties. While local co-op and LAN parties still take place, there has been a decrease in both due to an increasing number of players and games utilizing online multiplayer gaming.[9]

Online multiplayer [ edit ]

Online multiplayer games connect players over a wide area network (a common example being the Internet). Unlike local multiplayer, players playing online multiplayer are not restricted to the same local network. This allows players to interact with others from a much greater distance. Playing multiplayer online offers the benefits of distance, but it also comes with its own unique challenges. Gamers refer to latency using the term "ping", after a utility which measures round-trip network communication delays (by the use of ICMP packets). A player on a DSL connection with a 50-ms ping can react faster than a modem user with a 350-ms average latency. Other problems include packet loss and choke, which can prevent a player from "registering" their actions with a server. In first-person shooters, this problem appears when bullets hit the enemy without damage. The player's connection is not the only factor; some servers are slower than others.

Asymmetrical gameplay [ edit ]

Asymmetrical multiplayer is a type of gameplay in which players can have significantly different roles or abilities from each other – enough to provide a significantly different experience of the game.[10] In games with light asymmetry, the players share some of the same basic mechanics (such as movement and death), yet have different roles in the game; this is a common feature of the multiplayer online battle arena (MOBA) genre such as League of Legends and Dota 2, and in hero shooters such as Overwatch and Apex Legends. In games with stronger elements of asymmetry, one player/team may have one gameplay experience (or be in softly asymmetric roles) while the other player or team play in a drastically different way, with different mechanics, a different type of objective, or both. Examples of games with strong asymmetry include Dead by Daylight, Evolve, and Left 4 Dead.[10]

Asynchronous multiplayer [ edit ]

Asynchronous multiplayer is a form of multiplayer gameplay where players do not have to be playing at the same time.[11] This form of multiplayer game has its origins in play-by-mail games, where players would send their moves through postal mail to a game master, who then would compile and send out results for the next turn. Play-by-mail games transitioned to electronic form as play-by-email games.[12] Similar games were developed for bulletin board systems, such as Trade Wars, where the turn structure may not be as rigorous and allow players to take actions at any time in a persistence space alongside all other players, a concept known as sporadic play.[13]

These types of asynchronous multiplayer games waned with the widespread availability of the Internet which allowed players to play against each other simultaneously, but remains an option in many strategy-related games, such as the Civilization series. Coordination of turns are subsequently managed by one computer or a centralized server. Further, many mobile games are based on sporadic play and use social interactions with other players, lacking direct player versus player game modes but allowing players to influence other players' games, coordinated through central game servers, another facet of asynchronous play.[13]

Online cheating [ edit ]

Online cheating (in gaming) usually refers to modifying the game experience to give one player an advantage over others, such as using an "aimbot" – a program which automatically locks the player's crosshairs onto a target – in shooting games.[14][15][16] This is also known as "hacking" or "glitching" ("glitching" refers to using a glitch, or a mistake in the code of a game, whereas "hacking" is manipulating the code of a game). Cheating in video games is often done via a third-party program that modifies the game's code at runtime to give one or more players an advantage. In other situations, it is frequently done by changing the game's files to change the game's mechanics.[17]

### black bull slot

A tensa relação entre os Bulls e os Pistons está cheia de capítulos memoráveis black bull slot black bull slot longa história na NBA. No começo dos anos 90, a rivalidade entre essas duas equipes era uma das mais intensas no basquete. Muita daquela rivalidade era engendrada pela hábil postura defensiva de Joe Dumars, Isiah Thomas e companhia que tantos problemas deram a Michael Jordan e à black bull slot equipe nos finais dos anos 80 e início dos 90s.

Os Jogos decisivos entre as equipes estavam usualmente nas mãos desiguais, com os Pistons levando a melhor sobre os Bulls black bull slot black bull slot quatro apostas consecutivas nos anos de 1988-1991, incluindo enfiando as portas na cara dos adversários antes que o tempo acabasse nas finais da Conferência Leste black bull slot black bull slot 1991, após a derrota para a equipe de Illinois confirmada.

Após escapar do controle da maléfica dominação de Detroit no baloncesto, a situação se inverteu drasticamente de uma forma impactante. Os papéis de poder caíam black bull slot black bull slot seu favor Jornada de cinco conjuntos de série final nos anos de 1991-1993, transformando Jordan black bull slot black bull slot palco principal do troféu na quadra no entanto, a satisfação de Chicago deveria surgir dos braços dos fãs apenas pelo quão longe chegaram após dois ciclos de reis anteriores e a opressão de um período com o trono covardemente contestado.

Mas o que exatamente permitiu à franquicia comanda por Michael Garret "Phil" Jackson cruzar as

metas do Obelisco da Fama desfilando condecorados e conmoções? Basicamente e desafortunadamente para a torcida dos Pistons era algo tão simples quanto atiradores desajeitados e a falta de percepção espaço o bastante, principalmente durante a era isaiana (assim intitulada com razão na ausência do "Camisa 1" fora da cena) e as "Estranhas Amizades".

