However, due to local laws, bonuses at UKGC-licensed casinos are very weak or nonexistent: take this into account when making your choice.

Playing at UKGC-licensed

casinos lets you take advantage of advanced responsible gambling tools, such as registering to a national database (GamStop) to control your gaming habits even more.

However, no matter which casino you prefer, you must be at least 18 years old to gamble.

UK players can play at these UKGC-licensed casinos or any international casino that accepts them as a member: both are legal.

Any operator that gets a license from

the UKGC can offer legal casino games (including roulette) in both land-based and online forms.

The Gambling Act 2005 is the law that legalized gambling, and the UK Gambling Commission (UKGC) is the agency that regulates it.

If you want to play online

roulette in UK, you don't need to worry about legality: all forms of gambling (both land-based and online) are legal in the United Kingdom.

The roulette game has a simple

principle: you try to guess where the ball dropped on a spinning wheel will land. There are 37 or 38 numbers in total on this wheel, depending on the variant played. Except for one, half are red, and half are black. This design allows many betting options to emerge. For example, you can bet on a single number. You can try your luck with multiple combinations, such as all numbers from 1 to 12. Likewise, bets on which color the outcome will be or odd/even numbers are also accepted.

Each of these betting

options has a different chance of winning. For example, the odds of winning bets on a single number are very low, but bets covering 18 numbers (such as red/black) have a very high chance of winning. Payment amounts are determined accordingly: bets with a low chance of winning payout big, and bets with high chances payout low. For your better understanding, a play roulette simulation will work step by step as follows:

In

3D RNG games, you place your bet first. In live games, you have to wait for the dealer's declaration that new bets are being accepted.

In any case, it is sufficient to

place casino chips, each with a different monetary value, on top of the betting options on the roulette table. These chips represent your wager and the numbers on them show the value of that bet. For example, if the chip reads "20", it stands for a 20 GBP bet.

You can place chips on multiple positions at the same time, that is, you can place multiple bets in a single round.

In 3D RNG games, you start the game by pressing the

"spin" button. In live games, after all players have placed their bets, the croupier does it by spinning the wheel and dropping a ball on it.

In any case, the ball will

land in a pocket when the spin ends. If your bet covers this pocket, you will get a payout based on your bet type. Otherwise, you can try your luck again in the next round.
