About Online Roulette

As Albert Einstein himself said, "You cannot beat a roulette table unless you steal money from it", but roulette players select this game because of its combination of luck and betting strategies. There's nothing quite like the unmistakable sound of a small marble rattling around the outside edge of a wooden roulette wheel until it finally drops into a numbered pocket. This sound is instantly recognisable to fans of this centuries-old game. A game that consists of an easy-to-understand premise, making it accessible to new players, and continuously interesting to experienced players.

You'll find that the majority of online roulette games follow the same set of rules. You'll place your wagers by placing virtual chips on the number board or the racecourse. You are betting on where you think the marble will land as the roulette wheel slows down. You can place multiple bets for every spin, just as long as you have the chips to support them (never bet more than you can afford). Once you are satisfied with your bets, your croupier will spin the wheel in live roulette, or you can press the relevant button to make the roulette spin in simulated online roulette games. You win if the marble lands on one of the pockets you wagered on. See, simple! The nice thing about roulette bets is that they are personalised to you, depending on your level of understanding and experience.

Roulette Strategy Guides

When great casino games are created, there is no doubt that some players will attempt to implement strategy into their gameplay. With some games, it is understandable and actually works quite well - with others, not so much. Roulette is a game where hundreds of players have created their own strategies that they believe bring them success. The most popular is the Martingale system, which

6 attempts to use the balance of probability to compensate for losses and leave a small profit for players. Yet the 6 fact of the matter is that nothing is guaranteed in roulette. You could lose 100 times in a row, and 6 you could win 100 times in a row. Both are highly improbable but nowhere near impossible.

roulette strategies, take a look at our roulette strategy blog and check out systems that you may have 6 never heard of before. Our favourite comes from a man who has gotten younger as the years have gone by 6 - James Bond.

### All About Roulette Betting

#### The basic

rules of online roulette are fairly easy to understand: you place your wagers 6 on the betting table, the croupier spins the wheel and sends the marble in the opposite direction. The marble then 6 drops into a numbered segment, and you win or lose based on whether you guessed correctly.

Despite its simple rules, betting 6 is what makes roulette

such an interesting game. On the betting table, you'll see a series of squares featuring numbers, 6 colours, and text. Some tables also have what is known as the 'race track' because of its shape. The racetrack 6 is not necessary for gameplay, but it does make wagering more efficient for games in which it is used.

In either 6 case, the

numbered and coloured spaces on the interior of the betting area represent what are known as inside bets. 6 For example, if you place your chips on the red 18 square, that means you are guessing that the marble 6 will land on the corresponding number 18 segment on the wheel.

All the spaces on the exterior represent what is known 6 as outside bets.

These are bets involving the two possible colours, odd and even numbers, and groups of numbers that 6 represent from 12 to 18 roulette wheel pockets. There is no limit to the number of bets you can place, 6 just as long as you have enough chips.

You control your

own decisions by using computer-generated buttons. Place your bets by 6 dragging chips onto the betting table, then click 'Spin' to set the wheel in motion. One important note: in some 6 online roulette games, all the bets you place on the table will remain intact for the next spin unless you 6 click the 'Clear' button first. Make sure you read up on the game you're playing and familiarise yourself with how 6 the controls work so you don't lose more money than you anticipated.
