What is Short Deck

Poker?

Short-deck poker (also known as six-plus hold'em) is a new variation of traditional Texas hold'em that mostly follows the same rules albeit with a significant difference.

Short-deck poker uses a smaller 36-card deck rather than the full 52-card deck.

Most first heard of short-deck poker after it was introduced among the mix in the high-stakes cash games in Macau.

Here we go over the poker rules for Short Deck Poker.

Short-Deck Poker Rules

Before we discover how to

play short-deck poker, let's see how to get to the 36-card deck needed to play a game of 6+ hold'em.

The 36-card deck in use in poker short deck is created by removing the 2xs, 3xs, 4xs, and 5xs from the deck (16 cards).

That leaves the 6xs up through the Kxs as well as the Axs.

What about the Aces?

As in regular hold'em, in short-deck poker the

aces still count as high or low when making straights.

The lowest possible straight in

a game of short-deck poker is Ax9x8x7x6x (think of the ace as essentially replacing the missing 5x).

Poker short-deck is played similarly to regular hold'em.

Each player

receive two hole cards and use them in combination with five community cards to create the best possible hand.

A game of short-deck poker features four streets of betting:

Pre-flop Flop Turn River

However, there are some differences in the poker short-deck poker that you should know about before playing.

Short-Deck Poker Hand

Rankings

Short-deck poker can be played according to the exact same rules as regular Texas Hold'em.

The betting can be fixed-limit or no-limit (although most often the game is played no-limit), and the same hand rankings can be used as follows:

Hand Ranking

Hand Name Poker Hand Lowest High card Kx6x9x8xQx One pair KK5x8xQx Two pair KK66Qx Three-of-a-kind KKK6Qx Straight A6789 Flush KJ1069x Full house KKK66 Four-of-a-kind KKKK6x Straight flush A6789 Highest Royal flush 10JQKA

For more info about the hand rankings in poker and which hand wins, visit our guide to poker hands.

Alternative Short-Deck Hand Rankings

Short-deck poker is

played often employing a different hand ranking system. Here are the alternate hand rankings for short-deck poker (note the differences in bold):

Hand Ranking Hand Name

Poker Hand Lowest High card Kx6x9x8xQx One pair KK5x8xQx Two pair KK66Qx Straight A6789 Three of a kind KKK6Qx Full house KKK66 Flush KJ1069x Four of a kind KKKK6x Straight flush A6789 Highest Royal flush 10JQKA

As you can

see, following these alternate poker short deck hand rankings a three-of-a-kind beats a straight (instead of vice-versa), and a flush beats a full house (instead of vice-versa).

Why a Different Hand Rankings?

These changes were introduced because

the removal of cards from the standard deck alter the probabilities of making certain hands.

For example, with only nine suited cards (instead of 13), a flush is harder to make in short-deck poker than in regular hold'em.

Six-Plus Hold'em Variation — The Deal (Fifth Street)

One other popular variation often introduced in six-plus hold'em has to do with the way the river is dealt.

The game can be played according to the same procedure followed in regular hold'em, with the community cards coming in the same way — flop (three cards), turn (one card), and river (one card) — and betting rounds after each street.

More often, though, instead of a river card being dealt to complete a

five-card board, players are each dealt a third hole card instead.

Players then make

their five-card poker hands by using exactly two of their three hole cards and three of the four community cards.

The building of hands resembles the procedure followed in

Omaha poker where players must use two of their four hole cards plus three board cards to make a five-card poker hand.

Short-Deck Poker Basic Strategy

As you might imagine,

the removal of low cards and use of the 36-card deck makes it more likely to make higher value hands, a change that tends to introduce more action.

You should adjust

your thinking about relative hand values from what they are used to in regular hold'em.

The smaller deck makes it easier to make two-pair hands, which means a hand like top pair-top kicker is no longer as strong in six-plus hold'em as it is in regular hold'em.

Straights and full houses are also easier to make in six-plus hold'em than in the regular version of the game (a reason for the alternate hand rankings).

The odds of

hitting certain draws change, too, in short-deck poker.

Just to highlight one example,

filling an open-ended straight draw becomes more likely in short-deck.

While

you're still looking for the same eight outs there are fewer total cards in the deck, thus increasing the percentage you'll make your straight.

The smaller deck also affects

the likelihood of being dealt certain hands. []You're more than twice as likely to get pocket aces in short-deck poker than you are in regular hold'em!

Finally, players

being dealt a third hole card instead of there being a fifth community card obviously affects hand values as well, making it even more likely that players improve their hands — yet another factor that has to be taken into account when calculating odds and considering your final-round betting strategy.

Conclusion

Short-deck poker / 6+ hold'em

introduces several exciting twists to traditional Texas hold'em, creating an action-filled alternative that many players are finding especially enjoyable to play.

The changes from regular hold'em aren't terribly complicated, making it easy to new players to learn and play right away.

