Halloween (2007)\n\n Zombie's reimagining of John Carpenter's classic slasher is one of his scariest and most dramatically effective works.

The Devil's Rejects is the best Rob Zombie movie because it's better written than the rest, the characters have personalities beyond all the killing, and the acting is much better. The story is cohesive and takes its time without being sluggish, and it doesn't try to cover too much ground.

The main difference between system bets and multi (parlay) bets is that you can win a system bet even if not all your picks are correct. For example, in the case of a 2/3 system bet, you win even if only two of your three predictions turn out to be correct. Please note that the amount of possible winnings displayed when you place your bet corresponds to the maximum winnings, i.e. in the above example, they payout if all three of picks are correct. In a system bet, combinations of picks are formed. An example is shown below:

You have selected four different picks and opted for a 2/4 system bet. This means that you will be placing a total of six bets, since there are six possible winning pairs based on those four predictions. The stake per bet of EUR 0.50 is wagered on each of those six bets. According to the principle of the system bet, you win even if only two of the four predictions prove correct. The exact amount of the winnings depends on how many of the predictions prove correct.

Next, you can see that the total stake for the system bet equals EUR 3 (6 x EUR 0.50). Once you have placed the final bet, the system bet will be displayed under "My account"/"My bets". In the detailed view of bets, you can see the combinations formed with the four picks:

The more correct picks you have in your system bet, the higher the winnings. If you fail to meet the system criterion (e.g. only one pick is correct in a 2/4 system bet), you lose the bet.

Here is an overview of all the available system bets:
