Random Number Generator\n\n Random number generators are an essential part of slot machines. Slots are programmed with a set of possible outcomes, and each time you pull the lever or hit the spin button, the random number generator chooses which outcome will occur.

It's widely accepted among players that the optimal times to play slots are early morning or evening, with peak hours typically occurring between 8 pm and 2 am. Take some time to watch the particular machine to gauge when it is most likely to pay out.

Cash game

Cash games, also sometimes referred to as ring games or live action games, are poker games

played with "real" chips and money at stake, often with no predetermined end time, with players able to enter and leave as they see fit. In contrast, a poker tournament is played with tournament chips worth nothing outside the tournament, with a definite end condition (usually, only one player left), and a specific roster of competitors.

Rules [ edit ]

Players may freely buy into or cash out of a cash game between hands.[1] However, it is normally prohibited for a player to remove a portion of his or her chips from the table. This is known as "going south".[2] For example, if a player buys in for R\$100, then wins R\$100 (for a total stack of R\$200), the player may not remove the original R\$100 buy-in while remaining seated. He would have to forfeit his seat, possibly wait to rejoin the game, and buy in again for R\$100; however, many cardrooms prohibit the practice of buying in again unless a certain time period has elapsed before the player rejoins. Similarly, cash games are played for table stakes. If a player attempts to put additional money onto the table (from his/her wallet) in the middle of a hand, he may not do so until the conclusion of said hand.

In "no limit" poker cash games, some cardrooms have a maximum buy-in for cash games. In limit poker games, there is seldom a maximum buy-in because betting limits already limit the amount a player can wager on each hand.
