How to calculate roulette payouts

Before jumping into odds and payouts, we'd recommend familiarizing yourself with roulette bet types first, or this might get confusing.

Being able to recognize the names of different bets and where you'd place your chip on the table for each one will be especially useful.

For each bet type, the potential

payout odds in roulette are stated in the form of x:1. This means you'll win x dollars for every 1 dollar you bet. For example, a single-number bet offers a payout of 35:1.

So, if you win, you'll get your dollar back plus R\$35.

Calculate your roulette winnings

with our roulette payout guide

The roulette payout chart below shows the odds for the different bets you can make in both European roulette and American roulette, as different roulette variations affect the odds. All the calculations are done for you, so you can check your potential roulette winnings at a glance as you play.

Note: If

you're curious about the math behind these, it's not too complicated. Divide the number 36 by the number of squares your bet covers on the table. Then, subtract 1 from that figure to get the payout odds. For example, a three number bet means dividing 36 by 3 to get 12, then subtracting 1 to equal 11. The payout rate for a three number bet is therefore 11:1, meaning a R\$10 bet would result in a R\$120 payout if you won.

Medidas propostas pelo governo grego para combater o excesso de turismo roulette 3d ilhas populares

With its rich history, beautiful islands, and golden beaches, Greece offers tourists many reasons to visit. However, a seemingly endless stream of tourists in recent years has caused headaches for some of its most popular destinations.

Therefore, this week, the Greek prime minister proposed a series of measures aimed at mitigating some of the growing effects of mass tourism.

The changes include significant increases in port fees for cruise ships, along with limits on daily arrivals at some of the most popular Greek islands. The measures aim to reduce the tension that the tourism industry imposes on communities and reflect a reaction against overtourism at various other important European tourist destinations.

"Tourism supports the economy with resources and significant jobs, but it has a social impact," said the prime minister, Kyriakos Mitsotakis, during his annual state-of-the-economy address in Salonica on Saturday night. He added that he was "very concerned" about the image of some of their islands in recent months due to cruise ships.
