GGPoker hand history - how to download and import into a poker tracker?

The Good Game

poker network (GGPoker, PokerOK, Natural8) 9 is the opponent of any poker software. Neither poker trackers nor auxiliary programs like StarsCaption work at GGPoker. The reason 9 is the desire to create the same conditions for all players. According to management, poker software gives professional poker players 9 an unfair advantage.

Since

the network was founded in 2014 until recently, hand history has been unavailable.

However, on November 4, 9 2024, Good Game went to meet the requests of the players. Today we'll talk about how to download hand history 9 and import it into a poker tracker.

How

to download hand history from GGPoker - step by step instructions

1. Log in 9 to your

account through the poker room client (in our example, this is PokerOK).

2. Go to

PokerCraft. It will open 9 as a new page in your browser.

3. There are many subsections

in the PokerCraft tab, but we are only interested 9 in:

Rush & Cash;

Holdem;

Omaha;

My

Tournaments.

You cannot download the entire hand history from GGPoker with one button.

You will have to go 9 to each of the subsections and download it separately.

4. To

download your hand history, go to Holdem, select the files 9 with the checkboxes and click on the Game History window that appears. Hand history files are split into sessions. Then 9 click on "Download". The download process will begin.

The history from

GGPoker is saved on the computer as an archive. For 9 further work with HH you need an archiver. Free WinRAR will do the trick.

Features of GGPoker hand histories

The

inconvenience of 9 working with hand histories from GGPoker is not limited to the download process and the need to unpack the archive. 9 Other features of HH:

saved in

text format txt. This makes it difficult for poker trackers to work when importing hand 9 histories;

all opponents' nicknames are displayed as encrypted combinations of numbers and letters. It will not be possible to do any 9 analysis of the game of opponents and notes;

you are marked as "Hero" in the hand histories. A common mistake of 9 players is to search the tracker database by their real nickname on the Good Game network.

Of the

poker trackers, only 9 PokerTracker 4 and Holdem Manager 3 are able to import hand histories from GGPoker. Hand2Note still doesn't support HH directly.

How 9 do I import my

hand history into Holdem Manager 3?

Holdem Manager 3 was the first to add the possibility to 9 import hand histories from GGPoker.

1. Unpack the archive (Extract

files...) with hand history into a separate folder. Do not unpack 9 the downloaded files to your desktop, otherwise they will fill up the entire space of your screen and complicate your 9 work.

2. Launch Holdem Manager 3;

3. At the top of the HM3 window,

sequentially click on "File" - "Import Folder". The 9 process of importing hands into your database will begin. If the hand history is voluminous (from 100,000 and above), then 9 the import will take a long time.

How do I import my hand history into

PokerTracker 4?

After downloading the hand histories 9 from GGPoker, you need to:

1.

Unpack the archive with hand history into a separate folder.

2. Launch PokerTracker

4.

3. In the 9 "Play Poker" tab, click on "Get Hands From Disk", then on "Select Directory". Select the hands folder and the import 9 will start.

How to import hand

history from GGPoker to Hand2Note?

Despite numerous requests from users, Hand2Note

developers have not yet added 9 the possibility to import hand histories from GGPoker to the tracker. However, there is a workaround:

1. A converter for GGPoker 9 appeared on the

official Hand2Note website on March 21. When using it, you can convert hands from Good Game into 9 a format that the tracker understands.

2. Enter your email address, add the downloaded hand history using "Browse Files" and click on "Convert". The converted data will be sent to your mail.
3. Start the poker tracker.
4. Next, create a new database and import the files into Hand2Note. The database is created in a few clicks: "Configuration" - "Database" - "Create Database". Give a name to the new database, click "Activate" and restart the poker tracker.

How do I import my hand history into DriveHUD?

DriveHUD also supports importing hand histories from GGPoker:

1. Launch DriveHUD;
2. On the right side of the poker tracker, click on the "Import" button and select "Import from directory";
3. Specify the folder with hand history.

How to speed

up the import of files into a poker tracker?

If you are uploading a large volume of files to any of the listed poker trackers, the import process will be slow. The reason for the low speed - the history of hands from GGPoker is saved in the format: "1 hand - 1 file". Therefore, the tracker loses time each time opening a new file and the entire import process is delayed. There is an easy way to speed up the process. You need to combine all files into one:

1. Click on the "Windows" icon and write "cmd" in the line.
2. Run Command Prompt as administrator using the right mouse button.
3. In the command line, select the disc with your hand history. If it is on the C drive, then nothing needs to be changed.
4. Point to the desired folder in the command the bottom line. To do this, enter "cd E" and copy the address with the folder from the explorer.
5. Enter the command shown in the screenshot below and press "Enter".

The

process of combining the files will begin. As a result, all hands will be in one file and this will save you a lot of time.

How to play on PokerOK with statistics and HUD?

In October 2024, we added the GGConverter to our catalog. The converter allows you to play with statistics and HUD on PokerOK and other poker rooms of the network in real time. The program supports all leading poker trackers: Hand2Note, Holdem Manager 3, PokerTracker 4. While it works only with the mobile version of PokerOK. You will need an emulator to play the game. We recommend LDplayer or NoxPlayer.

We offer a free trial

version of GGConverter. It does not differ from the paid version. To get the trial please contact us in any way. All information how to install and configure the converter is in the manual.

Noelias Vdovych: de verão na floresta a preparação para a guerra na Ucrânia

Numa floresta no oeste da Ucrânia, alguns poucos jovens estavam novibet fortune tiger posição de atenção à luz do crepúsculo, à beira da noite. Alguns deles tinham armas falsas sobre os ombros.

Entre eles estava Olesya Vdovych, que passara o dia com outros membros da organização de escotismo Plast, transportando troncos, realizando exercícios e aprendendo sobre socorro médico, como parte de um acampamento de duas semanas novibet fortune tiger agosto do ano passado.

"Estou ansiosa para estar preparada", disse a Ms. Vdovych na época, com o cabelo loiro longo preso novibet fortune tiger duas tranças sob um boné verde florestal. Com um número de seus amigos e familiares lutando na guerra contra a Rússia, ela disse que se sentia importante estar pronta para qualquer situação.
