Building a Telegram Bot for Cowin Shot Slots Rajesh Rajamani · Follow Published in

CloudForDummies · 5 min read · May 13, 2024 -- 1 Listen Share

Cowin Shot Slot

availability chase has become an extremely competitive space with the gap in supply and demand in India . Several techies are doing their best to educate and empower people with one of the largest vaccination drive in the world's 2nd most populous country.

Here is my recipe to provide timely alerts to those in search for a CoWin slot

Assumptions: I assume you have some idea about oth AWS Lambda , Python programming and Telegram to proceed further.

Remember to read the last section of this article

Architecture

Architecture

I was motivated to use AWS Lambda given the simplicity of deploying the code and being able to scale up and scale down .

Telegram

was my choice to broadcast the messages given the flexibility it has in creating a bot , channel and the "200,000" subscribers limit to any broadcast channel you create.

That's convenient.

Step 1: Bot Creation with Telegram

If you have not already signed up

for Telegram , I think its time you do one . Proceed after you have created your Telegram ID and signed up.  
Telegram provided the ultra-simple way to create your own bot . You can chat with “@botfather“ a specialized Telegram Bot that can assist you

First , open up your Telegram app on phone and search for “ @botfather ”

botfather

Click “Start” to communicate  
communicated started with botfather

Now we

want to create a newbot . Use the command “/newbot” and proceed with the process.

Ensure the following.

a. Select a unique name for your bot

b. Get the

Authorization token ( save it some where we need it shortly )

c. Set up a Description

for your bot

Step 2: Channel Creation with Telegram

A Bot account can be used to

respond to messages ( essentially reply ) . However that’s not convenient if we have to transmit messages to large audience . In such situations it’s useful to use “Channels”

. So let’s create one.

New Channel

Name your Channel

Once the channel is created , you

need to add the Bot created in step 1 as an administrator to enable sending broadcast messages .

It’s such a good idea to limit the rights the bot will have for this channel.

Step 3: Create Lambda Function

I’m not going to deep dive about how to create the Lambda Function .

Note : The script I have provided may not be the most optimized one . I have purposefully left it generic for customization . Please feel free to use it as you please.

Things to note while creating the Lambda Function

Ensure to create

your Lambda Function in ap-south-1 “Mumbai Region” Ensure to keep your execution trigger to not exceed 100 API calls within a 5 minute interval .

The lambda function

has 2 critical steps

a. Fetching data from the Cowin API for the district / districts defined in the districts variable ( lines 15–48 )

b. Broadcasting the message to

Telegram . ( lines 57–74 )

Observe that in line 67 I’m invoking the Telegram API with

the botapikey (parameter botapikey) from step 1 and the channel ID ( parameter chatid ) from step 2 and the message to be transmitted ( which is essentially the records that i fetched from the Cowin API )

url =

“//api.telegram/{botapikey}/sendMessage?chat\_id={chatid}&text={finalmessage}”

St

ep 4: Schedule the Lambda Function

For this I'm using AWS CloudWatch .

Click on

Rules

Create a New Rule

Use a Cron Expression here to specify how frequently you want

to run the function. Other considerations such as concurrency , scaling can be done at

the Lambda function window.

Use Crontab.guru if in doubt .

My Bot is

broadcasting

Strategy Points to keep in mind :

The same approach is being used by

several tech enthusiasts to provide customized updates . And this means the Cowin API

Server is taking a lot of hits. Avoid throttling your requests to the API . You may end

up getting blocked interim. Set your schedule for fetching the API sensibly. Sometimes

the data can be in cache and upto 30 minutes old ( refer to the API Documentation ) If

possible group with other like minded enthusiasts to narrow down your scope of search

like a particular district , city , pincode whatever it is . Respect fair use policies

of all the involved technologies such as AWS , Telegram , API Setu . It's a beautiful

thing that almost all of these services are free of cost . Let's respect that and dont

get greedy with it. Secure your bot API Keys with environment variables to avoid bot ID

getting misused.

If you come across a suggestion , alternative approach , help please

shout out. Glad to help .

## 3. slot calendar :cassino grátis betano

Tres países de África Occidental se han separado de una agrupación regional de 15 miembros que durante mucho tiempo ha garantizado la libre circulación de personas y bienes entre sus economías estrechamente entrelazadas, lo que further desestabiliza una región que alberga a casi 400 millones de personas y está amenazada por violentos insurgentes.

Los líderes de Burkina Faso, Mali y Níger anunciaron el fin de semana su retiro "irreversible e inmediato" de la agrupación, la Comunidad Económica de Estados de África Occidental, conocida como ECOWAS. Dijeron que están creando su propia confederación.

Los tres países, todos gobernados por líderes militares amigables con Rusia, abarcan más de la mitad de la región geográfica de la agrupación y son algunos de sus países más poblados. Sin embargo, no son las economías más grandes de la región y, como naciones sin litoral, todas dependen del acceso a los puertos de los países costeros para el comercio exterior.

"Nuestra región está en riesgo de desintegración", dijo Omar Alieu Touray, el presidente del brazo ejecutivo de ECOWAS, el domingo.
