roulette, (from French: "small wheel"), gambling game in which players bet on which red or black numbered compartment of a revolving wheel a small ball (spun in the opposite direction) will come to rest within. Bets are placed on a table marked to correspond with the compartments of the wheel. It is played in casinos worldwide. Roulette is a banking game, and all bets are placed against the bank—that is, the house, or the proprietor of the game. As a big-time betting game, it has had its popularity superseded in the United States and the Caribbean islands by others, notably craps, blackjack, and poker. Fanciful stories about the origin of roulette include its invention by the 17th-century French mathematician Blaise Pascal, by a French monk, and by the Chinese, from whom it was supposedly transmitted to France by Dominican monks.

In reality, roulette was derived in France in the early 18th century from the older games hoca and portique, and it is first mentioned under its current name in 1716 in Bordeaux. Following several modifications, roulette achieved its present layout and wheel structure about 1790, after which it rapidly gained status as the leading game in the casinos and gambling houses of Europe. During the years 1836 to 1933, roulette was banned in France.

Equipment The roulette table is composed of two sections, the wheel itself and the betting layout, better known as the roulette layout. There are two styles of roulette tables. One has a single betting layout with the roulette wheel at one end, and the other has two layouts with the wheel in the centre. The wheel spins horizontally. Heading the layout design, which is printed on green baize, is a space containing the figure 0 (European style) or the figures 0 and 00 (American style, although such wheels were used also in Europe during the 18th and 19th centuries). The main portion of the design is composed of 36 consecutively numbered rectangular spaces, alternately coloured red and black and arranged in three columns of 12 spaces each,

The main portion of the design is composed of 36 consecutively numbered rectangular spaces, alternately coloured red and black and arranged in three columns of 12 spaces each,

beginning with 1 at the top and concluding with 36 at the bottom. Directly below the numbers are three blank spaces (on some layouts these are marked "2 to 1" and are located on the players' side of the table). On either side of these or along one side of the columns are rectangular spaces marked "1st 12," "2nd 12," and "3rd 12" on American-style layouts. On European-style layouts these terms are "12p" (première), "12m" (milieu), and "12d" (dernière douzaine). Six more spaces are marked "red" (rouge), "black" (noir), "even" (pair), "odd" (impair), "1–18" (low, or manque), and "19–36" (high, or passe). The roulette wheel consists of a solid wooden disk slightly convex in shape. Around its rim are metal partitions known as separators or frets, and the compartments or pockets between these are called canoes by roulette croupiers. Thirty-six of these compartments, painted alternately red and black, are numbered nonconsecutively from 1 to 36. On European-style wheels a 37th compartment, painted green, carries the sign 0, and on American wheels two green compartments on opposite sides of the wheel carry the signs 0 and 00. The wheel, its spindle perfectly balanced, spins smoothly in an almost frictionless manner. The standard roulette table employs up to 10 sets of wheel checks (usually called chips). Each set is differently coloured; each traditionally consists of 300 chips; and there is one set for each player. The chips usually have a single basic value, although some casinos also sell chips of lesser value. The colour of the chips indicates the player, not the value of the chips. If a player wishes to buy chips of slightly higher value, the croupier places a marker indicating that value on top of the table's stack of chips of the colour corresponding to the chips purchased. Most casinos also have high-value chips that can be wagered at any gaming table. Unlike roulette chips, these have their numbered values printed on them. Bets It is possible to place the following bets in roulette: (1) straight, or single-number (en plein), in which the chips are placed squarely on one number of the layout, including 0 (and also 00 on American layouts), so that the chips do not touch any of the lines enclosing the number; a winning single-number bet pays 35 to 1 (for each unit bet, a winning player receives his original bet and 35 matching units); (2) split, or 2-number (à cheval), in which the chips are placed on any line separating any two numbers; if either wins, payoff odds are 17 to 1; (3) street, or 3-number (transversale pleine), in which the chips are placed on the outside line of the layout, betting the three numbers opposite the chips; payoff odds on any of the three numbers are 11 to 1; (4) square, quarter, corner, or 4-number (en carré), in which the chips are placed on the intersection of the lines between any four numbers; payoff odds are 8 to 1; (5) line, or 6-number (sixaine or transversale six), in which the chips are placed on the intersection of the sideline and a line between two "streets"; payoff odds are 5 to 1; (6) column (colonne), or 12-number, in which the chips are placed on one of the three blank spaces (some layouts have three squares, marked "1st," "2nd," and "3rd") at the bottom of the layout, thus betting the 12 numbers above the space; payoff odds are 2 to 1; (7) dozens (douzaine), or 12-number, in which the chips are placed on one of the spaces of the layout marked "12," betting the numbers 1–12, 13–24, or 25–36; payoff odds are 2 to 1; (8) low-number or high-number, in which the chips are placed on the layout space marked "1–18" (manque) or on the space marked "19–36" (passe); payoff is even money; (9) black or red, in which the chips are placed on a space of the layout marked "black" (noir) or on a space marked "red" (rouge; some layouts have a large black or red diamond-shaped design instead of the words); payoff is even money; (10) odd-number or even-number, in which the chips are placed on the space of the layout marked "odd" (impair) or on the space marked "even" (pair); payoff is even money. On layouts with a single zero (European style), the 0 may be included in a 2-number bet with any adjoining number, in a 3-number bet with 1 and 2 or with 2 and 3, and in a 4-number bet with 1, 2, and 3 at

