You can use PokerTracker 4 in Sit n' Go, Cash, MTT, 6 Satellite, Spin & Go tournaments and, of course, in cash games like Texas hold'em and Omaha poker. The app works 6 with Windows and Mac devices. All the marks and reviews say it's probably the best online poker toolbox in one 6 place.

We

recommend that instead of 6 reading good reviews, you try the app yourself now. You can do this completely free of charge. The developers of 6 PokerTracker give you a 30-day free usage period. During this time, you will be able to try the software for 6 free in Hold'em or Omaha games and get a closer look at how it works. If after the trial period 6 you decide that you don't like the software, you can simply not buy it. However, we can safely say that 6 you will be hard pressed to find a better HUD alternative on the market than PokerTracker4.

PokerTracker 4 - Why try 6 it?

If you want to make money playing

poker, you will have to accept that if you don't use the software, 6 your opponents will.

A monthly subscription or a one-off fee is definitely worthwhile, especially if you are an active player. 6 Since it is almost impossible to predict all possible scenarios and outcomes in your head, and to read the actions 6 of all the players at the table at the same time, it's worth using a software program such as PokerTracker 6 4 to help you. Because you can try it for free.

What is PokerTracker 4? (PT4)

PokerTracker is a

computer program. It requires Download, download (install), run and then use it immediately. PokerTracker 4 is a HUD and tracker in one.

HUD - what is it?

HUD is an

acronym for Heads-Up Display. We do not have an exact translation equivalent in the Lithuanian language, so we often hear names such as "Hood", "Heads-Up Display", or we write the untranslated name at all. In fact, HUD describes the video projection technology that creates the image in front of our eyes. In simpler terms, it adds something to a normal image on some surface.

The best example of HUDs is HUD

projections in new cars. A special projector projects important data onto the windscreen of the car (e.g. the speed, the track you are driving on, etc.). They are not there, but they are projected there. So, in fact, a HUD can also be called a projection. In the case of PokerTracker 4, the HUD projects an image "on top" of what the poker software itself is displaying. More precisely, it adds to the visible image.

In poker, the HUD acts as a tool that helps you easily see a large amount of data about the game, all at once. It fills the regular application screen with a wide range of relevant information (e.g. win probabilities, player action history, etc.).

The HUD allows you to see your odds in clear percentages and simplifies decision making. The data changes in real time, so you'll always have as much information as possible at the time you need to make your move.

Tracker - what is it?

PokerTracker is

not just a HUD or visual aid. It also has great analytical potential. Analytical tools that track and analyse the progress of the game are called trackers. With PokerTracker4 it is very easy to keep track of your past game statistics, to see various indicators such as Flop Flop %, Preflop Limp %, Pre Flop Raise % and others. By looking at this data and analysing it, you can not only see how much you've won, but you can also find out what you could do differently to win more, what mistakes you're making, where in the game you're getting pressured and so on. New and experienced players alike will notice and appreciate how many features the app has. There are some disappointments with some of the other HUD-type applications. Other HUDs or tracker-type applications offer only very superficial real-time assistance. PokerTracker 4 puts so many analytical tools on a plate, collects so much data and works so well that you really don't need to buy any add-ons or plug-ins to improve your results.

Where can I play

PokerTracker 4?

Perhaps the most interesting thing that puzzles every player before choosing a poker software is where will it be available to play? As you probably all know, an app needs to support a poker room and be compatible in order to take advantage of the features it offers.

PokerTracker shines brightly here again, as both Windows and Mac users can play it pretty much anywhere. It's true that the latter will enjoy a slightly narrower list of rooms, but the result is still very good.

PokerTracker 4

6 poker rooms for Windows PCs available 888Poker, PokerStars, Winamax, MPN and many more.

Full list:

Mac owners can connect to 888Poker, 6 PokerStars, Winamax, Merge, Full Tilt and several others. Full list:

We advise you to check that the software supports your favourite 6 poker room before you buy or invest in it. Otherwise, it's worth upgrading to one of the supported rooms, at 6 least for a trial period. Believe me, the benefits will be noticeable, so it pays to play wherever you find 6 it easier. Don't forget that you can register in some rooms at an exclusive PokerSchool discount. Don't miss out on 6 this opportunity!

How to get started?

This section will give you a brief overview of how to download, sign up and start 6 using the application. However, there is also a video guide to help beginners. You will need a little patience at 6 the beginning. Although it will only take you up to 10 minutes, certain steps require attention and patience. We've put 6 it all in one place for your convenience.

How do I download and install the

PokerTracker 4 HUD?

Click on the link. 6 Download the application and run the downloaded file. The installation will start. Accept the terms and conditions, select the location 6 on your disk where you want the programme to be saved. Wait for the installation to finish. It usually takes 6 a few seconds. Start the app. Enter your registration code (if you have one) in the window that pops up, 6 or choose a 30-day free trial with Texas Hold'em or Omaha poker games. In the next window, the program will 6 ask you to subscribe to a PostgreSQL database. Please accept this, as this database/application is free and allows you to 6 store your hand history. The recording will be done automatically. Accept the PostgreSQL server settings (do not change anything) and 6 complete the installation (takes about a minute). Now you will need to create your own database using PostgreSQL. You can 6 have more than one of these databases, but one will be enough to start with. Give it a unique name 6 (if you wish). Do not change any other settings. Create the database and accept the offer to have PokerTracker HUD 6 link the data to PostgreSQL. In about half a minute everything should be connected. Proceed to the final configuration (select 6 the currency you are playing in, then select the rooms you will be playing in, and check that the hand 6 history settings in the poker room software match the PokerTracker 4 settings.

Finally, harmonise the layout and number of Seating. The

6 configuration of the individual poker rooms follows, but do it according to your needs. Basically, the programmers have prepared clear 6 guides for each room, which are easy to follow and to calibrate all settings. Finally, select the desired HUD view 6 (how the data appears on the screen). Next, in the app, click on Play Poker and Get Hands While Playing 6 in the top left.

That's it, let's play!

P.S. Please note that the HUD will only activate when you have played one 6 hand. Don't be alarmed.

"With the

PokerTracker HUD, you can 'read' the situation at key moments. In online 6 poker, it is essential to read your opponents' behaviour. This information will allow you to see and see exactly who you are up against.

However, the PokerTracker database 6 is the element that plays the most important, game-changing role. This is the feature of the software that is most 6 appreciated by poker professionals. It is in the database that we can check our hands and filter the information to 6 find gaps and close them. It's also where we can analyse our opponents' play to find the best ways to 6 beat them, and understand what strategies they are using that might be better than ours at the moment.

Finally, if you're 6 serious

about online poker, it's time to download a tracking/HUD software like PokerTracker4.
