ABOUT MAC POKER SITES

It used to be genuinely difficult to find an online poker site for Mac aside from no download poker options. But now all the top online poker sites - 888poker, PokerStars, partypoker offer a Mac online poker client to download. Including Mac-compatible tracking software and free Mac poker apps for iPhone or iPad. Below are some of the most frequently asked questions we get about playing online poker on a Mac or a Mac mobile device like the iPhone/iPad.

Difference

Between Mac Poker for Download and Mac Poker Instant Play

There are three basic forms

online poker software comes in - a full-feature, downloadable software client you download to your desktop or laptop computer, a mobile poker app you can download to your smartphone or tablet and "instant play" or "no download poker."

The first is,

obviously, the most feature-packed and stable with all kinds of customization options. It needs the power of a full computer to run at its peak capacity although it takes up very little of your available computer space. This is what most people who play online poker on their home computer (desktop or laptop) use to play online poker.

The

second-most popular option these days is a mobile poker app, which you can download to your smartphone or tablet. For Mac users, that means an iPhone or iPad.

These are also

very good software products. All of the major poker sites now have top-flight iPhone poker apps that offer virtually all of the features of the desktop client but with

simplified tables, betting functions, lobbies etc.

You can still access the full range

of games available to all players but things like multi-tabling and customization are slightly limited. Still, for the average player, you can hardly tell the difference.

There are new variations like Fast-Fold Poker (you're immediately moved to a new table with a new hand when you fold). And Jackpot Spin & Gos where prize pools are randomly multiplied before the tournament starts. This makes mobile poker better and slicker than ever before. Case in point are the SNAP games on the updated 888 mobile software.

The third, and least popular form of playing online poker, is

'in-browser' or 'no-download.' This simply means you play the games via an Internet browser (eg. Explorer or Firefox) without downloading any of the software.

This is fine

(and for people who only wish to play play-money-poker usually more than adequate) but for playing real-money poker online there's no question downloading either the full Mac poker software or Mac poker app is better for both quality of play and security.
