Passo 1: Entender como funcione o bônus instantâneoneo

The epazote herb is commonly used in the cuisines and traditional medicines of central and southern Mexico and Guatemala.

Epazote has a strong taste and aroma, so not everyone takes to it right away.

It can be somewhat of an acquired taste, but it adds a wonderful rustic layer of flavor to many dishes.

While it is best to use fresh epazote, the dried form can be used if no fresh herbs are available.

The peak season for the herb is in winter, but it is available year-round.

What Is Epazote?

Epazote (pronounced eh-pah-ZOH-teh) is an aromatic herb; both the fresh leaves and tender stems are used in cooking.

The epazote plant is a leafy annual or short-lived perennial plant that can reach 4 feet in height.

Its dark green, long, slender, jagged leaves end in a point.

The flowers are green and very small; they produce thousands of tiny seeds.

As an herb, it is suitable for gluten-free, vegan, vegetarian, and paleo diets.

Origins

Native to Central America, epazote has been grown for culinary and medicinal purposes for countless generations.

This herb is used in everyday cooking in the southern Mexican state of Oaxaca and the Yucatan Peninsula among the Mayan-speaking peoples.

Epazote has spread as a weed (growing in empty lots and by roadsides) throughout a large part of North and South America and even into Europe and Asia.

The word epazote derives from Nahuatl, the language spoken by Mexican Aztecs and their ancestors.

A literal translation to English would be something like "stinky sweat" (not very appetizing!).

In some parts of Mexico and Guatemala, the plant is called pazote, ipasote, apazote, hierba hedionda ("stinky weed"), pazoli, and pizate, In Peru, it is known as paico, a word that comes

from Quechua.

In English it is sometimes called goosefoot, skunk weed, wormseed, or Mexican tea; the last two of these terms allude to its medicinal use to combat intestinal parasites.

What Does It Taste Like?

Epazote has a somewhat pungent flavor profile and is described by many as "medicinal."

It has notes of oregano, anise, citrus, mint, and even tar or creosote.

The most flavor is provided by the fresh leaves and stems, and older leaves have a stronger flavor.

Dried epazote is available, but as with cilantro, the flavor is much reduced in the dried form.

The Spruce Eats / Julie Bang

Cooking With Epazote

The flavor compounds in epazote do not stand up to heating for a long time, so the herb is added to dishes near the end of cooking.

The tender leaves and stems are used, with fresh being preferred, but dried can be substituted.

One teaspoon of the dried herb is the equivalent of one fresh stem.

Aside from its function as a flavoring, epazote is also purported to reduce the gas and bloating experienced by many when eating beans and cruciferous vegetables.

Recipes With Epazote

Epazote is most frequently used to season frijoles de la olla (pot beans), especially when they are black beans.

It is also common in stews and rustic dishes made with mushrooms or corn.

A sprig of the herb is often used inside a quesadilla made with corn tortillas.

Where to Buy Epazote

Leaves and stems of this plant are used almost exclusively in its fresh form in its native land.

Bunches of it can be purchased in some Mexican grocery stores or farmers markets.

If you can't get it fresh, grow your own; it is an easy-to-grow and hearty annual.

Epazote seeds are available online if they aren't stocked at your local garden center.

If you are unable to get it fresh and can't grow it, then at least try to get some of the herbs in dried form.

You are most likely to find these at a Mexican grocery store or in the Hispanic foods section of a well-stocked supermarket.

The flavor of the dried form of this herb will be much less intense, but it will give you an authentic Mexican flavor profile that you can't get anywhere else.

Storage

Store fresh epazote either by placing the stems in a glass of water (like cut flowers), or wrap the leaves in a damp paper towel and place it into an unsealed plastic bag.

You can freeze leaves of epazote in an ice cube tray filled with water.

One frozen cube will give you the usual amount called for in most recipes.

## **Ataque ruso deja al menos 41 heridos en edificio de apartamentos en Járkov, Ucrania**

Un ataque ruso contra un bloque de apartamentos de 12 pisos en la ciudad nororiental ucraniana de Járkov ha dejado al menos 41 heridos, con temores de que otras personas permanezcan atrapadas bajo los escombros, dijeron funcionarios ucranianos el domingo.

### **Tres niños resultaron heridos en el ataque**

Tres de las personas heridas cuando un misil aéreo guiado impactó el edificio eran niños, dijo el jefe de la administración militar de la ciudad de Járkov, Oleh Syniehubov.

### **Al menos 14 personas han sido hospitalizadas y una persona sigue desaparecida**

Al menos 14 personas han sido hospitalizadas como resultado del ataque y una persona sigue desaparecida, dijo Syniehubov.

"Podría haber personas bajo los escombros", dijo Syniehubov. "La operación de búsqueda y rescate continúa."

### **Un hombre y su perro fueron rescatados de un apartamento en el 12º piso**

El ministro del Interior de Ucrania, Ihor Klymenko, dijo que uno de los residentes se negó a evacuar sin su perro. "Toda vida es importante para nuestros rescatistas, por lo que rescataron tanto al hombre como a su mascota de un apartamento lleno de humo en el 12º piso", agregó. El video compartido en línea por el ministro mostró al perro siendo levantado en el aire por una de las grúas de emergencia antes de llegar al techo del edificio y ser recibido por uno de los rescatistas.

### **El ataque provocó un incendio y dañó varios apartamentos y automóviles**

El ataque provocó un incendio en el noveno piso. Tres apartamentos fueron completamente destruidos. Decenas de automóviles resultaron dañados y cientos de ventanas se rompieron.

### **Los residentes están siendo evacuados y se están prestando servicios de socorro especializados**

"Los residentes están siendo evacuados. Se están respondiendo organizaciones especializadas, humanitarias, internacionales y ucranianas en la escena", dijo Syniehubov.

"Esta es infraestructura civil", dijo el Comisionado de Derechos Humanos de la Rada Suprema de Ucrania, Dmytro Lubinets. "Rusia viola masivamente los derechos humanos y el derecho internacional humanitario. La reacción debe estar aquí y ahora."

Járkov se encuentra cerca de la frontera con Rusia y ha visto ataques frecuentes desde el comienzo de la invasión a gran escala de Rusia en 2024.

## **El presidente ucraniano Zelensky repite su llamado a más apoyo militar de los aliados tras el ataque**

"El mundo debe ayudarnos a defendernos contra los aviones militares rusos y las decenas de bombas aéreas guiadas que reclaman vidas ucranianas todos los días", dijo Zelensky en un mensaje en redes sociales el domingo.

"Este terror puede ser detenido. Pero para detenerlo, se debe vencer el miedo a tomar decisiones fuertes, objetivamente necesarias. Solo la decisión puede traer un final justo a esta guerra. Es la decisión la que más eficazmente protege contra el terror", dijo.

Las autoridades ucranianas informaron anteriormente que el saldo de ataques rusos en un período de 24 horas fue de nueve, incluida una pareja de ancianos muerta en Odesa.

Zelensky dijo que en la última semana "los rusos han lanzado alrededor de 30 misiles de diversos tipos, más de 800 bombas aéreas guiadas y casi 300 drones de ataque contra Ucrania."
