por ro lado, os rastreadores podem ser usados na iPoker Network, Winning Poker Network, 888poker's software is divided into several tabs and submenus to quickly filter the format of your choice.

If you are new player, you can click on the Beginners tab to display several Cash Game, Sit'n'Go and Tournament options. The stakes of these tables are rather low, so that you can discover which format you like the most and get familiar with the interface.

The Quick Seat tab also allows you to join a game in a matter of seconds. Just specify several criteria, like the game type or the stake, and click the Play now button. The software will automatically find the perfect table for you. If you feel like playing a tournament, you can also enter one of the upcoming tournaments listed in the lower side of the software.

If you are just not sure which game you want to join, or if you want to display the exhaustive list of Cash Game tables and tournaments, you can select the All games tab. 888poker even allows you to bookmarks your favorite games from the My Favorites tab.

With the Play with friends tab, you can manage your own private games with your poker buddies. Create your own game, choose the stakes and the variant, and invite your friends; or simply join an existing game with the associated name and password. It is time to show your friends who is the best...

Finally, the SNAP tab gives you access to the 888poker fast-fold Cash Game format. Every time you fold on a SNAP table, you get sited to a new table with new cards. Therefore, you never have to wait for other players finishing a hand.

Whatever you do, make sure you select the right mode (Money play or Practice play) in the upper right corner: it would be a shame to find out that the money you won is not real. The Play with friends option is only available for real money games.

PokerStove is a program that calculates hand equities (i.e., expected percentage of the time that each hand wins at showdown).[3] Since poker is a game of incomplete information, the calculator is designed to evaluate the equity of ranges of hands that players can hold, instead of individual hands.[4] Pokerstove can calculate both pre-flop and post-flop equity given the community cards. Reviews [edit]

Poker instructor, Gavin Griffin, recommends PokerStove as a calculator for EV in poker[5] and considers it the best tool for calculating EV based on hand ranges.[6]
