Abstract

Snail's embryotoxicity test is a suitable approach for toxicity assay of traditional and emerging pollutants, environmental risk assessment, as well as screening and development of new molluscicides. Among the snail species, *Biomphalaria* spp. has been indicated as a promising model system for developing standardized test protocols for assessing the chemical toxicity using early developmental stages. Thus, the current study aimed to review the data available in the scientific literature concerning the experimental approach, type of chemicals and the response of multiple biomarkers (survival, hatching rate, development delays, morphological and behavior changes) in snail embryos applied in toxicity tests. Revised data showed that the use of *Biomphalaria* embryos to assess chemical toxicity began in 1962. Snail's embryotoxicity test was applied mainly for analyzing the toxicity and development of new molluscicides, while its use in ecotoxicological studies is emerging. *Biomphalaria glabrata* was the main species analyzed. Embryos exposed to chemicals showed bioaccumulation, mortality, hatching inhibition, development delays, and morphological malformations, which were classified into four categories (hydropic, shell, cephalic and unspecified malformations). Besides, research gaps and recommendations for future research are indicated. Overall, the results showed that the *Biomphalaria* embryotoxicity test (BET) is a suitable tool for toxicity and health risk assessment.

About Bang Bang Games

At Bang Bang Games they call themselves a boutique slot studio, and they live up to this definition. It's a small company that creates unique content that stands out. Just a few people are working for the studio, but that's enough to generate thrilling ideas for games and deliver fantastic slots.

Founded in 2024, the

developer doesn't have the urge to supply a large volume of content. Instead, it rolls out a small number of titles a year. With up to 10 people on board, it would be impossible to ensure world-class content and at the same time a high output level.

There isn't much information about Bang Bang Games available as the company doesn't even have its website after three years on the market. But players shouldn't be concerned about its legitimacy. The developer is registered in the UK and got licensed there in 2024. Contributing to the company's trust level is the fact that the studio is a part of the YG Masters program launched by Yggdrasil.

Its first games

were developed exclusively for Endemol Shine 9 Gaming in 2024. The same year the studio joined YG Masters to expand its reach and gain more exposure. The video

slots feature vibrant artwork and exciting gameplay. They are usually packed with one bonus 9 game and a couple of boosters. The games are translated into over 25 languages and can be played on desktop 9 as well as mobile devices.
