International multi-sport events for disabled athletes

Ice Sledge Hockey: United States (blue shirts) vs Japan (white shirts) during the 2010 Paralympics in Vancouver.

The Paralympic sports comprise all the sports contested in the Summer and Winter Paralympic Games.

As of 2020, the Summer Paralympics included 22 sports and 539 medal events,[1] and the Winter Paralympics include 5 sports and disciplines and about 80 events.

[2] The number and kinds of events may change from one Paralympic Games to another.

The Paralympic Games are a major international multi-sport event for athletes with physical disabilities or intellectual impairments.

This includes athletes with mobility disabilities, amputations, blindness, and cerebral palsy.

Paralympic sports refers to organized competitive sporting activities as part of the global Paralympic movement.

These sports are organized and run under the supervision of the International Paralympic Committee and other international sports federations.

History [edit]

Archery: Lindsey Carmichael from the United States, at the 2008 Paralympic Games in Beijing.

Organized sport for persons with physical disabilities developed out of rehabilitation programs.

Following World War II, in response to the needs of large numbers of injured ex-service members and civilians, sport was introduced as a key part of rehabilitation.

Sport for rehabilitation grew into recreational sport and then into competitive sport.

The pioneer of this approach was Ludwig Guttmann of the Stoke Mandeville Hospital in England. In 1948, while the Olympic Games were being held in London, England, he organized a sports competition for wheelchair athletes at Stoke Mandeville.

This was the origin of the Stoke Mandeville Games, which evolved into the modern Paralympic Games.[3]

Organization [edit]

Globally, the International Paralympic Committee is recognized as the leading organization, with direct governance of nine sports, and responsibility over the Paralympic Games and other multi-

sport, multi-disability events.

Other international organizations, notably the International Wheelchair and Amputee Sports Federation (IWAS), the International Blind Sports Federation (IBSA), International Sports Federation for Persons with Intellectual Disability (INAS) and the Cerebral Palsy International Sports and Recreation Association (CP-ISRA) govern some sports that are specific to certain disability groups.

[4] In addition, certain single-sport federations govern sports for athletes with a disability, either as part of an able-bodied sports federation such as the International Federation for Equestrian Sports (FEI), or as a disabled sports federation such as the International Wheelchair Basketball Federation.[5]

At the national level, there are a wide range of organizations that take responsibility for Paralympic sport, including National Paralympic Committees,[6] which are members of the IPC, and many others.[citation needed]

Disability categories [edit]

Cycling: Karissa Whitsell and Mackenzie Woodring (pilot) from the United States, compete in Beijing 2008

Biathlon: Andy Soule from the United States, at the 2010 Paralympics in Vancouver.

Athletes who participate in Paralympic sport are grouped into ten major categories, based on their type of disability:

Physical Impairment - There are eight different types of physical impairment recognized by the movement:

Impaired muscle power - With impairments in this category, the force generated by muscles, such as the muscles of one limb, one side of the body or the lower half of the body is reduced, e.g. due to spinal-cord injury, spina bifida or polio.

- With impairments in this category, the force generated by muscles, such as the muscles of one limb, one side of the body or the lower half of the body is reduced, e.g. due to spinal-cord injury, spina bifida or polio.

Impaired passive range of movement - Range of movement in one or more joints is reduced in a systematic way.

Acute conditions such as arthritis are not included.

- Range of movement in one or more joints is reduced in a systematic way.

Acute conditions such as arthritis are not included.

Loss of limb or limb deficiency - A total or partial absence of bones or joints from partial or total loss due to illness, trauma, or congenital limb deficiency (e.g. dysmelia).

- A total or partial absence of bones or joints from partial or total loss due to illness, trauma, or congenital limb deficiency (e.g. dysmelia).

Leg-length difference - Significant bone shortening occurs in one leg due to congenital deficiency or trauma.

- Significant bone shortening occurs in one leg due to congenital deficiency or trauma.

Short stature - Standing height is reduced due to shortened legs, arms and trunk, which are due to a musculoskeletal deficit of bone or cartilage structures.

- Standing height is reduced due to shortened legs, arms and trunk, which are due to a musculoskeletal deficit of bone or cartilage structures.

Hypertonia - Hypertonia is marked by an abnormal increase in muscle tension and reduced ability of a muscle to stretch.

Hypertonia may result from injury, disease, or conditions which involve damage to the central nervous system (e.g. cerebral palsy).

- Hypertonia is marked by an abnormal increase in muscle tension and reduced ability of a muscle to stretch.

Hypertonia may result from injury, disease, or conditions which involve damage to the central nervous system (e.g. cerebral palsy).

Ataxia - Ataxia is an impairment that consists of a lack of coordination of muscle movements (e.g. cerebral palsy, Friedreich's ataxia).

- Ataxia is an impairment that consists of a lack of coordination of muscle movements (e.g. cerebral palsy, Friedreich's ataxia).

Athetosis - Athetosis is generally characterized by unbalanced, involuntary movements and a difficulty maintaining a symmetrical posture (e.g. cerebral palsy, choreoathetosis).