the regular odds for these bets. With the American-style 0 and 00, a 5-number line bet also is possible, the player placing his chips on the corner intersection of the line separating the 1, 2, 3 from the 0 and 00, with payoff odds of 6 to 1.

Dez pessoas se afogam ao tentar cruzar o Darien Gap entre Colômbia e Panamá

Dez pessoas se afogaram blackjack seguro um rio transbordado ao tentar atravessar uma região sem lei que conecta a Colômbia ao Panamá, destacando os perigos contínuos do Darien Gap, apesar dos esforços para parar a migração irregular na região.

As dez pessoas, cuja nacionalidade ainda não foi identificada, provavelmente estavam blackjack seguro direção aos EUA quando foram arrastadas pelas fortes correntes, disse a força de fronteira do Panamá blackjack seguro um comunicado. Seus corpos foram encontrados blackjack seguro um rio perto da comunidade indígena de Carreto na costa do Caribe.

As autoridades disseram que isso foi uma das maiores taxas de mortalidade por afogamento blackjack seguro memória recente.

A estação chuvosa atual torna a região pantanosa e montanhosa mais perigosa, especialmente devido aos rios que cortam a floresta tropical.

No ano passado, pelo menos 48 pessoas morreram ao tentar a jornada árdua de uma semana, a maioria delas se afogando.

Os migrantes também correm o risco de assaltos sexuais generalizados por bandidos armados, além de infecções tropicais agressivas, cobras venenosas e ravinas íngremes.

Apesar dos perigos, mais de meio milhão de pessoas fizeram a travessia perigosa blackjack seguro 2024 - o dobro do número de 2024.

O Darien Gap é a única travessia terrestre para as pessoas que viajam para o norte pelas

Américas, e o tráfego de pé aumentou desde a pandemia.

À medida que a migração se torna um assunto mais proeminente nos EUA nas eleições presidenciais de novembro, o governo dos EUA está aumentando a pressão sobre os governos regionais para conter o fluxo de migrantes.

O presidente do Panamá, Jose Raul Mulino, que assumiu o cargo blackjack seguro 1º de julho, havia se comprometido a fechar o corredor selvagem com o governo dos EUA pagando para voar os migrantes de volta para suas casas, mas desde então tem abrandado blackjack seguro postura.

Mulino disse a jornalistas blackjack seguro 16 de julho que o Panamá não poderia forçar os migrantes a pegar aviões de volta e que a repatriação seria voluntária.

A polícia de fronteira do Panamá instalou cerca de três milhas de arame farpado para bloquear alguns trilhos na floresta tropical e encaminhar os migrantes para um único ponto de recepção.

Não está claro se os dez migrantes que se afogaram decidiram cruzar o Darien durante a temporada chuvosa mais perigosa devido ao discurso repressivo de Mulino, mas suas mortes mostram que tentar tornar a rota mais desafiadora não impedirá que as pessoas a tomem, disse Blaine Bookey no Centro de Estudos de Gênero e Refugiados.

"Essas mortes trágicas sublinham que as políticas draconianas não servem de dissuasão.

Quando as pessoas estão fugindo pela blackjack seguro vida, elas estão dispostas a correr riscos de uma morte incerta blackjack seguro vez de ficar presas blackjack seguro uma casa blackjack seguro chamas onde a morte é certa", disse Bookey.