## black bull slot

O elemento fundamental principal entre essas duas temporadas prósperas, como já explicitamente abordado por Jordan e Jackson, girava cabe destacar talvez de forma lendária no princípio basilares duvidosos da rotina de Isiah Thomas, a começar por seu hábito frequentador extremo a favor do sotaque impreciso sob a frente bandeira norte-americana.

- Suas próprias estatísticas continuariam sofrendo uma queda dramática, apesar das tentativas constantes durante a fase nela: a black bull slot média de pontos sofria black bull slot maior queda nos anos entre 1991 (assinala juntamente com Kevin McHale e Kareem Abdul-Jabbar na seleção defensiva todos NBA inexcusada); black bull slot black bull slot última análise, as máquinas expendedoras de seus colegas de equipe seriam incapazes tanto quanto ele ser um baluarte de contribuições ofensivas na ausência de Joe Dumars para apoiar a geração habitual de pontos acima da marca de vetor:

• “

- Não estou sugerindo ataques ao jogador, é que eles tiveram black bull slot punição ao passo seis jogos black bull slot black bull slot Chicago", alegado por Michael Jordan após corte nítido na carreira ponto a ponto de Isiah Thomas. “Nossos recursos contra eles eram Joseph Dumars, em seguida, os de todos igualmente restantes black bull slot black bull slot torno de Doug Collins.O Isiah ter subitamente parado de acertar jardas-para-jardas black bull slot black bull slot qualquer momento ao longo da noite facilitaria black bull slot black bull slot demasia nosso trabalho”.- Michael Jordan declarou naquele célebre ardor.A frágil defesa titubeante de Detroit (a principal estratégia) ficou explícita black bull slot black bull slot três fatores: Detroit ficou com queda elevada a frente de equipes primárias nas estadísticas interceptações de quartos, neste momento, Blocos, ainda mais gravemente; Em comparação com Chicago e praticamente qualquer duque Seria justamente esses desafios na mesma estratégia defensiva (que eventualmente levaram à extinção da própria dominação na quadra)...Mas vários historiógrafos, especialmente dos órfãos Jail Blazers do início dos anos 2000, atestam também ser filosofias de um certo Arvydas Sabonis pioneiras nas fileiras dos Blazers.

### 3. black bull slot :como apostar em jogos

Existem sanduíches, e depois existem *sanduíches*. O sanduíche tradicional é comido ao almoço e tem um recheio simples, permitindo alguma flexibilidade para uma guarnição: pense black bull slot ovo e rúcula. Por outro lado, o novo sanduíche é uma maravilhosa combinação de texturas, culturas e sabores que pode ser consumido black bull slot qualquer horário do dia, e entre eles, *bánh mì* é rainha. No Vietnã, não há uma receita única para *bánh mì*, porque é totalmente personalizável, mas black bull slot geral você pode esperar o ingrediente principal – tradicionalmente porco, mas aqui coberto com miso e pasta de amendoim torrado – uma espalha e uma variedade colorida e selvagem de vegetais black bull slot conserva e ervas, tudo empacotado black bull slot um pão crocante.

### Bánh mì de tofu de miso e amendoim

Preparo **10 min**

Cozinhe **30 min**

Sirva **4**

**2 cenouras médias** (aproximadamente 250g), descascadas

**7 colheres de sopa de vinagre de maçã**

**3 colheres de sopa de xarope de agave**, mais 1½ colher de chá extra para as cenouras

**50g de amendoins salgados torrados**

**1 oco pasta de miso branca salgada**

**6 dentes de alho**, picados

**3 colheres de sopa de molho de soja escura**

**560g de tofu extra firme** (ou seja, 2 x pacotes padrão de 280g), escorrido e pressionado seco – gosto do Tofoo

**5 colheres de chá de farinha de milho**

**4 colheres de sopa de azeite de sésamo torrado**

Para servir

**4 baguetes pequenos**

**8 colheres de sopa de maionese vegana**

**20g de hortelã fresca**, folhas picadas

**30g de coentro fresco**, folhas picadas

**1 grande pimenta vermelha**, cortada finamente

Use um pela-papas para cortar as cenouras black bull slot tiras finas e coloque-as black bull slot uma tigela raso e funda. Despeje duas colheres de sopa de vinagre e o 1½ colher de chá de xarope de agave, então misture para untar. Moer os amendoins black bull slot um pó arenoso black bull slot um almofariz.

Em uma grande tigela, bata as colheres de sopa restantes de vinagre com as colheres de sopa restantes de xarope de agave, então adicione o miso, alho picado e molho de soja escura.

Corte cada bloco de tofu ao meio, então corte cada meio black bull slot quatro tiras de 2½cm de largura x 6cm de comprimento. Tempere quatro colheres de sopa de farinha de milho black bull slot uma tigela ras
