The Exotic Side of French Roulette - Neighbours Of Zero, Orphans And Neighbours And Thirds Of The Wheel Of Tiers

Roulette 0 is, at heart, a simple game. So trust French casino-dwellers to develop some rather more intricate ways in which to 0 play. If you're given the chance to play a French-style roulette table, then you should, as this will probably give 0 you access to the punter-friendly En Prison/La Partage rules. Combine these with a single zero layout (unlike double-zero American-style tables), 0 and the house edge falls to around 1.4%. However, if you are taking a spin on a true French table, 0 you'll find much that's, erm, foreign. And most of this will be due to the existence of bet types like 0 Voisins du Zero, Tiers du Cylindre, and Orphelins.

Whereas most roulette tables (in land casinos) assign coloured chips to the players, 0 so that winning bets can be easily identified, the chips on French tables differ only in the numerical amounts they 0 have printed on them. With nothing to distinguish one player from another, it becomes important not to have too many 0 chips on the board at the same time. The need for space partly inspired the invention of an additional grid, 0 called the 'Racetrack'. This oval-shaped section sits to the side of the main play area. it features all of the 0 same numbers - 0 to 36 - but within a different layout. Its point is to act as an extension 0 to the main grid, and to encourage some of the players to switch to exotic 'French Bets'. These French bets 0 were traditionally referred to as 'Call Bets' or 'Announced Bets', as they were too specialist to be featured on the 0 main tables, and players had to call out when they wanted to play them.

So what exactly are these bets, and 0 what do they consist of?

The Ins and Outs of Call Bets

If you look at the main wheel for roulette, you'll 0 see that it can be broken down into two large slices, along with a couple of smaller segments sitting between 0 them in the middle. Each of these sections contains a set of numbers that make up one of the following 0 bets:

Voisins du Zero - Meaning 'neighbours of zero', this bet refers to the 17 numbers on the wheel that reach 0 from 22, right round to 25. Slap-bang in the middle of this grouping is the Zero. Hence, all of the 0 numbers around it are its 'neighbours'.

Tiers du Cylindre - Translating as 'thirds of the wheel', this bet-type corresponds to an 0 exact third of the wheel, specifically the third at the bottom of the wheel. Its numbers stretch from 33 right 0 round to 27.

Orphelins - These 'orphans' are two small segments that take in the eight numbers not associated with either 0 the Voisins du Zero or Tiers du Cylindre. The numbers covered by Orphelins are 9, 31, 14, 20 and 1 0 on one side of the table, and 17, 34 and 6 on the other.

When you place one of these bets, 0 you effectively cover all of the numbers in the sequence. Some of the numbers, though, will be covered more than 0 once, or will have a different payout. In the next section, we'll look at exactly which numbers are placed, and 0 how this affects the payouts in each case. Note, though, if you simply want to place the bet, you don't 0 really need to know exactly which numbers are involved - it'll simply be a matter of clicking on the relevant 0 option on the table. These exotic combinations may be found in a separate section, such as the 'Call Bets' menu. 0 If you're not interested in the exact details of the bets themselves, you might want to skip the next section.

The 0 Exact Numbers and Maths Involved in Each Bet

Tiers du Cylindre is the simplest in practice. You take six chips and 0 place each of them on a different number combination: 5/8, 10/11, 13/16, 23/24, 27/30, and 33/36. Each of the six 0 combinations gives you a 5.4% chance of success (2 out of 37), and you have a 32.4% chance of winning 0 overall. Each time you won with a combination, you would end up with a profit of 12 chips - 17 0 chips for the win, minus the five chips that you would have lost on the other combinations.

Orphelins are also fairly 0 straightforward. Here, you place a single chip on the number 1, and four further chips on the following number combinations 0 6/9, 14/17, 17/20, and 31/34. You obviously have only a 2.7% (1 out of 37) chance of winning with the 0 1, although you would scoop a profit of 31 chips when successful - 35 chips for the win, minus the 0 four chips lost on the other combinations. The four two-number combinations, on the other hand, would each give you a 0 profit of only 13 chips (17 chips for the win, minus the four losing chips), but would pay out 5.4% 0 of the time. This works out as a total win rate of 24.3%.

Most complex of all is Voisins du Zero. 0 This takes in 17 different numbers, and involves the placement of nine different bets. Five of those bets would involve 0 single chips being placed on five different number combinations: 4/7, 12/15, 18/21, 19/22, and 32/35. As before, these would each 0 carry a 5.4% chance of success, and would yield a 9 chip profit after deducting the eight chips lost on 0 other bets. However, Voisins du Zero also involves the placement of another four chips on slightly more elaborate combinations. Two 0 chips are used to cover 0, 2, and 3. If the ball lands on one of these numbers, you win 0 15 chips overall - the double-payout of 22 chips, minus the seven chips lost on the remaining combinations. The success 0 rate here is a healthy 8.11% (3 out of 37). You would also put two remaining chips on 25, 26, 0 28, and 29. These bets carry a win rate of 10.8% (4 out of 37). Voisins du Zero, then, has 0 wildly differing payouts according to which of the number combinations comes good. Overall, though, it amounts to a 45.9% chance 0 of success.

Do the Bets Work?

So are any of these bets worth playing? Well, the success rate certainly differs, with Voisins 0 du Zero winning 45.9% of the time, Tiers du Cylindre 32.4% of the time, and the Orphelins just 24.3%. On 0 the other hand, the Voisins du Zero requires more chips (nine), and the Orphelins fewer(five). In fact, the house edge 0 for all three bets works out as exactly the same - 2.7%. The same as the standard house edge, then. 0 So, for all their fanciness, these elaborate bet types give you no more chance of success than a standard red/black 0 play.

That's not to say there aren't some advantages. If you suspect there may be some sort of defect (most likely 0 an imbalance) in the equipment, causing numbers in one section of the wheel to come up again and again, there's 0 a good chance that the affected numbers will be covered predominantly by one of the three French bets above. In 0 that case, playing one of these bets might be a good way to take advantage of the bias, but without 0 tipping off the dealer that a specific part of the wheel may be defective. All in all, though, we suspect 0 that most players will

only want to use these strategies if they wish to show off their in-depth knowledge of 0 roulette bets.