Visual Impairment - Athletes with visual impairment ranging from partial vision, sufficient to be judged legally blind, to total blindness.

This includes impairment of one or more component of the visual system (eye structure, receptors, optic nerve pathway, and visual cortex).

[7] The sighted guides for athletes with a visual impairment are such a close and essential part of the competition that the athlete with visual impairment and the guide are considered a team.

Beginning in 2012, these guides (along with sighted goalkeepers in 5-a-side football became eligible to receive medals of their own.[8][9]

Intellectual Disability - Athletes with a significant impairment in intellectual functioning and associated limitations in adaptive behaviour.

The IPC primarily serves athletes with physical disabilities, but the disability group Intellectual Disability has been added to some Paralympic Games.

This includes only elite athletes with intellectual disabilities diagnosed before the age of 18.

[7] However, the IOC-recognized Special Olympics World Games are open to all people with intellectual disabilities.[10][11]

The disability category determines who athletes compete against and which sports they participate in.

Some sports are open to multiple disability categories (e.g.

cycling), while others are restricted to only one (e.g.

Five-a-side football).

In some sports athletes from multiple categories compete, but only within their category (e.g. athletics), while in others athletes from different categories compete against one another (e.g. swimming).

Events in the Paralympics are commonly labelled with the relevant disability category, such as Men's Swimming Freestyle S1, indicating athletes with a severe physical impairment, or Ladies Table Tennis 11, indicating athletes with an intellectual disability.[12]

Classification [edit]

Swimming at the 2008 Summer Paralympics

A major component of Paralympic sport is classification.

[7] Classification provides a structure for competition which allows athletes to compete against others with similar disabilities or similar levels of physical function.

It is similar in aim to the weight classes or age categories used in some non-disabled sports.

Athletes are classified through a variety of processes that depend on their disability group and the sport they are participating in.

Evaluation may include a physical or medical examination, a technical evaluation of how the athlete performs certain sport-related physical functions, and observation in and out of competition.

Each sport has its own specific classification system which factors into the rules for Olympic competition in the sport.[citation needed]

Summer Paralympics [edit]

Current summer sports [edit]

The following table lists the currently practiced Paralympic sports,

Wheelchair basketball: Iran vs South Africa at the 2008 Summer Paralympics.

Discontinued summer sports [edit]

Winter Paralympics [edit]

Current winter sports [edit]

Alpine skiing: Tala Skeels-Piggins from Great Britain at the Winter Paralympics 2010 in Vancouver.

Discontinued winter sports [edit]

Sport Eligible impairments Governing body Paralympic Games status Physical Visual Intellectual
Ice sledge racing Yes Winter Sport (1980–1988, 1994–1998)

Possible future winter sports [edit]

Bob Balk, the chairman of the International Paralympic Committee (IPC) Athletes' Council, launched a campaign in early 2012 to have sliding sports (bobsleigh, luge and skeleton) included at the 2018 Winter Paralympics in Pyeongchang, South Korea.[13]

At the meeting in Madrid, Spain, on 10 and 11 September 2018, the IPC executive board announced that Para Bobsleigh had failed in some evaluation criteria and would not be part of the official program for the 2022 Winter Paralympic Games.[14]

Abbreviations [edit]Notes [edit]

The categories listed represent all those groups that participate in this sport at some level.

Not all these categories are represented in competition at the Paralympic Games.

The governing bodies listed represent those organizations responsible for the broadest level of participation.

In some cases, other disability-specific organizations will also have some governance of athletes in that sport within their own group.

For example, the IPC governs multi-disability athletics competitions such as the Paralympic Games; however, CP-ISRA, IBSA, and IWAS provide single-disability events in athletics for athletes with cerebral palsy, visually impaired athletes, and wheelchair and amputee athletes respectively.

Paralympic Games status details the years these sports were practiced as full medal events at the Paralympic Games.

As apostas esportivas ganham popularidade a cada dia, mas o que exatamente significa isso?

Apostas esportiva, podem ser consideradas como apostas na qual os indivíduos colocam suas estacas ibet sports ibet sports competições e jogos esportivos. Cada apostador faz ibet sports seleção baseada ibet sports ibet sports probabilidade, o que é mais conhecido como “odds”.

As

odds

são usadas para estabelecer as probabilidades de um certo resultado ocorre ou não. Elas demonstram as possibilidades de acertos para cada tipo de aposta.

Essas odds também demonstram o montante que pode ser ganho caso a aposta seja bem-sucedida.

Unibet Sportsbook is currently legal in five U.S. states: Arizona, Indiana, New Jersey, Pennsylvania, and Virginia.

[ibet sports](#)

During the play of the hand five community cards are dealt in the middle of the table. Each player can see those cards and use them to form the best possible five card poker hand by combining them with their hole cards. Unibet Poker uses six handed cash game tables. When three players join the table, a hand will start.

Desde el final de la guerra civil y el genocidio de los tutsis en 1994, el Frente Patriótico Ruandés (RPF) ha dominado el espacio político de Ruanda.

