SlotRank is an objective ranking that describes slot game popularity based on exposure in online casinos.

How do we calculate SlotRank 3 for UK and other markets?

We scan

casino sites for 50+ markets on a daily basis to find out what games 3 they have and which games they place in their lobby. The crawling is performed in incognito mode which removes any 3 personalized game suggestions from the lobby results.

SlotCatalog

defines the casino lobby as the main section of the casino sites where 3 players can find games. When there are several sections of games, we take the section that is opened by default 3 when a visitor lands at the casino site. This selection is evaluated on a case by case basis.

In some cases, 3 there are several sections and no clear main lobby, this is often a part of Playtech powered casinos which have 3 sections like Vegas, Casino, Games etc. In those cases, we consider all these sections a casino lobby and each will 3 be crawled individually.

A portion of these casinos have enough estimated traffic to be included in the SlotRank calculation, the rest 3 will be excluded since their exposure to players is neglectable.

We score points to each game in our database based on 3 its positions in the crawled casinos. Points are distributed based on lobby position (where position 1 will give the most 3 points). If a game is absent in the casino lobby it will get a score of 151. This position score 3 is then multiplied by a weight-multiplier.

The

weight-multiplier is determined by the geographical popularity of the casino site, based on estimated 3 traffic. The more popular the casino, the more weight to the games that are displayed in good positions. (For example: 3 the largest UK casino will have full weight, and the least popular UK casino included in the ranking will have 3 the smallest weight-multiplier).

Data is fundamental for any decision making in the fast-moving digital casino landscape both at the operator, affiliate, 3 and developer level. Therefore to provide an unbiased platform of quantitative and qualitative data

crunched by our data scientists, we believe it offers real-time transparency, information and value for our customers.

The data is aggregated on a country basis and yields the relative SlotRank metric for all of our different markets.
