Softonic review

A realistic football game on your mobile device

Total Football is a

free-to-download sports game developed by Studio Vega Private Limited. This app allows you to play a real-life 11v11 soccer match on your mobile device. The game includes multiple game modes, player teams from all over the world, realistic 3D graphics, and FIFPro licensed players with more than 60,000 professional players.

This Total Football

game offers a realistic and engaging experience, which is one of its primary benefits.

You will feel a sense of enjoyment similar to watching soccer matches on TV. This game is simple to play because the controls are straightforward.

Participate in 11v11

matches

The Total Football game engine is notable for its innovative artificial intelligence system and motion-matching technology, making the game appear more realistic. The game has excellent 3D graphics that make it seem like you are playing in real-life soccer matches. This game includes different modes that you can play. You can choose to challenge other players or face the computer bot on your own.

Nevertheless,

the primary goal of this game is to compete in intense 11v11 matches using any team you want. Moreover, you can compete for trophies and medals in many competitions, such as leagues and cups. All of the players in this game have been licensed and accepted by FIFPro, meaning that all their authentic {img} and names can be used.

You can customize

the logos and jerseys of teams in your league, making them look however you want. You can also play this football game offline on your mobile device anywhere and anytime without being connected to any internet connection. However, users complain that they have trouble controlling where their players go when passing or shooting. The AI movement does not reflect proper positioning for a given situation.

Still worth

trying

Total Football is a beautiful game that allows you to experience the feeling of playing an actual match by yourself. It offers realistic 3D graphics, straightforward controls, and various game modes. However, it has some minor problems while playing this game, such as bugs and glitches that cause your players to behave abnormally during matches. The AI does not respond well to the player's situation.
