Poker has many game variants, but most use the same ranking system. In most popular games like Texas Hold'em poker, 2 a standard poker hand order chart is used to determine who wins at showdowns. Often referred to as a poker 2 cheat sheet, in reality it simply outlines the game's rules for determining a winning hand. Knowing poker rankings won't give 2 you an edge, but lacking a fundamental knowledge about hand strength will put you at a substantial disadvantage.

Poker Hands Rankings 2 These poker hand rankings are based upon the probability of each occurring, with the rarest holdings having the highest value. 2 In a few games the probabilities and rankings differ, but for most variants, including Texas Hold'em, winning poker hands are 2 determined in this order: 1. Royal Flush: The best hand in poker, although it doesn't occur very often. Still one 2 of the most iconic {img} in the game, it's the highest possible straight flush consisting of A, K, Q, J 2 and 10 of the same suit. 2. Straight Flush: Technically a Royal Flush is just the best possible straight flush, 2 which is a hand that is both a straight and a flush. 3. Four-of-a Kind: Also known as 'quads', this 2 is a hand made up of four cards of the same value, plus one extra card. 4. Full House: Often 2 referred to as a 'boat', a full house poker hand consists of three-of-a-kind plus a pair. 5. Flush: A flush 2 is a hand where all five cards are the same suit. 6. Straight: A straight is made up of five 2 cards of consecutive value, but not the same suit. 7. Three-of-a-kind: Three cards of the same value plus two non-matching 2 extra cards. This hand is known as 'trips' if the board is paired, or a 'set' if the the player 2 holds a pocket pair. 8. Two-pair: A hand that includes two pairs plus one extra card. 9. One-pair: A hand 2 that includes two cards of the same value, plus three other non-matching extra cards. 10. High Card: When you have 2 five non-matching cards that do not make a flush or a straight, the hand with the highest-valued single card wins.

What 2 is a Poker Hand? A poker hand is made up of five cards. Once all the board cards have been 2 dealt, Texas Hold'em players construct their best hand using any combination of the five board cards and their own two 2 hole

cards. The two remaining unused cards are disregarded.

Playing the Board Some poker variants, such as Omaha, obligate players to 2 use (some of) their hole cards to build their five-card poker hand, but with Texas Hold'em hands there is no 2 such requirement. It is therefore possible for the best five cards in a hand to be the board cards, in 2 which case any players still left in the pot after the final round of betting would tie and split the 2 pot equally amongst themselves. What if more than one player has the same strength hand? In poker, it's possible for 2 multiple players to hold hands of equal strength. When such a situation arises with a hand that uses all five 2 cards, like a flush, straight, or full house, and the card values are identical for these players, the pot is 2 split equally among them. However, certain poker hands do not utilise all five cards, such as pairs, two pairs, three-of-a-kind, 2 and four-of-a-kind. In these cases, when players in the hand have the same value pair, two pairs, three-of-a-kind, or four-of-a-kind, 2 the winner is determined by the player with the highest value extra card, commonly known as the 'kicker'. For instance, 2 if two players have the same two pairs, the player with the highest fifth card wins the pot. If they 2 happen to have the same value kicker, they would 'split the pot', sharing the winnings equally. The kicker plays a 2 crucial role in breaking ties and determining the ultimate winner when players have hands of equal rank.

Suits The only purpose of suits in 2 poker is to make flushes. There is no hierarchy among the suits; they all hold equal rank, and in the 2 case of a tie, they are not considered in determining the winning poker hand. Which starting hands to play and 2 when? So, what is the best hand in poker to start with? That's easy, probably everyone already knows that AA 2 is the best Texas Hold'em starting hand, but what are the other good poker hands to be dealt?

Starting Hand 2 Example Nickname Pocket Aces AcAs Pocket Rockets Pocket Kings KhKs Cowboys Pocket Queens QcQd Ladies Pocket Jacks JhJd Fishhooks Ace-King 2 Suited AsKs Big Slick Pocket Tens TcTd Train Tracks Ace-King Offsuit AsKd Anna Kournikova Ace-Queen Suited AhQh Big Chick Pocket 2 Nines 9c9h Red Balloons Ace-Jack Suited AsJs Ajax All of the hands in this list of the best poker hands 2 are premium starters and are often winning poker hands that can be opened with (make a bet) from almost any 2 position. But there is much more to learn about which other hands to play and when. There is no simple 2 method or Texas Hold'em cheat sheet to avoid the hard study and effort that the world's best players employ to 2 become champions and masters of the game. Like any sport or pastime, you get out of poker what you put 2 into it. Only a very small number of players are naturally gifted, the majority need to study to understand and 2 improve at playing poker. To ensure a smoother introduction to the game and when to open with good poker hands, 2 here are a few crucial things you should be aware of. Position This refers to the position of players at 2 the poker table relative to the dealer (button). Poker is a turn-based game, with the action moving in a clockwise 2 direction around the table after each hand. Each player takes it in turn to be 'the dealer' and at most 2 home games this means they actually have to deal out the cards around the table, but online and in most 2 poker rooms this is done by the house. In a nine-handed game, the names of the positions on the poker 2 table are: Button (BTN): the player in the dealer position is referred to as being 'on the button' and gets 2 to act last on all betting rounds

the player in the dealer position is referred to as being 'on the button' 2 and gets to act

last on all betting rounds Cut Off (CO): the player seated to the right of the 2 player on the BTN

the player seated to the right of the player on the BTN Hijack (HJ): the player seated 2 to the right of the CO, two seats to the right of the BTN

the player seated to the right of 2 the CO, two seats to the right of the BTN Lojack (LJ) : the player seated to the right of 2 the HJ, three seats to the right of the BTN