El líder del RPF, Paul Kagame, ha obtenido más del 90% en las últimas 2 tres elecciones presidenciales y, esta semana, parece haber batido su propio récord, ya que los resultados provisionales muestran que ha ganado el 99,15% de los votos. Pero esta victoria se ha logrado excluyendo a varios opositores prominentes, entre ellos a mí mismo. Esto hace que las elecciones recién concluidas no sean diferentes de las anteriores y solo subraya la falta de democracia en el país.

En 2010, regresé voluntariamente a Ruanda desde el exilio en los Países Bajos con la intención de registrar mi partido político y presentarme a las elecciones presidenciales programadas para más tarde ese año. Pero fui arrestado inmediatamente después de criticar públicamente la política de reconciliación del gobierno ruandés en relación con el genocidio de 1994, y fui condenado tras un juicio que fue ampliamente condenado como motivado políticamente y profundamente injusto.

Bloqueado de la participación política y la reunificación familiar

Fui liberado de la prisión por Kagame en 2024, pero aún estaba prohibido que abandonara el país. Cinco años después de mi liberación, solicité mi rehabilitación a la corte suprema de Ruanda para poder presentarme a las elecciones presidenciales más recientes y viajar en el extranjero para visitar a mi familia en los Países Bajos. La corte rechazó mi solicitud. Durante los últimos 14 años, no solo he sido bloqueado para presentarme como representante político, sino también para reunirme con mis seres queridos. He perdido las bodas de mis hijos, el nacimiento de mis nietos y no he podido visitar a mi esposo gravemente enfermo.

Amnistía Internacional describió las elecciones de 2024 en Ruanda como haber tenido lugar en un "clima de miedo y represión", mientras que en 2024, otros retadores creíbles al partido gobernante, como Bernard Ntaganda, también han enfrentado problemas legales sistemáticos injustos. Al igual que yo, fue arrestado al comienzo del período de registro de candidatos presidenciales en 2010 y cumplió cuatro años en prisión. Al igual que yo, solicitó su rehabilitación, con la esperanza de participar en las elecciones de 2024, pero el tribunal rechazó su apelación. Todo esto forma parte del silenciamiento de la disidencia que ha caracterizado el gobierno de 24 años de Kagame.

Prevención de opiniones divergentes

Pero prohibir legalmente a los candidatos de presentarse no es la única manera en que el sistema ha impedido que se escuchen opiniones diferentes. La constitución se modificó el año pasado para permitir que se realicen elecciones presidenciales y parlamentarias al mismo tiempo. Pero los medios de comunicación estatales y los medios independientes en Ruanda cubrieron abrumadoramente la campaña presidencial sobre los candidatos parlamentarios. Este paisaje mediático sesgado impidió que los aspirantes a parlamentarios comunicaran adecuadamente sus programas políticos, lo que socavó una discusión pública comprensiva sobre el futuro de Ruanda. Este fenómeno solo refuerza la falta de diversidad que existe como resultado de prohibir candidatos presidenciales como yo.

Planes concretos faltantes

En su lugar, los votantes se presentaron sin planes concretos sobre cómo abordar problemas reales, como las 2 crecientes desigualdades y la creciente deuda, las relaciones deterioradas con los países vecinos, especialmente la República Democrática del Congo y 2 Burundi, o los refugiados ruandeses que se asientan en estados vecinos o están dispersos por el mundo. Estos desafíos corren 2 el riesgo de traer más inseguridad a Ruanda en el futuro cercano. El RPF está ansioso por atribuirse la recuperación 2 económica de Ruanda, que ha visto crecer el PIB en un promedio del 7,2% al año entre 2012 y 2024. 2 Es menos vocal sobre los informes del Banco Mundial que casi la mitad de la población vive con menos de 2 R\$2.15 (£1.65) al día.

La defensa de la democracia de Kagame

Durante la campaña, Kagame se esforzó por defender la democracia de 2 Ruanda, que, según dice, se basa en la singularidad del país. Llamó a la juventud ruandesa a defenderla contra aquellos 2 que critican al gobierno en las redes sociales. Incluso encontró tiempo para mencionar mi nombre de manera despectiva dos veces 2 durante la campaña, a pesar de que estaba prohibido que participara.

La necesidad de una democracia funcional

Al ser preguntado sobre sus 2 prioridades para los próximos cinco años, Kagame respondió que tiene la intención de continuar por el mismo camino de reconstrucción 2 de Ruanda. Pero mi país solo prosperará cuando tenga una democracia funcional que permita la disidencia, el debate y diferentes 2 perspectivas. Ganar elecciones presidenciales con casi el 100% de los votos no es una señal de popularidad, sino de falta 2 de competencia. Mi pregunta es, si Kagame es tan popular, ¿por qué se le impide a sus retadores creíbles postularse 2 contra él en las elecciones? Este resultado electoral ha demostrado una vez más que Ruanda aún tiene un largo camino 2 por recorrer en su camino a la democracia.