Onda de calor récord en Asia foi potencializada pela crise climática, descobrem cientistas

Uma onda de calor histórica que atingiu as Filipinas sinais greenbets abril foi possibilitada pela crise climática, segundo cientistas. Temperaturas acima de 40C (104F) atingiram grande parte do continente asiático sinais greenbets abril, causando mortes, escassez de água, perdas de colheitas e fechamentos generalizados de escolas.

O calor extremo foi tornado 45 vezes mais provável na Índia e cinco vezes mais provável sinais greenbets Israel e Palestina, segundo o estudo. Os cientistas disseram que o calor elevado agravou a crise humanitária já grave sinais greenbets Gaza, onde pessoas deslocadas vivem sinais greenbets abrigos superlotados com acesso limitado a água.

Impactos severos com apenas 1,2°C de aquecimento médio

Os resultados do último estudo a avaliar o papel do aquecimento global causado pelo homem no pioramento dos eventos climáticos extremos mostram o quão graves são os impactos, com apenas 1,2°C de aquecimento médio acima dos níveis pré-industriais nos últimos quatro anos. Outra onda de calor "impossível" atingiu a África Ocidental e o Sahel no final de março, causando mortes e alcançando 48,5°C no Mali. Mortes por calor são mal registradas sinais greenbets muitos países, mas pesquisas anteriores sugerem que milhões de pessoas morreram prematuramente nas últimas duas décadas. Na Europa, onde o registro é melhor, mortes relacionadas ao calor aumentaram 25% nos últimos dez anos.

Os cientistas advertiram sobre piores consequências. Se a temperatura global subir para 2°C, repetições do calor extremo de abril serão esperadas a cada dois a três anos nas Filipinas e a cada cinco anos sinais greenbets Israel, Palestina e países vizinhos. Centenas de cientistas do

clima de ponta disseram recentemente ao Guardian que esperam que a inação global sinais greenbets acabar com a queima de combustíveis fósseis resulte sinais greenbets pelo menos 2,5°C de aquecimento.

"Do Gaza a Deli a Manila, pessoas sofreram e morreram quando as temperaturas subiram sinais greenbets abril na Ásia", disse a Dra. Friederike Otto, do Imperial College de Londres, parte do time de estudos do World Weather Attribution (WWA). "O calor adicional, impulsionado pelas emissões de petróleo, gás e carvão, está resultando sinais greenbets morte para muitas pessoas."

A Dra. Carolina Pereira Marghidan, consultora de risco de calor no Centro de Cruz Vermelha e Crescente Vermelho, disse: "O calor realmente agravou uma crise humanitária já grave sinais greenbets Gaza, com populações deslocadas tendo acesso limitado ou nenhum a alimentos, água, cuidados de saúde e, sinais greenbets geral, vivendo sinais greenbets abrigos superlotados que prendem o calor ou vivendo ao ar livre."

O estudo do WWA examinou três regiões que sofreram calor extremo sinais greenbets abril. O aquecimento global tornou as temperaturas 1,7°C mais altas sinais greenbets Israel, Palestina, Síria, Líbano e Jordânia, e 1°C mais altas nas Filipinas, onde 4.000 escolas foram fechadas e piscinas portáteis foram instaladas para ajudar as pessoas a se refrescar. A região sul-asiática abrangia a Índia, onde a temperatura alcançou 46°C, Bangladesh, Mianmar, Laos, Vietnã, Tailândia e Camboja.

"O aquecimento global é um fator absoluto de mudança quando se trata de calor extremo", disse Otto. O estudo usou dados meteorológicos e modelos climáticos para comparar a probabilidade de ondas de calor hoje sinais greenbets dia e sinais greenbets um clima sem aquecimento causado pelo homem. Os pesquisadores descobriram que o ciclo El Niño atual, que eleva as temperaturas globais, teve pouco efeito no aumento da probabilidade das ondas de calor.

"A Ásia contém algumas das maiores e cidades de crescimento mais rápido do mundo", disse Pereira Marghidan. "Este desenvolvimento desordenado sinais greenbets muitos casos levou a um aumento de concreto nas cidades, e perdas extremas de espaço verde sinais greenbets muitas cidades." Ela disse que trabalhadores ao ar livre, como agricultores e vendedores ambulantes, e aqueles sinais greenbets moradias informais são particularmente vulneráveis e que o estudo mostra a necessidade de melhorar os programas de alerta e planejamento de ondas de calor precoces.

Estudos de atribuição sinais greenbets massa mostraram como o aquecimento global já está supercarregando o clima extremo sinais greenbets todo o mundo. A Dra. Mariam Zachariah, do Imperial College de Londres, que fez parte do time de estudos, disse: "A menos que o mundo dê passos massivos e sem precedentes para reduzir as emissões e manter o aquecimento sinais greenbets 1,5°C, o calor extremo levará a muito mais sofrimento na Ásia."