: the player seated to the right of the HJ, three 2 seats to the right of the BTN Under The Gun+2 (UTG+2): the player seated to the right of the LJ 2 and three seats to the left of the BB

the player seated to the right of the LJ and three seats 2 to the left of the BB Under The Gun+1 (UTG+1): the player seated two seats to the left of the 2 BB

the player seated two seats to the left of the BB Under The Gun (UTG): the player seated to the 2 left of the BB and the first to make a betting decision pre-flop

the player seated to the left of the 2 BB and the first to make a betting decision pre-flop Big Blind (BB): the player seated two to the left 2 of the BTN and the first to make a betting decision post-flop

the player seated two to the left of the 2 BTN and the first to make a betting decision post-flop Small Blind (SB): the player seated to the left of 2 the BTN and the second to make a betting decision post-flop The small and big blinds are forced bets that 2 players must make before each hand starts, creating the initial pot that players will be competing for in the hand. 2 The small blind amount is half the size of the big blind. After the small blind and big blind are 2 posted, the other players at the table (starting with UTG) must then decide whether to call (match) the big blind, 2 raise (increase) the bet, or fold (discard their hand). The action proceeds clockwise around the table until all players have 2 made their decisions. In any poker hand, a player is said to be in position on another player if they 2 act after that player.

Blinds and Antes The two players to the left of the dealer have to post obligatory bets 2 before any cards have been dealt. These are called blinds, with the player to the immediate left of the dealer 2 posting what is known as the 'small blind' while the next player to the left posting the 'big blind', which 2 is double the size of the small blind. Some games also have antes, which are posted by all players and 2 are much smaller than the blinds. The blinds and antes ensure there is already something in the pot to play 2 for as soon as the hand begins. Importance of Position Position at the poker table plays an important role in 2 decision-making. If you are in early position and are first to make a betting decision, you have to be mindful 2 of the fact that everyone else at the table gets to decide after you, which makes you vulnerable to raises. 2 The later your position on the table relative to the button, the fewer players there are to act after you 2 to make a betting decision, meaning fewer opportunities for your opponents to make a raise. In earlier positions, when you 2 are one of the first players to act, you have to be more selective about which hands to open the 2 pot with than you do when you are in one of the later positions. For example, while raising with A2 2 suited in late position might be a good idea, it's not such a great decision to make if you are 2 one of the first players to act, as it's a marginal hand that should often fold to a re-raise... and 2 there's lots of players left to act who can decide to do just that.

are 2 activated upon first deposit from the poker client. Tickets expire after 35 days and the playthrough bonus after 60. £1 2 GBP = €1.1875. Selected games only. BeGambleaware. - Full Terms Apply

Stack Sizes Stack sizes are also an important consideration when 2 it comes to making your opening move. Unless it's the first hand of a session, players will likely have varying 2 chip stack sizes, which are best described in terms of how many big blinds (bb) worth they have. It is 2 important to be aware of the sizes of the stacks of all other players at the table, as it will 2 guide your betting decisions. For example, you might want to open in late position in order to see a flop 2 with a speculative hand like 98 suited. However, if there is a very short-stacked player still to act behind you, 2 it may not be a good spot for seeing a flop, as there is a high chance the short stack 2 player will make an all-in bet (jam) in response to your initial raise. This would force you to either call 2 or fold, which might not be the best choices for your particular hand. When you have a small stack, your 2 options become limited and you're often looking for spots to shove all your remaining chips into the middle. Small pocket 2 pairs might be good hands to jam with on a short stack, but position is still important. Pocket threes for 2 example, might be a great hand to shove with on a 15bb stack on the button, but from early position 2 not so much, as you are more likely to run into a higher pocket pair when so many players are 2 still to act. Range The range of starting hands you should decide to open a pot with is based on 2 your position at the table and your stack size. In early positions these ranges are quite tight, consisting mainly of 2 the best suited starting hands on the grid and pairs, but as your position moves around the table, opening ranges 2 become much wider. Hands that would be automatic folds in early position can be good candidates to raise with from 2 the later spots on the table. Note also that starting hands with two cards of the same suit have greater 2 equity than those with unsuited cards. Some suited hands will be good to play from certain positions, while their unsuited 2 counterparts might not. Bet Sizing While bet sizing post-flop can be extremely varied, pre-flop is much more straightforward. You should 2 probably just use one pre-flop opening bet size, as you may be giving away info about the strength of your 2 hand if you choose varying sizes. However, if you have a shorter stack (under 20bb) you may wish to deviate 2 and simply open with the minimum size permitted, to preserve your remaining chips in situations when you may have to 2 fold to a re-raise.
