PAYSAFECARD: GAME PROCEDURE

Games have small differences in the procedure of the game.

Let's review some of them and start with what this game actually is.

ROULETTE

PAYSAFECARD. WHAT IS ROULETTE DIVIDED INTO?

We can divide roulette into 3

components:

Croupier (dealer)

Croupier is the main and only judge in the game. Its role

is to take bets, pay winnings, spin the roulette wheel and throw the ball. In online casinos, the program acts as a croupier (in other words, the croupier is absent).

Game

table

On the gaming table the numbers are presented in a special format. In the role of money, there are usually gambling chips that are exchanged for real money.

It is known,

that there are two types of field on the game table:

Internal field. It contains all

numbers from 0 to 36. Each three consecutive numbers form a row, vertical lines form three columns of twelve numbers each.

External field. It is located on the edges of the

playing field for external bets. Every such field corresponds either to certain numbers or to some qualities of numbers (even / odd).

ONLINE ROULETTE USING PAYSAFECARD: KINDS OF CHIPS

Traditionally, American casino roulette online PaySafeCard is played with

multi-colored chips, and each player has different chips at the table, which greatly

simplifies the process of making bets and paying winnings. Such chips are usually bought from the dealer on a particular gaming table, and are not used in other games.

After the player completes the game, his chips are exchanged either for money or for

traditional chips.

In European casinos, standard chips are used. The dealer uses a special spatula to clear the bets that have been already played.

ROULETTE PAYSAFECARD

CASINO: ARE THERE 100% WORKING TACTICS?

There is not any 100% working tactic for

winning. Yes, there are schemes, that being combined with intelligence and accuracy, can increase the chances of winning, but those that guarantee success do not exist.

If

you are offered to buy such a scheme, do not let somebody to make a fool of you. Most likely, this is just a way to get money out of you for scammers.

ROULETTE ONLINE

PAYSAFECARD: PAYSAFECARD PAYMENTS AND BANK TRANSFERS

Many Internet users are faced with

the inconvenience associated with paying through a bank account, playing in casinos and making deposits, for example. The inconvenience is that the payment is delayed by the banks, you have to wait a long time for crediting to the other account.

The situation

with PaySafeCard is completely different. Funds transfer (making roulette PaySafeCard deposit or withdrawal) occurs immediately after the introduction of the 16-digit code.

This is the main advantage of PaySafeCard, since it is a prepaid system. Instant transfer does not depend on the day of the week, day, political situation in the country or relations with the country where the payment will be made. Use online roulette PaySafeCard payment method and enjoy the service.

ROULETTE BETS & PAYOUTS

The

croupier offers all players sitting at the table to make bets (depending on the type of roulette, they may differ). The table represents not only the roulette itself, but also the field on which the same numbers are displayed in the form of a table as on the roulette wheel, as well as various types of bets. As soon as the croupier says the classic phrase that has already become: "The bets are made, there are no more bets", the acceptance of bets is considered complete and the croupier spins the roulette wheel in one direction and starts the ball in the opposite direction. It is forbidden to touch the rotating wheel and the ball or otherwise act on them. In online roulette the user also cannot change the bet or make an additional one after the wheel has started to rotate. You should remember about roulette wheel strategies before making bets.

As

soon as the ball enters the cell, the croupier announces the winning number. The income from the winnings is distributed between the winning bets and the casino, but if "0" fell out – all bets go to the casino income. It should be borne in mind that in all casinos there are restrictions on both the minimum and maximum rates when playing no deposit bonus roulette for each position.

Winning in roulette is the key point in which

both players and casinos are interested. Winning depends on how the roulette bet is made in online casinos. The more accurately you try to select an object, the greater will be your potential payout if you win. There are several types of bets available to the player. Each type of bet has its own odds of winning roulette and roulette payouts.

TYPE OF BET DESCRIPTION PAYOUT Straight Bet This is a bet for one specific number to choose on roulette wheel. 35:1 Split Bet This is a bet on 2 contiguous numbers at the same time, which include, among other things, the rates "zero" -1, "zero" -2 and "zero" -3. If in the first case the bet is placed directly on the number, in the second case it is placed on the border of two contiguous cells on the roulette

table. 17:1 Street Bet This is a bet for three numbers of one row. The chip is placed on the border of the inner and outer betting areas. 11:1 Corner Bet This is a bet on four contiguous numbers. The chip is placed at the point where these numbers touch. 8:1 Line Bet This is a bet on 2 contiguous rows. The chip is placed under the selected column, there are three of them and they are marked as "2 to 1". 2:1

The player can combine

bets. For example, he can put both on the "red" and "black" at the same time. You can put on a "dozen" and "odd." You can even make a bet on the "red", on the "black" and on the "zero", closing all options for the loss. But since in the "Zero" rate, there is a limit on the maximum amount, and in this case you will not be able to win at the casino with a probability of 100% or build a winning strategy.
