contente:
The main game is played with a wheel and colored pockets with
alternating black and red. The total number of 4 pockets in European Roulette is 37
(numbered 1 to 36) and a green pocket marked "0". The game is very 4 similar to a
real-world casino table. The difference is that it is offered in the comfort of your
home. This 4 table game can be played on a personal computer or mobile phone. The goal is
Free Roulette Number Generator
I got your number generator right here, b**ch
Seems like
no one else made a nice roulette number generator, so I did. This is one of the many
goodies you get here at Easy Vegas that you don't get anywhere else.
If you plan to use
this to test your betting system idea, see the right and wrong way to test betting
systems.

How the numbers are generated
I wrote the generator in
Javascript, using the built-in Math.random() function. In most web browsers (Chrome,
Safari, Firefox) Javascript uses an algorithm called Xorshift128+ to generate
pseudo-random numbers. This is way more than adequate for testing betting systems.
Some
people hear that computers don't generate "real" random numbers, they generate
"pseudo-random numbers" (true), and therefore conclude that computers are inadequate
for testing betting systems, and that their systems can beat the real world of a casino
even if they can't beat the numbers generated by a computer (completely dead wrong).

For almost all intents and purposes, the numbers generated by Xorshift128+ or any of the other modern algorithms are virtually indistinguishable from real random numbers. They pass batteries of statistical tests for randomness, including frequency distribution, gaps, and repetition (or lack thereof). The bottom line is, you can't tell the computer-generated output from the real thing, and there's no statistical difference between live results in a real casino and what you get from the generator.
