Getting Started

Playing real money poker online is as simple as making a first deposit or winning a few bucks in an Internet freeroll.

Sign up for one of our recommended websites using a top bonus code, pick a deposit method, and head to the Cashier tab. In seconds you'll be able to load your account with USD, GBP or Euros.

The only decision you'll have to make then is at which table you should play.

Advantages of Real Cash Poker

Playing real money poker online is as simple as making a first deposit or winning a few bucks in an internet freeroll.

Sign up for one of our recommended websites using a top bonus code, pick a deposit method, and head to the Cashier tab. In seconds you'll be able to load your account with USD, GBP or Euros.

The only decision you'll have to make then is what tables to play at.

Linux Poker Online

Linux is an open-source operating system which works in the same way as Windows or Mac OS X. It's popular with programmers, in particular, as it can be altered and improved for a variety of uses if you have the know-how.

Linux works on all computers (and a lot of handheld devices too), but as it's not as widespread as traditional systems, most poker sites don't support it.

But despite the relative lack of support among websites offering online poker, Linux players can still find ways around it.

Linux System Requirements and Alternatives

The problem with a lot of real-money poker rooms is that they don't run special native clients in Linux, and most have no plans to make one, either. But that doesn't mean Linux users have to desert online gambling entirely.

There are certain ways around non-Linux sites. The easiest option is to download a program called WINE (look for v0.9.1 or later direct from the website: <http://winehq>).

WINE lets you run traditional Windows apps on Linux computers. It's not like a full-on Windows emulator, but it does let you play individual poker clients as and when you load them up.

No Download Options

If WINE isn't your thing, non-download poker sites can be played via your Linux web browser. Just log on with your regular Internet poker username and password, and enjoy Flash poker games via your browser.

Luckily, media players like Flash operate on Linux again after a period being discontinued for Linux systems (download version 11.2, or the latest your machine can handle).

Meanwhile, Java-operated instant-play poker clients can also be played on Linux computers.

Find the Best Linux Online Poker

While native clients for Linux poker online are hard to find in 2024, it doesn't mean users are frozen out.

At OnlinePoker, our list of top Linux poker online rooms for non-download or Windows is unrivalled on the net. It's easy to enjoy the same online poker; Linux users can also access the same, great welcome bonuses when they sign up.

Just scour our leading real-money Linux online poker reviews and pick a site that's right for you. We have the latest ratings on real money net sites with leading security, great software and the best range of poker gaming on the web.

Are There Poker Sites Just For Linux?

Unfortunately, in 2024 there are few native options for Linux poker online. But as long as you're au fait with installing programs like WINE or Java onto your Ubuntu, Fedora or Red Hat system, there's no reason you can't crush Internet poker.

For great mobile poker online, Linux operators can also enjoy Texas Hold'em and other card games on the move via their handheld tablet or smartphone.

While poker websites are playing catch-up with offering all forms of online poker, Linux systems can still match their Windows and OSX cousins, and best of all, Linux systems rarely crash. It's great not having the worry of your PC shutting down when you're in the middle of a hand!

País que descarta acusaciones creíbles de crímenes de guerra

I srael está ignorando acusaciones creíbles de crímenes de guerra durante una campaña militar
en la que sus acciones están siendo investigadas por posible genocidio. La nación está siendo
cada vez más agresiva en su respuesta a Hamas, después de que este grupo matara a 1,200
ciudadanos israelíes y tomara a 253 como rehenes. La búsqueda de venganza ha llevado a un
conflicto cada vez más destructivo.

Aunque la reciente violencia es sin precedentes en su ferocidad, Israel tiene una historia de
comportamiento rebelde. Sin embargo, un problema más profundo yace bajo la desafiante
manera en que los miembros de extrema derecha del gabinete israelí responden al aviso del
presidente Joe Biden de que Estados Unidos podría retener las armas si Israel invade la ciudad
sureña de Rafah en Gaza. No parece haber límites a lo lejos que los extremistas en Israel están
dispuestos a ir en desprecio a la opinión mundial.

La comunidad internacional no está dispuesta a mirar hacia otro lado

La comunidad internacional no está dispuesta a quedarse de brazos cruzados y ver cómo Israel
continúa actuando con impunidad. Se está buscando un régimen cada vez más riguroso de
sanciones para convencerlo de que cambie de rumbo. Los países están cortando los vínculos
diplomáticos, deteniendo las ventas de armas y abogando por la soberanía palestina. La decisión
de Turquía de suspender el comercio con Israel dañará. Bélgica está pidiendo sanciones de la
UE a las importaciones de territorios palestinos ocupados. Un titular de Haaretz sugiere un

cansancio generalizado e indiferencia: "Israel ya está convirtiéndose en un paria internacional. ¿Le importa a los israelíes?"

Diplomacia internacional favorece un alto el fuego entre Israel y Hamas

La diplomacia internacional favorece un alto el fuego entre Israel y Hamas, la liberación de rehenes israelíes y un plan a largo plazo para desmantelar asentamientos ilegales y un regreso eventual a las fronteras de Israel de 1967, en las que los israelíes judíos constituyen una clara mayoría democrática. El primer ministro israelí, Benjamin Netanyahu, se burla de tales ideas. Sus votantes no están lejos, modelados por la acumulación gradual de asentamientos y confiscaciones de tierras. Ha surgido una opinión predominante en Israel de que el país no tiene más remedio - por razones de seguridad - mantener el control de los territorios ocupados y violar las resoluciones de la ONU que exigen que se retire.

Consecuencias de la acción militar y la construcción de asentamientos

Hoy está claro que las consecuencias de la acción militar y la construcción de asentamientos para la mayoría de los palestinos son la amenaza de muerte inminente, el desplazamiento forzoso o la pérdida de tierras y medios de vida, con poca opción más que exiliarse.

Necesidad de un régimen de sanciones inteligente

Las sanciones contra los colonos israelíes en Cisjordania y las organizaciones sin fines de lucro que financian las campañas de colonos han tenido algún efecto. Pero lo que realmente se necesita es un régimen de sanciones más efectivo que penalice a los bancos que apoyan actividades ilegales, las empresas que construyen en tierras expropiadas y la Organización Sionista Mundial, una ONG israelí con poderes gubernamentales para expropiar tierras.

Israel está acelerando la construcción de asentamientos

El primer ministro israelí, Benjamin Netanyahu, está agotando el reloj. Está tratando de encontrar el momento oportuno para postularse a la reelección como el destructor de Hamas. Está apostando a que Donald Trump, que considera que los asentamientos son legítimos, regrese al poder. La ocupación israelí está en el corazón del extremismo del gobierno israelí. Se necesita un régimen efectivo de sanciones porque una empresa ilegal y violenta representa grandes peligros para la paz y la seguridad de Israel, así como para el orden internacional basado en reglas.
