The key objective is to predict the number on which the ball will land by placing one or more bets that cover that particular number. The wheel includes the numbers 1-36 plus a single 0 (or two zeros in the American version). After the time allocated for betting has expired, the dealer releases the spinning ball within the roulette wheel. The ball will eventually stop in one of the numbered pockets within the wheel. You win if you have placed a bet on the resulting number.

You will

notice you can place many kinds of bets on the Roulette table. Each type of bet covers a specific range of numbers, and each type has its own payout rate. When bets are placed on the numbered space or the lines between, they are called Inside Bets, while the bets made on the individual boxes below and to the left of the board are known as Outside Bets.

- place your chip directly on any single number (including zero).

-

place your chip on the line between any two numbers, either on the vertical or horizontal.

- place your chip at the end of any row of numbers. A street bet covers three numbers.

- place your chip at the corner where four numbers meet. All four numbers are covered.

- place your chip at the end of two rows on the intersection between them. A line bet includes all the numbers in both rows, for a total of six numbers.

The high stakes roulette table offers the ultimate live casino experience for a high roller player. It also includes bet placement with chips of higher values. High stakes players also usually get more time to consider their next bet and play at their own pace. The game can be rather profitable since it enables players to plan and implement a more suitable betting strategy.

The low stakes roulette experience features

modest chips that allow you to play single or multiple stakes on the table without risking a fortune. Bet directly on which slot the ball will land in, and the low stakes roulette games will yield a distinctly high return of 36 times your stake. Low stakes Roulette is the ideal introduction for those new to the casino.

European roulette is

one of the main variations of roulette you are likely to encounter at both internet and European land casinos. For starters, it must also be mentioned that there are 37 slots on the layout in this digital edition, 18 red and 18 black pockets with the numbers from 1 to 36, and one last sector for the 0 green.

This variation is essentially the

same as European roulette, in terms of the number of slots on the layout and it is also a single-zero version of roulette. The bet combinations and payouts are also the same, while the critical difference between the two variants is a cosmetic change in the layout of the French roulette. For example, the Outside bets are written in French, and not with the usual English

The main difference between the American roulette rules and

European roulette rules is that the former has an extra zero slot on the wheel, marked with a double zero. What this does is raise the house edge slightly, making the game's theoretical return to player rate 94.7% instead of the standard 97.3% usually found in the French and European games.

Speed Roulette is available on most devices and is a

fast version of the live dealer roulette. In speed roulette, game rounds typically take approximately 25 seconds between spins.

No. The live games are tested by different independent bodies to ensure that they generate fair and random results during play like other online casino games at reputable websites.

When you play roulette for money, it is crucial that you play in regulated casino providers for your safety. When selecting a gambling site for security, you should consider several important security factors.

Casinos that have SSL data encryption are the gold standard. Any website that does not include information about their encryption may not be secure. Ensure you are using anti-virus software and using firewall technology as with any sites where you make payments.

While, roulette is engaging in both land and digital casinos, the best way to play roulette is online. Not only does playing on the web allow you to play in the comfort of your own home, but it offers increased security, comfort, practically and freedom. Good casinos also take care of adhering to responsible gaming terms and offer timely support.

As with a land casino, the role is to host the game and manage the roulette table and wait while players place their bets. Once all the bets are placed, he/she will then spin the roulette wheel.

Conditions on wagering limits can vary wildly from casino to casino, but generally, you will have a much more comprehensive betting range than you will find at a land-based casino, specifically at the lower limits. With roulette live, many roulette platforms have a variety of tables with different bets; some start as little as 25p.

Yes, when you are playing live roulette, the odds for every outcome are the same as playing roulette in a physical casino.

Live roulette is streamed to your device in real time, just as if you were playing in the conditions of a physical casino. Many casinos feature live dealers in HD resolution, and you can even select your preference in terms of camera angle for the game.

You must register and play with real money to participate in live games; however, many roulette casinos offer free play games or a demo mode for their non-live titles.
